IFC’s fiscal year runs from July 1st to June 30th. All figures are as of 30 June 2022 unless stated otherwise.
IFC Overview

Who We Are

- A member of the World Bank Group with a mission to promote development through investment in the private sector
- Owned by 186 member countries
- Providing debt (loans, bonds, guarantees and other fixed income instruments) and equity investments to the private sector in emerging markets for over 60 years
- Strategic priorities include creating and developing markets and opportunities, mobilizing private capital for development and advising businesses and governments
- Global presence in more than 100 countries, working with over 1,800 private sector clients
Uniquely Positioned Issuer

• Consistently rated AAA/Aaa
• 0% risk weighting under Basel framework
• Well capitalized: net worth exceeds a quarter of the balance sheet
• Annual funding program of up to $12 billion for FY23 – excluding a $5 billion discount note program
• Diverse business portfolio with exposure to 117 countries
• Robust liquidity position with a liquidity coverage ratio above the minimum requirement

AAA
Long-term rating (February 2022)
Outlook: Stable

Aaa
Long-term rating (December 2021)
Outlook: Stable
The World Bank Group is a unique global partnership: five institutions working towards sustainable solutions that reduce poverty and build shared prosperity in developing countries.

The World Bank Group has adopted two ambitious goals:

- **Ending extreme poverty**: the percentage of people living with less than $1.90 a day to fall to no more than 3% globally by 2030.
- **Promoting shared prosperity**: foster income growth for the bottom 40% of the population in developing countries.

IFC Overview

Strong Shareholder Support

- **IFC** is a **legally distinct entity** of the World Bank Group with its own Articles of Agreement, balance sheet and staff
- **Owned by 186 shareholders:** governments of member countries
- Through a Board of Governors and a Board of Directors, IFC’s member countries guide its programs and activities. Voting power on issues brought before the Board of Directors is weighted according to the share capital
- 50% of capital is held by **AAA/AA sovereigns**
- IFC does not pay dividends or taxes; profits are channeled back into investments in developing member countries
- In FY18, the shareholders endorsed a historic increase of $5.5 billion in paid-in capital for IFC

**IFC’s shareholder diversity** with, on average, countries with high-ranking governance as supportive of its governance assessment based on the World Bank’s Governance Indicators – further enhanced by its robust management expertise and risk practices. IFC is well-positioned to manage higher risks associated with its growing exposure to IDA-eligible and FCS countries.

**The stable outlook reflects our expectation that the IFC will maintain its solid capital adequacy and liquidity buffers in the coming years. We also expect the IFC’s prudent risk management practices and its shareholders’ capacity and willingness to provide financial support to remain strong.**

## What We Do

### Investment
- Debt (loans, bonds and other fixed income instruments)
- Equity
- Trade and commodity finance
- Derivatives and structured finance
- Blended finance

- $32.8 billion committed in FY22°
- $62.5 billion committed outstanding portfolio

### Advisory
- Providing solutions and technical assistance to
  - Companies
  - Financial institutions and funds
  - Industries
  - Governments

- $233 million in advisory services income in FY22

### Debt and Equity Mobilization
- Syndications
  - B loans
  - Parallel loans
  - Managed Co-lending Portfolio Platform (MCPPP)
  - Credit insurance
  - Local currency syndications
  - Green loan syndications

- $25.7 billion syndicated over the last 5 years
- 11 funds with $10.1 billion under AMC’s management

---

° $23.2 billion of long-term finance commitments (including mobilization) and $9.7 billion of short-term finance commitments.

°° Effective January 31, 2020, IFC Asset Management Company (AMC) was merged into IFC.
IFC invests in productive private enterprises targeting **satisfactory economic returns** and **development impact**.
IFC’s Corporate Strategy for FY23-25

IFC’s business model with the adoption of the IFC 3.0 long-term strategy represents a more deliberate and systematic operating model to support market creation. The successful implementation of this strategy – evidenced by an increase in exposure to FCS and IDA-eligible countries, growing use of IFC’s advisory services, and co-lending platforms, combined with increased risk mitigating and credit enhancement products – would lead to a stronger enterprise risk profile over the medium term.

