2001 ANNUAL REPORT
Volume 2

Management's Discussion and Analysis,
Financial Statements, and Investment Portfolio

International Finance Corporation

Since its founding in 1956 IFC has committed more than \$31 billion of its own funds and has arranged \$20 billion in syndications for 2,636 companies in 140 developing countries. IFC coordinates its activities with the other institutions in the World Bank Group—the International Bank for Reconstruction and Development, the International Development Association, and the Multilateral Investment Guarantee Agency—but is legally and financially independent. Its 175 member countries provide its share capital and collectively determine its policies.

The IFC Annual Report on the Web: www.ifc.org/ar2001
Enhanced this year for easier navigation and searches for IFC investment and portfolio projects.

Note: The regional reports, project listings, and other information on IFC operations during the 2001 fiscal year appear in Volume 1 of the annual report.

Currency is given in U.S. dollars throughout unless otherwise specified.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

I. OVERVIEW

International Finance Corporation (IFC or the Corporation) is an international organization, established in 1956 to further economic growth in its developing member countries by promoting private sector development. IFC is a member of the World Bank Group, which also includes the International Bank for Reconstruction and Development (IBRD or the World Bank), the International Development Association (IDA), and the Multilateral Investment Guarantee Agency (MIGA). It is a legal entity separate and distinct from the World Bank, IDA, and MIGA, with its own Articles of Agreement, share capital, financial structure, management, and staff. Membership in IFC is open only to member countries of the World Bank. As of June 30, 2001, IFC's entire share capital was held by 175 member countries.

IFC's principal products are loans and equity investments, with a small but growing guarantee portfolio. Unlike most multilateral development institutions, IFC does not accept host government guarantees. IFC raises virtually all of the funds for its lending activities through the issuance of debt obligations in the international capital markets, while maintaining a small borrowing window with the World Bank. Equity investments are funded from net worth. During the year ended June 30, 2001 (FY01), IFC had an authorized borrowing ceiling of \$4.0 billion. Under this authority, IFC was authorized to borrow up to \$200 million (5%) under a facility with the World Bank.

IFC's capital base and its assets and liabilities are primarily in US dollars. The Corporation seeks to minimize market risk (foreign exchange and interest rate risks) by closely matching the currency, rate bases, and maturity of its liabilities in various currencies with assets with the same characteristics. The Corporation controls residual market risk by utilizing currency and interest rate swaps and other derivative instruments.

II. FINANCIAL SUMMARY

BASIS OF PREPARATION OF THE CORPORATION'S FINANCIAL STATEMENTS

The Corporation has traditionally prepared one set of financial statements, complying with both generally accepted accounting principles in the United States (US GAAP) and International Accounting Standards (IAS). However, due to the promulgation of US Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by SFAS No. 138, *Accounting for Certain Derivatives and Certain Hedging Relationships* (collectively SFAS No. 133), it is no longer possible for the Corporation to satisfy the requirements of both US GAAP and IAS via one set of financial statements. Accordingly, as explained in the Corporation's financial statements for the year ended June 30, 2001 (FY01), the accounting and reporting policies conform with US GAAP, and the Corporation has presented in Note T to the FY01 financial statements a balance sheet and income statement conforming with IAS, together with a reconciliation between US GAAP and IAS.

Unless stated otherwise, discussions of financial performance refer to operating income excluding the effects of adopting SFAS No. 133. The effects of SFAS No. 133 on net income are discussed in Section VI.

FINANCIAL PERFORMANCE SUMMARY

From year to year, IFC's operating income is affected by a number of factors, principally the magnitude of provisions for losses against its loans, equity investments, and guarantees; loans in nonaccrual status; and income (dividends and capital gains) generated from its equity portfolio.

Beginning in FY01, the Corporation classified all liquid asset securities as trading securities. As such, unrealized and realized gains and losses on all liquid asset securities are recorded in operating income. Prior to FY01, unrealized gains and losses on liquid asset securities classified as available for sale were excluded from operating income until realized. A significant part of IFC's liquid assets portfolio is invested in fixed-income securities, which are also subject to external market factors that affect the value of such securities, adding variability to operating income.

Beginning in FY01, net income also includes unrealized gains and losses on financial instruments other than from trading activities, pursuant to the implementation of SFAS No. 133.

IFC has been consistently profitable since its inception in 1956, and operating income for FY01 was \$241 million as compared with \$380 million for the year ended June 30, 2000 (FY00), and \$249 million for the year ended June 30, 1999 (FY99).

