

Environmental, Land, Community and Social Overview

**Baku-Tbilisi-Ceyhan Pipeline Project
May 2003**

A summary of all of the actions that have been taken and are planned, in relation to the environmental, land, community and social issues faced by the pipeline project.

Prepared by csr network

Glossary

ACG	Azeri, Chirag, Gunashli (Oil Field)
AGI	Above Ground Installation
AIOC	Azerbaijan International Operating Company
AMSL	Above Mean Sea Level
BTC	Baku-Tbilisi-Ceyhan
BTC Co	Baku-Tbilisi-Ceyhan Pipeline Company
BU	Business Unit (BP)
CH ₄	Methane
CLO	Community Liaison Officer
CO	Carbon Monoxide
CO ₂	Carbon Dioxide
CONCAWE	Conservation of Clean Air and Water in Europe
CTD	Crude Topped Distillate
CTP	Crude Topping Plant
EA	Environmental Assessment
EBRD	European Bank for Reconstruction and Development
EEC	European Economic Community
EIA	Environmental Impact Assessment (and formal terminology for ESIA in Turkey)
EMS	Environmental Management System
ERA	Environmental Risk Assessment
ESD	Emergency Shutdown
ESIA	Environmental and Social Impact Assessment
EU	European Union
FEED	Front-End Engineering Design
FFD	Full Field Development (ACG)
FSU	Former Soviet Union
GDP	Gross Domestic Product
GHG	Greenhouse Gas
GHSER	Getting Health, Safety and Environment Right (BP document)
GIOC	Georgian International Oil Company
GRDB	Georgian Red Data Book
HDD	Horizontal Directional Drilling
HGA	Host Government Agreement
HSE	Health, Safety and Environment
IBA	Important Bird Area

Glossary (continued)

IFC	International Finance Corporation
IFI	International Finance Institution
IGA	Inter-Governmental Agreement
IPS	Intermediate Pigging Station
IRS	Intermediate Receiving Station
ISO	International Standards Organisation
IUCN	International Union for the Conservation of Nature (World Conservation Union)
KP	Kilometre Point (distance reference point along pipeline)
LSTK	Lump Sum Turnkey Agreement
MENR	Ministry of Ecology and Natural Resources (Azerbaijan)
MOE	Ministry of Environment and Natural Resources Protection (Georgia)/Ministry of Environment (Turkey)
NGO	Non-Government Organisation
NGP	Natural Gas Pipeline
NO _x	Oxides of Nitrogen
NREP	Northern Route Export Pipeline
OD	Operational Directive
OP	Operational Policy
OPN	Operational Policy Note
OSRP	Oil Spill Response Plan
OWS	Oil-Water Separator
PCDP	Public Consultation and Disclosure Plan
PCIP	Project Community Investment Plan
PEIP	Project Environmental Investment Plan
pRDB	Provisional Red Data Book
PRS	Pressure Reduction Station
PS	Pump Station
PSA	Production Sharing Agreement
PT	Pump Station (Turkey)
RAP	Resettlement Action Plan
ROW	Right Of Way
RR	Regional Review
SCP	South Caucasus Pipeline
SIA	Social Impact Assessment
SLIP	Supplementary Lenders' Information Pack

Glossary (continued)

SO ₂	Sulphur Dioxide
SOCAR	State Oil Company of the Azerbaijan Republic
SPM	Single Point Mooring
STP	Sewage Treatment Package
TRA	Technical Risk Assessment
VEC	Valuable Ecosystem Component
WREP	Western Route Export Pipeline

Units:

bpd	Barrels Per Day
km	Kilometre
kJ	Kilojoule
kPa	Kilopascal
MW	Megawatt
te	Tonnes Equivalent
"	Inch
°C	Degrees Centigrade