Standard & Poor’s
25 February 2022
Sustainability: Alignment with United Nations’ SDGs

The above is not an exhaustive mapping but represents an overview of IFC’s approach to support the achievement of the SDGs. Given that cross-sectoral impact is delivered through investments and advisory operations in the strategic sectors, some overlaps exist in this mapping.
All projects financed by IFC must adhere to IFC’s stringent **environmental and social requirements** focusing on transparency and accountability. The **Equator Principles**, that are adopted by funding institutions to identify, assess and manage environmental and social risks as accurately as possible, correlate with IFC’s **Performance Standards**.

**Specific performance standards cover**

- Assessment and management of environmental and social risks and impacts
- Community, health, safety and security
- Labor and working conditions
- Land acquisition and involuntary resettlement
- Biodiversity conservation and sustainable management of living natural resources
- Cultural heritage
- Resource efficiency and pollution prevention
- Indigenous peoples
### IFC's Development Impact

Development impact indicators are measured on an annual basis.

In 2022, IFC’s 1,800 private sector clients provided overall:

#### Agribusiness and Forestry
- **Employment**: 438 million
- **Farmers reached**: 3.5 billion

#### Health and Education
- **Employment**: 309 million
- **Patients reached**: 41 million
- **Students reached**: 0.8 million
- **Female students reached**: 0.4 million

#### Infrastructure
- **Employment**: 190 million
- **Power generation (GWh)**: 98 million
- **Customers reached (millions)**: 
  - Power generation: 59
  - Power distribution: 11
  - Water distribution: 3
  - Airline passengers: 2
  - Airport passengers: 18

#### Telecommunications and Information Technology
- **Employment**: 21 million
- **Retail operators (million connections)**: 
  - Direct fixed/mobile internet: 62 million
  - Direct fixed/mobile telephone: 91 million

#### Financial Institutions Group
- **Microfinance Number of loans**: 44 million
- **SME finance Number of loans**: 15 million
- **$108 billion**
- **$522 billion**

<tr>
<td>equivalent to 42% of total assets</td>
<td>focused on capital preservation</td>
<td>issued by, or unconditionally guaranteed by governments, government instrumentalities, supranational, and high quality corporate issuers. Includes instruments like ABS/MBS and deposits</td>
<td>mainly through the use of derivatives, principally currency and interest rate swaps and financial futures</td>
<td>across multiple markets ensures a favorable risk return profile</td>
</tr>
</tbody>
</table>

IFC liquidity ratios – which support IFC’s extremely strong financial risk profile – indicate that it would be able to fulfill its mandate as planned for at least one year, even under stressed market conditions, without access to the capital markets.

Standard & Poor’s  
25 February 2022
Financial Strength

Financial Performance

- The financial performance of IFC has been significantly influenced by the volatile emerging equity markets.
- IFC reported a net loss of $464 million in FY22, as compared to a net income of $4.2 billion in FY21.
- IFC's net income in FY21 had a substantial component of unrealized gains on investments of $3.3 billion, when markets rebounded post the immediate effect of COVID-19.

* IFC effected a change in accounting standard (ASU 2016-01), effective July 1, 2018 all equity investments are measured at fair value, with unrealized gains and losses reported in net income.
Investing for Impact

Core Business Portfolio
Core Business Portfolio

Portfolio Risk Management

- Risk-based loan pricing
- Matched funding policy to manage currency, interest rate and maturity risks
- Strict debt and equity portfolio diversification guidelines to reduce concentration risks

**By company**

Risk-based limits for clients and groups of connected clients are set based on individual credit rating

**By sector**

Limits on aggregated finance and insurance sectors exposure, which restrict economic capital to these sectors to 50% of a country limit

**By country**

Economic capital-based limits on country exposure as a percentage of total resources available

IFC’s very strong risk management limits the risk associated with its business profile and the corporation’s large capital buffer allow it time to work out stressed exposure. IFC exhibits best-in-class risk management practices, which we believe limit the risks associated with its development-related assets.

Moody’s
11 December 2021
Core Business Portfolio

Highly Diversified Global Portfolio

- IFC has debt and equity exposure in **117 countries** and over **1,800 companies**
- Five largest country exposures account for **32.3%** of total committed portfolio
- Top ten country exposures comprise **47.5%** of total committed portfolio
- IFC’s portfolio is highly diversified across a **wide range of industries and sectors**

IFC’s portfolio is highly diversified, which reflects its large size and global reach. IFC’s portfolio concentration metrics are better than those of most peers. The overall credit risk in the portfolio is mitigated to some extent by a very granular and widely diversified development asset portfolio, reflecting the IFC’s global reach.

