Financial Performance Summary

The overall market environment has a significant influence on IFC's financial performance. The main elements of IFC's net income (loss) and comprehensive income (loss) and influences on the level and variability of net income (loss) and comprehensive income (loss) from year to year are:

ELEMENTS	SIGNIFICANT INFLUENCES
Net income:	
Yield on interest earning assets	Market conditions including spread levels and degree of competition. Nonaccruals and recoveries of interest on loans formerly in nonaccrual status and income from participation notes on individual loans are also included in income from loans.
Liquid asset income	Realized and unrealized gains and losses on the liquid asset portfolios, which are driven by external factors such as: the interest rate environment and liquidity of certain asset classes within the liquid asset portfolio.
Income from the equity investment portfolio	Global climate for emerging markets equities, fluctuations in currency and commodity markets and company-specific performance for equity investments. Performance of the equity portfolio (principally realized capital gains, dividends, equity impairments, gains on non-monetary exchanges and unrealized gains and losses on equity investments).
Provisions for losses on loans and guarantees	Risk assessment of borrowers and probability of default and loss given default.
Other income and expenses	Level of advisory services provided by IFC to its clients, the level of expense from the staff retirement and other benefits plans, and the approved and actual administrative expenses and other budgets.
Gains and losses on other non- trading financial instruments accounted for at fair value	Principally, differences between changes in fair values of borrowings, including IFC's credit spread, and associated derivative instruments and unrealized gains or losses associated with the investment portfolio including puts, warrants and stock options which in part are dependent on the global climate for emerging markets. These securities are valued using internally developed models or methodologies utilizing inputs that may be observable or non-observable.

Other comprehensive income (loss):

Unrealized gains and losses on	Global climate for emerging markets equities, fluctuations in currency
listed equity investments and	and commodity markets and company-specific performance. Such equity
debt securities accounted for as	investments are valued using unadjusted quoted market prices and debt
available-for-sale	securities are valued using internally developed models or methodologies
	utilizing inputs that may be observable or non-observable.

Unrecognized net actuarial gains and losses and unrecognized prior service costs on benefit plans

Grants to IDA

Returns on pension plan assets and the key assumptions that underlay projected benefit obligations, including financial market interest rates, staff expenses, past experience, and management's best estimate of future benefit cost changes and economic conditions.

Level of the Board of Governors-approved grants to IDA.

Global equity markets in emerging economies have been volatile in recent years but there was an overall improved operating environment in FY17, particularly in the second half of the fiscal year. In FY16, such markets were generally lower with significant deterioration in the first three months of FY16 (FY16 Q1), followed by partial recovery by the end of FY16. FY17 saw IFC's major investment currencies remain relatively stable against IFC's reporting currency, the US\$, compared to the significant depreciation experienced throughout much of FY16. Commodity prices fluctuated during the fiscal year and fell during the second half of FY17, decoupling from the strength in emerging market assets overall.

The generally stronger market conditions in FY17 contributed to IFC recording robust realized gains on equity investments, although lower than FY16, and lower impairments on equity investments along with

lower provisions for loan losses. Income from liquid asset trading activities was also significantly higher in FY17, with the majority of the increase occurring in the first three months of FY17 (FY17 Q1), principally due to the narrowing of credit spreads across the portfolio. IFC experienced higher interest income on loans and debt securities and borrowing charges in FY17 driven by higher LIBOR rates.

IFC has reported income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses attributable to non-controlling interests of \$1,129 million in FY17, \$629 million higher than FY16 (\$500 million) and \$274 million higher than FY15 (\$855 million). The \$629 million increase in FY17 when compared to FY16 was principally a result of the following:

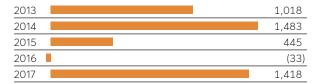

Change in income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses attributable to non-controlling interests FY17 vs FY16 (US\$ millions)

	INCREASE (DECREASE) FY17 VS FY16
Higher income from liquid asset trading activities	\$ 413
Lower provisions for losses on loans, guarantees and other receivables	273
Higher income from loans and guarantees, realized gains and losses on loans and associated derivatives	172
Lower unrealized losses on equity investments and associated derivatives, net	171
Higher debt securities income (excluding impairments)	162
Lower other-than-temporary impairments on equity investments and debt securities	154
Higher expenses from pension and other postretirement benefit plans	(108)
Higher foreign currency transaction losses on non-trading activities	(142)
Lower realized gains on equity investments and associated derivatives, net	(144)
Higher charges on borrowings	(303)
Other, net	(19)
Change in income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses	
attributable to non-controlling interests	\$ 629

IFC's net income (loss) for each of the past five fiscal years ended June 30, 2017 is presented below (US\$ millions):

IFC's net income (loss), fiscal years 2013-2017

Fiscal year ended June 30 (US\$ millions)

Income Available for Designations (a non-GAAP measure)¹ was \$1,233 million, 60% higher than in FY16 (\$770 million) and 7% lower than in FY15 (\$1,327 million).