The Corporation's operating income for the past five fiscal years ending June 30 is presented below:

The table below presents selected financial data for the last five fiscal years (in millions of US dollars, except where otherwise stated):

	As of and for the years ended June 30				
	FY01	FY00	FY99	FY98	FY97
Net income highlights:					
Interest income	1,505	1,328	1,154	1,120	992
Of which:					
Interest and financial fees from loans	715	694	607	583	580
Income from time deposits and securities	790	634	547	537	412
Charges on borrowings	(961)	(812)	(670)	(651)	(536)
Net gains and losses on trading activities	87	(38)	(15)	13	(1)
Income from equity investments	222	262	265	314	344
Of which:					
Capital gains on equity sales	91	132	166	218	196
Dividends and profit participations	131	130	99	96	148
Provision for losses on loans, equity investments, and guarantees	(402)	(215)	(333)	(481)	(266)
Net noninterest expense	(210)	(145)	(152)	(103)	(101)
Operating income	241	380	249	212	432
Other unrealized gains and losses on financial instruments	11	-	-	-	-
Effect of accounting change	93	-	-	34	-
Net income	345	380	249	246	432
Balance sheet highlights:¹					
Total assets	26,170	38,719	33,456	31,621	28,975
Liquid assets, net of associated derivatives	13,258	12,204	10,075	9,434	7,615
Loans and equity investments	10,909	10,940	10,039	8,976	8,423
Reserve against losses on loans and equity investments	(2,213)	(1,973)	(1,825)	(1,522)	(1,076)
Borrowings withdrawn and outstanding	15,457	14,919	12,429	11,162	10,123
Total capital	6,095	5,733	5,344	5,084	4,737
Key financial ratios:²					
Return on average assets ³	0.6%	1.1%	0.8%	0.8%	1.7%
Return on average net worth ⁴	4.1%	6.9%	4.8%	5.0%	9.7%
Cash and liquid investments as a percentage of next three years' estimated net cash requirements	101%	103%	106%	77%	85%
Debt to equity ratio ⁵	2.6:1	2.6:1	2.3:1	2.3:1	2.1:1
Capital adequacy ratio ⁶	48%	48%	48%	49%	48%
Total reserve against losses to total disbursed portfolio ⁷	20.3%	18.0%	18.2%	17.0%	12.8%

1. In respect of loans, borrowings, and derivative assets and liabilities, the balance sheet and related disclosures as of June 30, 2001, are not comparable with the balance sheet and related disclosures as of June 30, 2000, and prior periods due to the effects of implementing SFAS No. 133.

2. Key financial ratios are calculated excluding the effects of SFAS No. 133.

3. Return on average assets is defined as operating income for the fiscal year as a percentage of the average of total assets at the end of such fiscal year and the previous fiscal year.

4. Return on average net worth is defined as operating income for the fiscal year as a percentage of the average of total net worth (excluding payments on account of pending subscriptions) at the end of such fiscal year and the previous fiscal year.

5. Debt to equity ratio is defined as the ratio of outstanding borrowings plus outstanding guarantees to subscribed capital plus retained earnings at the end of the fiscal year.

6. Capital adequacy ratio is defined as the ratio of capital (including paid-in capital, retained earnings, and general loss reserve) to risk-weighted assets, both on- and off-balance sheet.

7. Total reserves against losses to total disbursed portfolio is defined as reserve against losses on loans and equity investments as a percentage of the total disbursed loan and equity portfolio at the end of the fiscal year.

III. CLIENT SERVICES

BUSINESS OVERVIEW

In partnership with private investors, IFC assists in financing the establishment, improvement, and expansion of private sector enterprises by making investments where sufficient private capital is not otherwise available on reasonable terms. IFC seeks to bring together domestic and foreign private capital and experienced management and thereby create conditions conducive to the flow of private capital, domestic and foreign, into productive investments in its developing member countries. In this way, IFC plays a catalytic role in mobilizing additional project funding from other investors and lenders, either through cofinancing or through loan syndications, underwritings, and guarantees. In addition to project finance and resource mobilization, IFC offers financial and technical advisory services to private businesses in developing member countries. It also advises member governments on private sector development matters.

IFC's investments are normally made in its developing member countries. The Articles of Agreement mandate that IFC shall invest in productive private enterprise. The requirement for private ownership does not disqualify enterprises that are partly owned by the public sector, if such enterprises are organized under local commercial and corporate law, operate free of host government control in a market context and according to profitability criteria, and/or are in the process of being totally or partially privatized.

The Corporation's main investment activity is project financing. This encompasses "greenfield" projects, expansions, and modernizations. IFC also provides corporate credits to selected companies to finance ongoing programs of investment projects. In addition, the Corporation facilitates financing through financial intermediaries, covering project and general purpose lending and specialized lending products such as leasing, trade, and mortgage finance. These financial intermediaries function either as IFC's borrower, on-lending to private sector companies at their own risk, or as IFC's agent, identifying companies for direct loans from IFC.

The Corporation applies stringent tests of enterprise soundness, project viability, and developmental impact in determining the eligibility of projects for its investments.

INVESTMENT PROCESS AND PORTFOLIO SUPERVISION

IFC's investment process can be divided into six main stages:

The initial four stages are carried out under the responsibility of the Vice President, Operations, while the fifth and sixth stages are overseen by the Vice President, Portfolio and Risk Management.

The Corporation carefully supervises its projects to monitor project performance and compliance with contractual obligations and with IFC's internal policies and procedures. IFC's Board of Directors is informed of such matters and of recommended courses of action at regular intervals.