GLOSSARY

1.0	The BTC Project	1 - 3
1.1	Project synopsis	1
1.1.1	The pipeline project	1
1.1.2	Why build a pipeline?	2
1.2	Equity participation in the project	2
1.3	Purpose and structure of this document	3
2.0	Purpose and Benefits of the Project	8
	<i>Summary</i>	8
2.1	Regional socio-economic background	9
2.1.1	The economies of Azerbaijan, Georgia and Turkey	9
2.1.1.1	Overview	9
2.1.1.2	Foreign Direct Investment	9
2.1.1.3	The role of International Financing Institutions	10
2.1.2	Society	10
2.1.2.1	Overview	10
2.1.2.2	Poverty and vulnerability	11
2.2	Purpose of the project	11
2.3	Economic and social benefits	12
2.3.1	Overview	12
2.3.2	Oil and gas revenues	12
2.3.2.1	Alleviation of poverty	13
2.3.3	Employment and procurement	13
2.3.4	Additional benefits	14
3.0	Challenges to Developing Caspian Oil	15
	<i>Summary</i>	15
3.1	Environmental	17
3.1.1	Geography and geohazards	17
3.1.2	Biodiversity	17
3.1.2.1	Habitats at risk	17
3.1.2.2	Legacy of Environmental Degradation	17
3.1.3	Global warming	18
3.1.4	Cultural Heritage at risk	18

CONTENTS (continued)

	Page No
3.2 Community	18
3.2.1 Affected communities	18
3.2.1.1 Poor existing services	19
3.2.1.2 Managing expectations	19
3.2.1.3 Previous experiences of pipeline construction	19
3.2.1.4 Domestic energy	19
3.3 Social/economic	20
3.2.1 Regional conflict	20
3.2.1.4 Politics	20
3.2.2 Oil Wealth	20
3.2.3 Corruption	21
3.2.4 Human Rights	21
3.3.4.1 Security	21
3.2.5 Legal Framework	22
4.0 Project alternatives	23
<i>Summary</i>	23
4.1 Conceptual development	24
4.1.1 The 'no development' option	24
4.1.2 Development of the concept	25
4.2 The selected pipeline option	28
4.3 Project description	30
4.3.1 Overview	30
4.3.2 Construction	33
4.3.3 Reinstatement	34
4.3.4 Hydrostatic testing	35
4.3.5 Pre-commissioning	35
4.3.6 Commissioning	36
4.3.7 Operations and maintenance	36
4.3.8 Decommissioning and abandonment	37

CONTENTS (continued)

	Page No
5.0 Environmental, Land, Community and Social Issues Faced by the Project	39
<i>Summary</i>	39
5.1 Environmental issues	41
5.1.1 Introduction	41
5.1.2 Natural habitats and biodiversity	41
5.1.2.1 Habitats crossed by the pipeline	41
5.1.2.2 The most sensitive habitat resources	46
5.1.3 Protected areas	47
5.1.4 Hydrology and surface water quality	52
5.1.5 Groundwater resources	56
5.1.6 Landscape	58
5.1.7 Cultural heritage	59
5.2 Land and community issues	63
5.2.1 Introduction	63
5.2.2 Expectations and concerns of project affected communities	63
5.2.3 Management of employment expectations	66
5.2.4 Land issues	66
5.2.4.1 Land use along the pipeline route	67
5.2.4.2 Impact of the project	69
5.2.4.3 Operations Activities Potentially Affecting Land Owners and Users	71
5.2.4.4 Restrictions of use	72
5.2.5 Infrastructure and services	72
5.2.5.1 Upgrading of infrastructure	73
5.2.5.2 Increased load on existing structure	73
5.2.5.3 Unplanned disruptions to infrastructure and services provision	73
5.2.5.4 Unmet expectation of better access to energy	73
5.2.6 Health and safety of local communities	74
5.2.6.1 Accidents involving community members	74
5.2.6.2 Health impacts of construction camps	74
5.2.7 Interactions with local communities	74
5.2.7.1 Cultural issues	74
5.2.8 Nuisance from noise	74
5.2.8.1 Potential impacts	74