IFC is a sustainable bond issuer with two focused thematic bond programs fully aligned with the Green and Social Bond Principles.

**Green Bonds**

*Program established:* 2010

*Use of Proceeds:* Climate friendly projects including renewable energy, energy efficiency, green banking, etc.

To learn more about our Green Bonds and to access our impact report, visit www.ifc.org/greenbonds

**Social Bonds**

*Program Established:* 2017

*Use of Proceeds:* Projects that aim to address access to essential services and income generation to underserved target populations in developing countries.

To learn more about our Social Bonds and to access our impact report, visit www.ifc.org/socialbonds
Funding Program

MTNs and Structured Notes

IFC aims to maintain its position as an active and flexible issuer of plain vanilla and structured notes

IFC currently offers:
- Interest rate linked, FX linked, equity index linked, Bermudan and European callables and hybrids
- Minimum size $5 million equivalent with maturities ranging from 1 to 30 years

Total MTN volume in FY22 was $2.98 billion across 22 currencies

IFC has an active buyback program, serving as a liquidity back-stop for its issuances

FY22 structures
- 0.2% Other*
- 1% Fixed rate callable
- 1.5% Zero bullet
- 2% Zero callable
- 18.5% Step up callable
- 77% Fixed rate bullet

FY22 currencies
- 3% Other
- 46% USD
- 3% Other
- 8% CNY
- 8% KZT
- 5% HUF
- 6% HKD
- 8% BRL
- 2% CLP
- 3% RUB
- 3% MXN
- 3% UZS
- 4% EUR
- 1% COP
- 1% AZN
- 2% RON
- 1% UYU
- 2% BRL
- 2% GEL

* Other constitutes Equity Index Linked, PRDC Callable
Uridashi

- Asia presence allows IFC’s Funding team to focus on retail investors in Japan
- IFC has sold thematic bonds (green and social) into Japan
- IFC issued 24 individual Uridashi transactions in FY22 totaling $145.7 million equivalent
- IFC has an active Uridashi buyback program with a minimum buyback size of JPY100 million equivalent

**FY22 structures**

- 2% Zero-coupon
- 8% Fixed rate
- 38% Equity Index Linked
- 52% FX-linked

**FY22 currencies**

- 2% AUD
- 2% BRL
- 6% MXN
- 90% JPY
Discount Note Program

- Launched in June 2009 to complement IFC’s GMTN Program
- Offers a high-quality short-term investment opportunity in USD and CNH
- During FY22, IFC issued a total of $7.5 billion under its global discount note program
- $5 billion authorized outstanding limit for FY23

- Denominated in USD and CNH
- Maturities range from overnight to 360 days
- Minimum order of $100,000
- Uncertified book-entry form
- IFC’s fiscal agent: Federal Reserve Bank of New York
- Settlement via Fedwire for USD discount notes
- Bloomberg ticker: IFC<go>7 and ADN<go>8
- Offered through 10 dealers:
  - Barclays Capital
  - BofA Securities
  - CastleOak Securities
  - Jefferies
  - JP Morgan Securities
  - Mesirow Financial
  - Mizuho Securities USA
  - Nomura Securities International
  - UBS Securities
  - Wells Fargo Securities
Developing local capital markets is a strategic priority for IFC

Investing for Impact

Annex
Yemen is on the brink of famine: 17.4 million people don’t have enough food to eat and an additional 1.6 million are expected to reach “emergency levels of hunger” by the end of 2022.

The impact of the war in Ukraine is particularly acute for Yemen because of escalating global wheat prices and the Yemeni private sector’s diminishing purchasing power. Factors contributing to and exacerbating the emergency include eight years of violent conflict, an economic blockade, currency collapse, a fragmented banking system, flooding attributed to climate change, the COVID-19 pandemic, and most recently the war in Ukraine, which has triggered huge increases in the price of wheat and other basic commodities.

One of Yemen’s largest food conglomerates, HSA Group, is playing a leading role in assuring that stocks of food like flour, sugar, wheat, and dairy products remain at adequate levels and are distributed to communities in need. Because HSA Group’s operations also include transport, infrastructure, and shipping, it has the capacity to resurface roads and rebuild bridges destroyed by Yemen’s warring factions, and supply the vehicles and fuel necessary to get food to the people at the greatest risk.