INVESTMENT PROGRAM SUMMARY

Investment approvals, commitments, and disbursements for FY01 and FY00

In FY01 IFC approved new investments for its own account, including guarantees and client risk management facilities, totaling \$3.7 billion, representing 240 projects, compared with \$3.5 billion in FY00, representing 259 projects. In addition, IFC approved loan participations (B-loans) arranged to be placed with financial institutions (Participants) for loans approved by the Corporation's Board of Directors totaling \$1.6 billion in 31 projects in FY01, compared with \$2.3 billion in 45 projects in FY00. These comprised the following:

Approvals pending commitment at June 30, 2001, including guarantees and client risk management facilities, were \$3.9 billion (\$4.3 billion at June 30, 2000). During FY01, the Corporation entered into new commitments totaling \$2.7 billion, including \$0.5 billion of signed guarantees, compared with \$2.4 billion for FY00. Loan and equity investment commitments pending disbursement at June 30, 2001, were \$2.6 billion (\$2.6 billion at June 30, 2000). Guarantees and client risk management facilities committed but not utilized at June 30, 2001, were \$0.7 billion (\$0.3 billion at June 30, 2000). IFC disbursed \$1.5 billion in FY01 (\$2.2 billion in FY00). The lower level of disbursements in FY01 is partly attributable to the changing product mix in FY01 from direct investment products such as loans and equity investments to off-balance sheet products such as guarantees. At June 30, 2001, IFC's disbursed and outstanding loans and equity investments for its own account (disbursed investment portfolio) were \$10.9 billion, unchanged from June 30, 2000.

Disbursed investment portfolio

The Corporation's disbursed investment portfolio is widely diversified by sector and geography. The following charts show the distribution of the portfolio as of June 30, 2001, and June 30, 2000:

Distribution of disbursed portfolio by sector

Distribution of disbursed portfolio by region

The portfolio of disbursed and outstanding B-loans (including securitized loans) at June 30, 2001, totaled \$6.6 billion in 250 transactions compared with \$7.3 billion in 269 transactions at June 30, 2000.

Additional information on IFC's investment portfolio as of and for the years ended June 30, 2001, and 2000 can be found in Notes C, D, and E to the Corporation's FY01 financial statements.

INVESTMENT PRODUCTS

Loans

Loans account for the major part of the financing provided by IFC, representing 75% of the Corporation's disbursed investment portfolio as of June 30, 2001, compared with 76% at June 30, 2000.

Loans will generally have the following characteristics:

- *Term*: typically amortizing with final maturities of up to 12 years
- *Currency*: primarily in major convertible currencies, principally US dollar, euro, Swiss franc, and Japanese yen
- *Interest rate*: fixed or variable
- *Pricing*: reflects such factors as market conditions and country and project risks; variable rate loans are generally tied to the 6-month LIBOR index in the relevant currency.

Since FY99, IFC has offered local currency loan products to certain clients, provided the Corporation is able to hedge its local currency exposure through mechanisms such as cross-currency swaps or forward contracts. Fixed-rate loans and loans in other currencies are normally transformed, using currency and/or interest rate swaps, into US dollar variable rate loans.

On June 30, 2001, total loans disbursed and outstanding were \$8.2 billion (\$8.3 billion at June 30, 2000). At June 30, 2001, 91% of the Corporation's loans were US dollar-denominated, unchanged from June 30, 2000. The currency composition of the loan portfolio is shown on the accompanying diagram:

Equity

Equity investments accounted for 25% of the Corporation's disbursed investment portfolio at June 30, 2001, compared with 24% at June 30, 2000. IFC's equity investments are typically in the form of common or preferred stock and are usually denominated in the currency of the country in which the investment is made.

Quasi-equity

In addition to traditional equity investments, the Corporation provides financing through a variety of quasi-equity instruments, which constitute a small but growing portion of its investment portfolio. Quasi-equities include subordinated or convertible loans, asset-backed securities, and certain common or preferred shares with put and/or call features. Depending upon their characteristics, quasi-equities may be classified as either loans or equity investments in the Corporation's balance sheet. At June 30, 2001, the Corporation's disbursed and outstanding quasi-equity portfolio totaled \$1,326 million (\$1,186 million at June 30, 2000), of which \$1,160 million was classified as loans (\$1,060 million at June 30, 2000) and \$166 million (\$126 million at June 30, 2000) was classified as equity investments in the Corporation's balance sheet.

Loan participations (B-loans)

IFC finances only a portion, usually not more than 25%, of the cost of any project. All IFC-financed projects, therefore, require other financial partners. The principal direct means by which the Corporation mobilizes such private sector finance is through the sale of participations in its loans, known as the B-loan program. Through the B-loan program, IFC has cooperated primarily with commercial banks but also with nonbank financial institutions in financing projects since the early 1960s. More than 215 commercial banks and institutional investors currently participate in IFC's B-loan program.

Whenever it syndicates a loan, IFC will always make a loan for its own account (an A-loan), thereby sharing the risk alongside its loan participants. IFC acts as the lender of record and is responsible for the administration of the entire loan, including the B-loan. IFC charges fees to the borrower at prevailing market rates to cover the cost of the syndication of the B-loan. Since it began its loan syndication program, IFC has placed participations totaling \$19.8 billion.

