- Investment Commitments include Long-Term Investment Commitments and Short-Term Investment Commitments.
- Defined as "core mobilization" — Non-IFC financing or risk sharing arranged on commercial terms due to the active and direct involvement of IFC for the benefit of a client. Excludes \$895 million of unfunded risk transfers that are accounted for under IFC's own account.
- Advisory Mobilization includes third-party private financing that has been mobilized for Public Private Partnerships, as a result of IFC's role as lead transaction advisor. It also includes Corporate Finance Services, for projects in which IFC has provided transaction advisory services to help private sector clients expand into new markets, diversify and restructure operations or bring in new equity investors.
- FY20 Annual Report reflected Short Term Finance ("STF") Average Outstanding Balance for FY17-FY19. FY21 Annual Report used Short-Term Investment commitment for FY17-FY21. In FY20 Annual Report, Short-Term Investment commitment was reported as \$6,473 million; the figure has been revised to \$6,469 million. Short-Term Finance includes Global Trade Finance Program (GTFP) and Global Trade Supplier Finance Program (GTSF).
- Portfolio exposure is defined as the sum of the (i) committed exposure for IFC's debt investments, (ii) fair market value of IFC's equity investments, and (iii) total undisbursed equity commitments. Effective July 1, 2018, to accommodate change in accounting standards impacting how IFC reports its equity holdings, IFC has introduced the new term "Portfolio Exposure," which, instead of disbursed and outstanding balance, uses the fair market value of IFC's equity investments. Therefore, FY19 onwards Portfolio Exposure For IFC's account and prior years are not directly comparable.
- All references in this report to percentages of advisory program expenditures in IDA countries and fragile and conflict-affected areas exclude global projects.
