US Investor Fact Sheet
A Triple-A alternative to US Treasuries

IFC, a member of the World Bank Group, is the largest global development institution focused exclusively on the private sector. We help developing countries achieve sustainable growth by financing private sector investment, mobilizing capital in international financial markets, and providing advisory services to businesses and governments. We play a catalytic role by demonstrating the profitability of investments in emerging markets.

Providing value to US dollar investors

**IFC’s annual program for FY21 is $14 billion.** We borrow in a wide variety of currencies, however, the majority of our borrowings are in USD.

A large portion of IFC’s USD borrowings come from the issuances of benchmark bonds. We have issued USD benchmark bonds in global format each year since 2000, with a focus on timing, lead manager selection, price discovery and continued secondary performance.

As at FY21, IFC has nine USD global bonds outstanding, of which three green bonds and one social bond, of over $14 billion in volume.

**IFC bonds offer value as a US Treasury-plus investment and an alternative to US Agencies.**

**IFC’s strong financial fundamentals**

- IFC has one of the lowest ratios of debt to net worth of any supranational
- IFC’s growth is financed by retained earnings
- Duration of funding matches maturity of IFC’s loan portfolio
- IFC’s equity investments are funded by its net worth, not borrowings

- 0% risk weighting under Basel Framework