Client risk management services

IFC provides clients access to asset and liability management tools such as currency swaps and interest rate swaps, caps, and floors by acting as an intermediary between clients and market counterparties. IFC also provides risk-sharing structures and guarantees that allow its clients to transact directly with market counterparties. The Corporation requires that all transactions are for hedging purposes only.

Guarantees and partial risk guarantees

Guarantees represent a growing product line for the Corporation. Beginning in FY01, the Corporation began offering partial risk guarantees to clients covering, on a risk-sharing basis, client obligations on bonds and/or loans. The Corporation's guarantee is available for debt instruments and trade obligations of clients and covers commercial as well as noncommercial risks. IFC will provide local currency guarantees but generally only if the Corporation is able to fund its commitment in local currency terms, for example, by hedging its exposure in the swap market. Guarantee fees are charged consistent with IFC's loan pricing policies. During FY01, the Corporation signed \$0.5 billion of guarantees, as compared with less than \$0.1 billion in FY00.

Underwritings and investment banking services

IFC provides underwriting and placement services for equity, quasi-equity, and/or debt securities issues of private sector companies in IFC's developing member countries. It also structures and underwrites country funds and pooled investment vehicles such as private investment funds. IFC is often a core investor in the enterprises it underwrites. Services are priced in conformity with market standards and practices, in consultation with international securities firms and financial intermediaries. Underwriting and other capital markets services requiring a financial commitment from IFC are subject to the same investment criteria and limits applicable to its loans and equity investments.

The Corporation does not conduct any placement activities within the United States or directed at US investors in connection with securities offerings of private sector companies or pooled investment vehicles.

Advisory activities

The Corporation, on its own or through a department jointly managed with the World Bank, provides three general types of advisory services to member countries as well as to individual enterprises:

- Special advisory services on project structuring and financial packaging
- Financial advisory services provided to member governments or to private sector clients
- Policy advice to governments on capital markets development and private sector development, including privatization and foreign investment.

The Corporation also assists governments with developing the legal framework for privatizing their state-owned sectors, as well as with the sale of individual enterprises. Fees are charged for advisory services consistent with market rates charged for comparable services. IFC charged fees amounting to \$41 million for FY01 (\$49 million for FY00 and \$33 million for FY99).

Specially targeted assistance

IFC has established a number of vehicles through which it provides specially targeted assistance to areas highly in need of development. In FY01, the Corporation contributed \$16 million to such vehicles, compared with \$7 million in FY00 and \$3 million in FY99. In FY01, such vehicles included:

- The World Bank Group's Global SME Capacity Building Facility, launched in September 2000 to act as a special window to encourage new models for small and medium enterprise support throughout the developing world
- The Frontier Privatization Fund, aimed at providing advisory funding support to resolve privatization issues and related transactional constraints in frontier markets worldwide.

The Corporation continues to fund its Technical Assistance Trust Funds to provide resources through which it cofinances technical assistance funding supported by donor agencies and finances stand-alone technical assistance where donor funding cannot be arranged.

IV. TREASURY SERVICES

LIQUID ASSETS

IFC invests its surplus liquidity in highly rated fixed and floating rate instruments issued or unconditionally guaranteed by governments, government agencies and instrumentalities, multilateral organizations, and AAA-rated corporate issuers, including mortgage- and asset-backed securities, and in time deposits and other unconditional obligations of banks and financial institutions.

The Corporation manages the market risk associated with these investments through a variety of hedging techniques including derivatives, principally, currency and interest rate swaps and financial futures.

IFC's liquid assets are invested in four separate portfolios.

Portfolio	Market Value*	Comprising	Managed by	Invested in	Benchmark
P0	\$0.5bn (—)	Funds awaiting disbursement or reinvestment	IFC's Treasury Department	Short-term deposits	US overnight Fed funds
P1	\$9.5bn (\$8.8bn)	Proceeds from market borrowings	IFC's Treasury Department	Primarily bonds and mortgage- or asset-backed securities, swapped into 6-month US dollar LIBOR	Since January 2001, adjusted 3-month US dollar LIBID. Prior to January 2001, 6-month US dollar LIBOR
P2	\$2.5bn (\$2.6bn)	Primarily the Corporation's paid-in capital and accumulated earnings that have not been invested in equity and quasi-equity investments or fixed-rate loans	IFC's Treasury Department	US Treasuries and other sovereign and agency issues	3-year duration US Treasuries**
P3	\$0.8bn (\$0.8bn)	Proceeds from market borrowings	External managers appointed by IFC	Global government bonds and mortgage-backed securities	Since January 2001, adjusted 3-month US dollar LIBID. Prior to January 2001, 6-month US dollar LIBOR
Total	\$13.3bn (\$12.2bn)				

* at June 30, 2001 (June 30, 2000)

** duration of P2 portfolio plus fixed-rate loans

The P3 portfolio is not permitted to exceed 12% of the total value of liquid assets at any time.

The P1 and P2 portfolios were accounted for as available for sale portfolios through June 30, 2000. Effective July 1, 2000, these portfolios were redesignated as trading portfolios to more closely reflect the management style of the portfolios as discussed in Note A to the Corporation's financial statements for the year ended June 30, 2001. The P0 and P3 portfolios are also accounted for as trading portfolios.