Financing constraints jeopardize HSA’s long-term ability to provide food across the country. Yemen imports around 90 percent of its food, but international suppliers do not work with Yemen on credit as they do in other countries because of Yemen’s weak banking system. Limited access to global financial markets means that companies like HSA have to be able to offer hard currency – in essence, pay for everything in cash, up front.

IFC is providing and has mobilized up to $75 million in debt financing to provide working capital to HSA. The finance will help reduce food shortages and ensure supply chain sustainability, including the supply of staple foods to towns and villages across Yemen.

This is IFC’s first investment in Yemen’s agribusiness sector in more than 10 years and is part of a broader strategy to support businesses in fragile and conflict-affected countries.
According to the World Economic Forum’s Global Gender Gap Report, Türkiye has one of the highest gender gaps in labor force participation rates among OECD countries and emerging economies. Overall, the report ranks Türkiye 140th out of 156 countries on the gender gap in the Economic Participation and Opportunity category.

To boost access to finance and employment opportunities for women in the country and create more gender-equal businesses, IFC is providing a $100 million financing package to Türkiye Sinayi Kalkınma Bankası (TSKB), the country’s largest development bank, to allocate to mid-cap companies in Türkiye that are also women-inclusive enterprises.

To qualify as a women-inclusive enterprise, a company must meet specific gender criteria, such as having a minimum number of women owners, board members, or senior executives, a valid gender equality certification, or a minimum score from IFC’s gender tool kit.

TSKB and IFC are long-standing partners. IFC has provided financing to the bank since 1963, with a focus on energy efficiency, renewable energy, and reducing pollution. The bank identified gender finance as a focus area in 2016 and has been systematically developing the area since then.

IFC has supported private sector development in Türkiye for more than 50 years, with a committed exposure of over $4.3 billion in the country as of June 2021.
Mexico is considered an upper-middle-income country, but it has wide disparities in standards of living, an aging population, and an increasing incidence of chronic diseases. In the pharmaceutical industry Grupo Neolpharma has built a business model focused on the development and manufacturing of high-quality, low-cost medicines for the low- to middle-income population. The company is engaged in different segments across the pharma value chain.

The company’s financing with IFC, which took place in 2021 as a $30 million loan package including $15 million concessional financing from the Canada-IFC Blended Climate Finance Program, is structured to build a long-term working relationship. The $30 million investment includes a climate change mitigation component, setting a best-practice standard for the Mexican pharmaceutical market.

There were facilities’ projects involved, such as a new plant for making injectable products like vaccines. But there was also a recognition of the need for sustainable, flexible financing. For example, Neolpharma is partnering with local research institutions such as Autonomous University of Querétaro to explore possibilities in patenting new products. It is also developing forms of industrial manufacturing with a low carbon footprint. Both of these endeavors, and others, could require sudden needs for financing that are not always possible to foresee. Both Neolpharma and IFC are interested in demonstrating that a small, family-owned company can become technologically sophisticated enough to compete meaningfully in the complex global life sciences industry.

Grupo Neolpharma
Uzbekistan, the most populous country in Central Asia, has been undergoing an unprecedented economic transformation since its government launched a National Development Strategy to open the country to foreign investment in 2017.

Key to this has been privatizing state-owned banks. Since 2019, IFC has been working with Uzpromstroybank – the second largest bank in the country – to prepare the bank for privatization by strengthening the bank’s corporate governance practices, commercializing its operations, and reducing state involvement in decision-making, while also helping the bank build a green banking franchise.

A recent $75 million loan by IFC to Uzpromstroybank will finance more climate-friendly projects and expand lending to small and medium enterprises (SMEs) in Uzbekistan. The long-term funding – not readily available in the market – will further incentivize the bank’s transformation with an option for IFC to convert the loan into equity.

While the proceeds of the project are earmarked for on-lending to SMEs, 50 percent of the loan will be dedicated to climate finance, enabling the bank to scale up its green banking program.

Uzbekistan plans to sell shares in state-owned banks to investors as part of a drive to transform the country’s financial sector. Privatization will bring in new capital, global expertise, and modern technology that will benefit the banking sector and its customers. Currently, state-owned banks dominate Uzbekistan’s banking sector – 83 percent of banking assets are held by state-owned banks.
