IFC’s Social Bonds: Promoting Inclusive and Equitable Impact

IFC’s social bonds offer investors an opportunity to support projects that promote social, economic, and gender equality in emerging markets. Social bonds are an integral part of our borrowing strategy. IFC social bonds are issued as senior unsecured debt, consistent with the overall funding program.

IFC collaborates with the private sector to create impactful investment opportunities focused on critical areas, such as healthcare, education, affordable housing, finance, and sanitation. Our social bonds finance projects that directly benefit underserved populations, contributing to the achievement of the UN Sustainable Development Goals.

IFC’s Social Bond Program was launched in 2017 with the issuance of its first-ever U.S. dollar social bond global benchmark. Since then, IFC has been a frequent issuer of social bonds in public and private markets, across various currencies and tenors. The program aligns with the Social Bond Principles published by the International Capital Market Association (ICMA).