All liquid assets are managed according to an investment authority approved by IFC's Board of Directors and investment guidelines approved by IFC's Finance and Risk Committee, a subcommittee of the Management Group.

CAPITALIZATION

The Corporation's capitalization as of June 30, 2001, and June 30, 2000 is as follows:

Borrowings

The major source of IFC's borrowings is the international capital markets. Under the Articles of Agreement, the Corporation may borrow in the public markets of a member country only with approvals from that member and also the member in whose currency the borrowing is denominated. The Corporation borrowed \$3.6 billion during FY01 (\$4.4 billion in FY00 and \$4.5 billion in FY99). In addition, IFC's Board of Directors has authorized the repurchase and redemption of, and tender for, debt obligations issued by the Corporation. During FY01, the Corporation repurchased and retired \$134 million of outstanding debt (\$200 million in FY00).

IFC diversifies its borrowings by currency, country, source, and maturity to provide flexibility and cost-effectiveness. Outstanding market borrowings have remaining maturities ranging from less than one year to almost 30 years with a weighted average life of 7.2 years at June 30, 2001 (6.7 years at June 30, 2000).

Market borrowings are generally swapped into floating-rate obligations denominated in US dollars. As of June 30, 2001, the Corporation had gross payables from borrowing-related currency swaps of \$10.6 billion (\$11.0 billion at June 30, 2000) and from borrowing-related interest rate swaps in the notional principal amount of \$6.3 billion (\$5.1 billion at June 30, 2000). After considering the effect of these derivative instruments all of the Corporation's market borrowings at June 30, 2001, and June 30, 2000 were US dollar-denominated.

The weighted average cost of market borrowings after currency and interest rate swap transactions was 4.3% at June 30, 2001, compared with 6.3% at June 30, 2000.

Capital and retained earnings

As of June 30, 2001, IFC's net worth (presented as Total Capital in the Corporation's balance sheet) amounted to \$6.1 billion, up from the June 30, 2000, level of \$5.7 billion.

As of June 30, 2001, and 2000, IFC's authorized capital was \$2.45 billion, of which \$2.37 billion was subscribed at June 30, 2001, unchanged from June 30, 2000. Over 99% of this was paid in (\$2.36 billion at June 30, 2001, and June 30, 2000). The subscription period for the share allocations made under the 1992 capital increases (as described in Note I to the Corporation's FY01 financial statements) closed on August 1, 1999. The Corporation agreed, however, to defer the payment dates for certain member countries until August 1, 2001. Pursuant to these arrangements, \$14 million of subscribed shares remained unpaid at June 30, 2001, unchanged from June 30, 2000.

V. RISK MANAGEMENT AND FINANCIAL POLICIES

RISK IN IFC'S BUSINESS

IFC assumes various kinds of risks in its private sector development business. The Corporation's operations and activities are principally subject to commercial or project risk, credit risk, market risk, liquidity risk, and operational risk. Active management of these risks is an essential part of the Corporation's operations and a key determinant of its ability to maintain a stable capital and earnings base. To this end, it has adopted several key financial policies and a number of prudential policies.

KEY FINANCIAL POLICIES

IFC currently operates under the following key financial policies which have been approved by its Board of Directors:

1. **Disbursed equity** plus quasi-equity investments (net of loss reserves) may not exceed 100% of net worth.
2. **Disbursed equity investments** (net of loss reserves) may not exceed 50% of IFC's net worth.
3. **Minimum liquidity** (including liquid assets and undrawn borrowing commitments from the World Bank) must be sufficient at all times to cover at least 65% of IFC's estimated net cash requirements for the next three years.
4. The currency, rate basis, and maturity of loan assets must be **closely matched** to borrowings.
5. **Capital** (including paid-in capital, retained earnings, and general loss reserve) must equal at least 30% of risk-weighted assets.

In addition, under IFC's Articles of Agreement, as long as IFC has outstanding borrowings from the World Bank, IFC's **leverage**, as measured by the ratio of IFC's debt (borrowings plus outstanding guarantees) to IFC's equity (subscribed capital plus retained earnings), may not exceed 4.0 to 1.

MANAGING COMMERCIAL (PROJECT) RISK

IFC is prohibited from accepting host government guarantees of repayment on its investments and therefore incurs the commercial risk of its investments. In addition to the key financial policies specified above, the Corporation's investments are subject to a number of operational or prudential limits, including limitations on single project exposure, single country exposure, and segment concentration. Thus:

1. IFC does not normally finance for its own account more than 25% of a project's cost.
2. An equity investment in a company does not normally represent more than 35% of the company's total share capital, provided further that IFC is not the single largest shareholder.
3. An investment in a single project or entity may not exceed 3% of IFC's total investment portfolio.
4. Equity and quasi-equity investments in a single project or entity may not exceed 3% of the Corporation's net worth plus general reserves.
5. Total investments in a single country will not normally represent more than 12% of IFC's total investment portfolio or 25% of its net worth, whichever is lower.
6. The Corporation's total exposure to a single risk sector may not exceed 8% of the total investment portfolio.

The quality of IFC's investment portfolio is monitored according to established supervision procedures. The portfolio management units of individual investment departments are responsible for the day-to-day monitoring and management of commercial risk associated with projects originated by the departments, including monitoring and evaluating credit quality of the borrowers.