5.3 Social economic issues	75
5.3.1 Introduction	75
5.3.2 Employment and procurement	75
5.3.2.1 Effect of the project	76
5.3.3 Community and social investment	77
5.3.4 Domestic energy	77
5.3.5 Ethical performance	78
5.3.6 Human rights	78
5.3.6.1 Vulnerable groups	78
6.0 Managing Environmental, Land, Community and Social Issues	81
<i>Summary</i>	81
6.1 Policy and governance	82
6.1.1 Introduction to legal and policy framework	82
6.1.2 National legislation	82
6.1.3 International agreements, protocols and conventions	84
6.1.4 IFI policies and guidelines	85
6.1.5 BP corporate policies	90
6.1.6 Project environmental and social goals and objectives	91
6.2 Process	92
6.2.1 Introduction	92
6.2.2 The ESIA's	93
6.2.3 Public consultation and disclosure	97
6.2.3.1 BP/BTC consultation objectives	97
6.2.3.2 HGA and IFI requirements	97
6.2.3.3 PCDPs and RAPs	98
6.2.3.4 Consultation activities	99
6.2.3.6 Disclosure activities	99
6.2.4 Responding to stakeholders	101
6.2.4.1 National governments	101
6.2.4.2 Lenders	101
6.2.5 On-going consultation	102
6.3 Performance	103
6.3.1 Design approach	103
6.3.1.1 Pipeline specifications and supporting infrastructure	105

CONTENTS (continued)

	Page No
6.3.1.2 Marine loading facility	110
6.3.1.3 Construction materials supply	110
6.3.1.4 Construction camps, pipe yards and associated access roads	111
6.3.2 National and local-level routing	111
6.3.2.1 The unique challenge of routing in Georgia	112
6.3.2.2 Borjomi Groundwater – a site of particular vulnerability	114
6.3.3 Residual impacts and mitigation	116
6.3.3.1 Environmental	117
6.3.3.2 Soils	120
6.3.3.3 Landscape	124
6.3.3.4 Land and community	126
6.3.3.5 Social and economic impacts	133
6.3.3.6 Cultural heritage	137
6.3.4 Cumulative impacts	137
6.3.4.1 Introduction	137
6.3.4.2 Project activity	139
6.3.4.3 Projects with potentially significant interactions with BTC	143
6.3.4.4 Mitigation of cumulative impacts	149
6.3.5 Environmental risk assessment and oil spill response planning	149
6.3.5.1 Pipeline risk assessment	150
6.3.5.2 Marine terminal oil risk assessment	157
6.3.5.3 Oil spill response planning	161
6.3.6 Environmental and social management	165
6.3.6.1 Overview	165
6.3.6.2 Contractor Control Plans	166
7.0 Environmental and community investment programmes	171
<i>Summary</i>	171
7.1 Introduction	172
7.2 Project Environmental Investment Plan	172
7.2.1 Policy	172
7.2.2 Objectives and strategy	174
7.2.3 PEIP process	175
7.2.3.1 Stakeholder consultation	177
7.2.3.2 Priority biodiversity themes	177

CONTENTS (continued)

7.2.3.3 Partner and project selection	179
7.2.3.4 Management and reporting	181
7.2.3.5 Monitoring and evaluation	181
7.2.4 Transition to operations	181
7.3 Project Community Investment Plan	182
7.3.1 Policy	182
7.3.2 Objectives and strategy	182
7.3.3 PCIP process	183
7.3.3.1 Stakeholder consultation	185
7.3.3.2 Priority CI themes	185
7.3.3.3 Partner and project selection	187
7.3.3.4 Variations between countries	189
7.3.3.5 Management and reporting	189
7.3.3.6 Monitoring and evaluation	189
7.3.4 PCIP budget	190
7.3.5 Transition to operations	190
8.0 Conclusions	191
8.1 Outcomes	192
8.2 Key benefits from the project	192
8.2.1 Oil revenue	192
8.2.1 Employment and procurement	193
8.2.1 Transparency and good governance	193
8.2.1 Development of increased knowledge base	193
8.2.1 Environmental and community investment	194
8.3 Key residual issues for the project	194
8.2.1 Significant environmental impacts	
8.2.1.1 Biodiversity	194
8.2.1.2 Seismic risk	195
8.2.1.3 Landscape impacts	195
8.2.1.4 Cultural heritage	196
8.2.2 Impacts on communities	196
8.2.1.1 Disturbance	196
8.2.1.2 Land-take and compensation	196
8.2.1.3 Infrastructure	197