Reconciliation of reported net income to income available for designations (US\$ millions)

	FY17	FY16	FY15
Net income (loss) attributable to IFC	\$1,418	\$ (33)	\$ 445
Add: Net gains (losses) attributable to non-controlling interests	4	(1)	(36)
Net income (loss)	\$1,422	\$ (34)	\$ 409
Adjustments to reconcile Net Income to Income Available for Designations			
Grants to IDA	101	330	340
Advisory Services Expenses from prior year designations	64	57	59
Unrealized (gains) losses on borrowings	(74)	(62)	52
Unrealized (gains) losses on investments	(287)	470	456
Other	7	9	11
Income Available for Designations	\$1,233	\$770	\$1,327

Based on the new Board-approved distribution policy, the maximum amount available for designation was \$205 million. On August 3, 2017, the Board of Directors approved a designation of \$85 million of IFC's retained earnings for IFC's Creating Markets Advisory Window (CMAW), \$40 million of IFC's retained earnings for Advisory Services, a reallocation of \$49 million

of the unutilized balances of prior year designations related to Advisory Services to CMAW, and, subject to the conditions detailed above, a designation of up to \$80 million of IFC's retained earnings for grants to IDA. These designations are expected to be noted with approval by the Board of Governors, and, subject to the above conditions, concluded, in FY18.

^{1.} Income available for designations generally comprises net income excluding unrealized gains and losses on investments and unrealized gains and losses on other non-trading financial instruments, income from consolidated VIEs, and expenses reported in net income related to prior year designations.

2017

2016

2015

2014

2013

- a. Certain financial ratios, as described below, are calculated excluding the effects of unrealized gains and losses on investments, other non-trading financial instruments, AOCI, and impacts from consolidated Variable Interest Entities (VIEs).
- b. Net income for the fiscal year as a percentage of the average of total assets at the end of such fiscal year and the previous fiscal year.
- c. Return on average assets is defined as Net income, excluding unrealized gains/losses on investments accounted for at fair value, income from consolidated VIEs and net gains/losses on non-trading financial investments, as a percentage of total disbursed loan and equity investments (net of reserves), liquid assets net of repos, and other assets averaged for the current and previous fiscal year.
- d. Net income for the fiscal year as a percentage of the average of total capital (excluding payments on account of pending subscriptions) at the end of such fiscal year and the previous fiscal year.
- e. Return on average capital is defined as Net income, excluding unrealized gains/losses on investments accounted for at fair value, income from consolidated VIEs and net gains/losses on non-trading financial investments, as percentage of the paid-in share capital and accumulated earnings (before certain unrealized gains/losses and excluding cumulative designations not yet expensed) averaged for the current and previous fiscal year.
- f. Overall Liquidity Policy states that IFC would at all times maintain a minimum level of liquidity, plus undrawn borrowing commitments from the IBRD, that would cover at least 45% of the next three years' estimated net cash requirements (target range of 65–95%).
- g. This ratio was discontinued at the end of FY17 since it was no longer considered a key ratio for IFC.
- h. Leverage (Debt/equity) ratio is defined as the number of times outstanding borrowings plus outstanding guarantees cover paid-in capital and accumulated earnings (net of retained earnings designations and certain unrealized gains/losses).
- i. Total reserves against losses on loans to total disbursed loan portfolio is defined as reserve against losses on loans as a percentage of the total disbursed.
- j. Total resources required (TRR) is the minimum capital required to cover the expected and unexpected loss on IFC's portfolio, calibrated to maintain IFC's triple-A rating. TRR is the sum of the economic capital requirements for IFC's different assets, and it is determined by the absolute size of the committed portfolio, the product mix (equity, loans, short-term finance, and Treasury portfolio assets), and by operational and other risks.
- k. Total resources available (TRA) is the total capital of the Corporation, consisting of (i) paid-in capital; (ii) retained earnings net of designations and some unrealized gains and losses; and (iii) total loan loss reserves. TRA grows based on retained earnings (profit minus distributions) and increases in reserves.
- I. Total resources available less total resources required.

KEY FINANCIAL RATIOS

m. 90% of total resources available less total resources required.

COMMITMENTS

In FY17, the Long-Term Finance program was \$11,854 million, as compared to \$11,117 million in FY16 and Core Mobilization was \$7,462 million, as compared to \$7,739 million for FY16, a total increase of 2%.

In addition, the average outstanding balance for Short-Term Finance was \$3,185 million at June 30, 2017, as compared to \$2,807 million at June 30, 2016.

CORE MOBILIZATION

Core Mobilization is financing from entities other than IFC that becomes available to clients due to IFC's direct involvement in raising resources. IFC finances only a portion, usually not more than 25%, of the cost of any project. All IFC-financed projects, therefore, require other financial partners.

FY17 and FY16 long-term finance and core mobilization (US\$ millions)

	FY17	FY16
Total Long-Term Finance and

The Board of Directors of IFC has had this annual report prepared in accordance with the Corporation's bylaws. Jim Yong Kim, President of IFC and Chairman of the Board of Directors, has submitted this report with the audited financial statements to the Board of Governors. The Directors are pleased to report that, for the fiscal year ended June 30, 2017, IFC expanded its sustainable development impact through private sector investments and advice.