Managing credit risk: loss reserves policy

Credit risk refers to the potential for a borrower, or a counterparty to a transaction with IFC, to default on its financial obligations to the Corporation. IFC's Credit Review Department analyzes information obtained from the investment departments and provides an independent review of the credit risk of IFC's borrowers.

IFC maintains its loss reserves and revenue recognition policies in accordance with US GAAP. IFC does not recognize income on loans where collectibility is in doubt or payments of interest or principal are past due more than 60 days unless management anticipates that collection of interest is expected in the near future.

IFC's loss reserves policy reflects management's judgment in accordance with the following guidelines. In the case of specific loss reserves, IFC considers a loan as impaired when, based on current information and events, it is probable that it will be unable to collect all amounts due according to the loan's contractual terms. The reserve against losses for impaired loans represents management's judgment of the present value of expected future cash flows discounted at the loan's effective interest rate. IFC establishes a reserve against losses for equity investments when a decrease in value of the investment has occurred, below its US dollar equivalent cost, which is considered other than temporary. In addition to the reserve on specific investments, the reserve against losses includes an estimate of probable losses on loans and equity investments inherent in the portfolio but not specifically identifiable. The reserve against losses is maintained through annual charges to income in the form of a provision for losses. Investments written off, as well as any subsequent recoveries, are recorded through the reserve.

Management determines the total loss reserves by judgment taking into account internal guidelines and its assessment of recent portfolio quality trends and near-term outlook. The guidelines help management in decision making; however, these guidelines cannot replace management's judgment. The guidelines focus on the total loss reserve requirement (specific plus general loss reserves) inherent in the portfolio based on information available at the time of the review. The guidelines reference portfolio impairment based on simulation techniques, portfolio impairment based on country risk, and portfolio impairment based on long-term historical portfolio experience. After determination by management of the adequate level of total loss reserves using the aforementioned techniques, and an extensive investment-by-investment review of specific impairment, the general loss reserve is calculated as the difference between the total loss reserves and the total specific loss reserves.

The amount of nonaccruing loans as a percentage of the disbursed loan portfolio, a key indicator of portfolio performance, deteriorated to 12.9% at June 30, 2001, compared with 11.1% at June 30, 2000. The principal amount outstanding on nonaccruing loans totaled \$1,054 million at June 30, 2001, an increase of 14% from the June 30, 2000, level of \$922 million.

The quality of IFC's investment portfolio deteriorated in FY01, as measured by the average weighted risk class of the portfolio. Furthermore, the impairment probabilities and severity level probabilities increased, as did the country risk ratings of a significant number of countries and the Corporation's exposure in a number of higher-risk countries. As a result, total reserves against losses on loans and equity investments at June 30, 2001, increased to \$2,213 million (\$1,973 million at June 30, 2000). This is equivalent to 20.3% of the disbursed portfolio, up from 18.0% at the end of FY00 and higher than the historical high of 18.2% reached at the end of FY99.

The five-year trend of loss reserves is presented below:

Given that IFC has had very limited history with guarantees, IFC is working under the assumption that the guarantee portfolio is exposed to the same idiosyncratic and systematic risks as IFC's loan portfolio, and the inherent, probable losses in the guarantee portfolio need to be covered by an allowance for loss. Beginning in FY01, the Corporation has established such an allowance totaling \$13.0 million based on the year-end portfolio which is included in payables and other liabilities on the balance sheet.

MANAGING LIQUIDITY RISK

The Corporation's Liquidity Policy, as approved by its Board of Directors, requires the maintenance at all times of sufficient liquidity (including liquid assets and undrawn borrowing commitments from the World Bank) to cover at least 65% of its estimated net cash requirements for the next three years. As a prudential measure, the Corporation maintains an operating liquidity target of not less than 70% of three years' net cash requirements, including projected disbursement and debt service requirements. At June 30, 2001, the Corporation's liquidity level stood at \$13.3 billion, or 101% of its projected net cash requirements for three years (\$12.2 billion, and 103% at June 30, 2000).

MANAGING MARKET RISK

Market risk refers to changes in values of financial instruments or positions due to movements in interest or exchange rates, or to liquidity factors. IFC manages market risk by adopting a matched-funding policy and by using a variety of derivative instruments to convert assets and liabilities into 6-month floating US dollar assets and liabilities as detailed below. Implementation of the matched-funding policy is a two-step process: funds are earmarked at Board approval stage and matched, with respect to interest rate and currency, at disbursement. This policy limits the Corporation's exposure to unmatched interest rate and exchange risks.

Liquid asset investment activities

As noted above, the P1 and P3 portfolios have been generally invested, directly or synthetically, in floating-rate US dollar instruments. This reflects the Corporation's matched-funding policy, which requires that all loans be funded with liabilities bearing similar interest rate and currency characteristics, and the fact that its loans are predominantly denominated in floating-rate US dollars.

Beginning in FY01, the Corporation began to manage interest rate risk in the P1 portfolio on a portfolio basis by investing in fixed- or floating-rate instruments against a standard benchmark within specified risk parameters.

The P2 portfolio is invested in fixed-rate US dollar-denominated instruments. Unlike the P1 portfolio, which accepts mostly credit risk, the P2 portfolio incurs mainly market risk, with additional flexibility to deviate from its duration benchmark. The P0 portfolio is generally invested in short-dated deposits reflecting its use for short-term funding requirements.

IFC uses a variety of derivative instruments in its liquid asset management activities to manage the interest rate, currency, and other market risks associated with certain of its liquid asset portfolios consistent with the Corporation's matched-funding policy. The derivative instruments used include short-term, over-the-counter foreign exchange forwards (covered forwards), interest rate and currency swaps, and exchange-traded interest rate futures and options.

Borrowing activities

The Corporation issues debt securities in various capital markets in a variety of currencies, sometimes using complex structures. These structures include borrowings payable in multiple currencies, or borrowings with principal and/or interest determined by reference to a specified index such as a stock market index, a reference interest rate, a commodity index, or one or more foreign exchange rates. Market risk associated with fixed-rate obligations and structured instruments is mitigated by using derivative instruments to convert them into variable-rate US dollar obligations, consistent with the Corporation's matched-funding policy.

Lending activities

Currency and interest rate swaps are used in connection with the Corporation's lending activities to minimize the level of interest rate and currency exchange risk in fixed- or floating-rate non-US dollar or fixed rate US dollar lending.

Client risk management activities

The Corporation offers risk management products to its clients and seeks to minimize its exposure to market risk resulting from derivative asset and liability management transactions with clients by entering into offsetting positions with highly rated market counterparties.

Asset and liability management activities

While IFC's matched-funding policy provides a significant level of protection against currency and interest rate risk, the Corporation can be exposed to residual market risk in its overall asset and liability management, which is monitored by the Asset-Liability Management group within the Corporation's Treasury Department.

The Corporation may be exposed to residual currency risk due to events such as changes in the level of non-US dollar loan loss reserves which it manages by monitoring the aggregate position in each lending currency and hedging the exposure when the net asset or liability position exceeds \$5 million equivalent (\$1 million at June 30, 2000) through spot sales or purchases.

IFC also faces residual interest rate risk from two sources:

- Assets that are fully match-funded at inception can become mismatched over time due to writedowns, prepayments, or rescheduling.
- LIBOR reset dates on assets can differ from those on liabilities (this risk, however, is limited by synchronizing reset dates on assets and liabilities at a portfolio level).

This residual interest rate risk is managed by measuring the sensitivity of the present value of assets and liabilities in each currency to each basis point change in interest rates, with a review trigger of \$50,000 on this measure.

MANAGING CREDIT RISK

Loans and equity investments

The risk of borrower default in connection with the Corporation's loans and equity investments is discussed above, under Managing Commercial (Project) Risk.

Treasury counterparty credit risk

Counterparty credit risk is the principal residual risk to the Corporation arising from its liquid assets and borrowing activities. IFC's credit policies set conservative eligibility criteria for counterparties and diversification caps on exposure to individual counterparties. IFC currently restricts counterparty eligibility to banks and financial institutions with a minimum credit rating of A by leading international credit rating agencies. In order to limit exposure to counterparties, IFC signs collateral agreements with counterparties that require the posting of collateral when net exposure exceeds certain predetermined thresholds, which decrease as a counterparty's credit rating deteriorates. Because counterparties can be downgraded during the life of a transaction, the agreements provide an option for IFC to terminate all swaps if the counterparty is downgraded below investment grade.

Limits are also imposed on the volume of over-the-counter derivative transactions with individual counterparties. IFC measures derivatives exposure to counterparties in terms of "worst case" potential exposure based on simulations of market variables which are updated monthly to reflect market movements.

These restrictions and limits are revised annually at the beginning of each fiscal year and approved by IFC's Finance and Risk Committee. During the year, institution-specific limits are updated monthly based on changes in counterparty size or credit status. For exchange-traded instruments, IFC limits credit risk by restricting transactions to a list of authorized exchanges, contracts, and dealers, and by placing limits on the Corporation's open interest rate position in each contract.

Credit risks arising in connection with IFC's treasury activities are monitored and controlled in accordance with credit risk guidelines established by the Corporation's Risk Management Group.

Client risk management activities

The Corporation minimizes its credit risk exposure to clients with which it transacts derivative asset and liability management business by conducting credit appraisals of the clients.

MANAGING OPERATIONAL RISK

Operational risk is concerned with the risk to an organization's performance due to how it is *operated* as opposed to how it is *financed*.¹ IFC has extended this definition of operational risk to be the potential for losses arising from internal activities or external events caused by breakdowns in information systems, communications, physical safeguards, business continuity, supervision, transaction processing, and the execution of legal, fiduciary, and agency responsibilities.

Like all financial institutions, IFC is exposed to many types of operational risks. It seeks to mitigate such risks by maintaining a comprehensive system of internal controls that is designed not only to identify the parameters of various risks but also to monitor and control those areas of particular concern. The Corporation has adopted the COSO² control framework and a control self-assessment methodology to evaluate the effectiveness of its internal controls, and it has an ongoing program in place to cover all significant business operations. In each of the last six fiscal years, IFC has obtained an attestation report from its external auditors on its assertion that as of June 30 of each of the fiscal years, its system of internal control over external financial reporting met the criteria for effective internal control described in COSO and that the Corporation's assertion is fairly stated in all material respects.

During FY01 several ongoing initiatives emphasized the area of operational risk management, including those described below:

1. IFC has established an Operational Risk Management (ORM) Sounding Board, and identified a framework for the prioritized review of key ORM components as part of IFC's implementation of the COSO methodology in FY01.
2. IFC launched its first online version of IFC's Operating Policies, Practices, and Guiding Principles integrated with a revised version of IFC's Operational Procedures so that staff can consult the latest comprehensive version easily.
3. IFC is using the COBIT³ methodology to supplement the COSO review of the information technology function—deemed a high-priority operational risk by the ORM Sounding Board.
4. IFC is reducing its dependence upon isolated information repositories by virtue of the design, development, and implementation of the Information Pyramid set of system streams, with the underlying objective of minimum redundant data and a single corporate repository of operational and financial data that is consistent, comprehensive, and timely. This is supplemented by a Data Stabilization initiative and other data integrity efforts.
5. IFC and other international financial institutions have established an Investments Impediments Database which is now available to all staff at IFC for use to help identify potential project risks.
6. IFC's Environmental and Social Risk Rating framework in the Project Supervision Report (PSR) and Credit Risk Rating provides an indication of the current level of environmental and social risk associated with a portfolio project. The PSR now has an automatic link to the Legal Agreements Database managed by the Legal Department.
7. Independent reviews of the financial, administrative, and organizational structure of several IFC project development facilities have resulted in improved controls, information flows, and donor reporting.
8. Monthly closing procedures have been formalized across departmental lines to minimize information flow breaks and ensure timeliness of financial reporting, with ex post exception reviews conducted as a further control.
9. The enterprisewide system has been strengthened for IFC through system enhancements, upgrading staff skills through training, and stricter recruitment criteria. This has led to improved control over financial accounting and administrative expense processing including budget, expense, travel, procurement, and leave and absence attendance administration.
10. Streamlined equity sale procedures have been formulated by the Portfolio Management Department and will be implemented in early FY02 by the central Equity Management Desk.

¹ Operational Risk: Measurement and Modeling, Jack L. King, John Wiley & Sons, LTD., 2001.

² COSO refers to the *Internal Control-Integrated Framework* formulated by the Committee of Sponsoring Organizations of the Treadway Commission, which was convened by the US Congress in response to the well-publicized irregularities that occurred in the financial sector during the late 1980s.

³ COBIT refers to Control Objectives for Information and Related Technology, first released in 1996, updated to the third edition released in July 2000, sponsored by the Information Systems Audit and Control Association (ISACA).

ECONOMIC AND MONETARY UNION IN EUROPE

Since January 1, 1999, in the normal course of business as a multicurrency organization, IFC has been conducting euro-denominated transactions in paying and receiving, liquid asset investments, and debt issuance and in its loan and equity investment portfolio activities. IFC adopted a gradual approach to redenominating national currency balance sheet items to the euro during the transition period and expects to complete the redenomination by December 31, 2001. The incremental cost of euro conversion is immaterial to the Corporation's financial statements and has been included in the Corporation's administrative expenses.

VI. RESULTS OF OPERATIONS

OVERVIEW

The main elements of IFC's net income, and influences on the level and variability of operating and net income from year-to-year, are:

Elements	Significant influences
Operating income:	
Spread on interest-earning assets	Nonaccruals and the interest collection rate on loan interest income
Trading gains (losses)	Realized and unrealized gains and losses on the liquid asset portfolios
Income from the equity investment portfolio	Performance of the equity portfolio (dividends and capital gains)
Provisions for losses on loans, equity investments, and guarantees	Level of provisions for losses on loans and equity investments and, beginning in FY01, on guarantees
Noninterest income and expense	Level of technical assistance and advisory services provided by the Corporation to its clients, the level of income from the staff retirement and other benefits plans, and the approved administrative and other budgets
Net income:	
Other unrealized gains and losses on financial instruments	Principally, differences between changes in fair value of derivative instruments and changes in fair value of hedged items in fair value hedging relationships

In addition, the Corporation's FY01 net income reflects the one-time impact of adopting SFAS No. 133.

The following paragraphs detail significant variances between FY01 and FY00, and FY00 and FY99, covering the periods included in the Corporation's FY01 financial statements.

FY01 VERSUS FY00

Operating income

The Corporation's operating income for FY01 was \$241 million, substantially lower than FY00's operating income of \$380 million. FY01 operating income, unlike prior years, reflects unrealized gains and losses on the P1 and P2 liquid asset portfolios due to the change in classification of these portfolios from available for sale to trading on July 1, 2000. The decline was mainly attributable to significant provisions for losses on loans, equity investments, and guarantees, reflecting the downturn in portfolio quality in FY01. In addition, due to the tough economic conditions in the markets in which IFC operates, realized capital gains were significantly lower in FY01 than in FY00. Offsetting these negative factors were strong realized and unrealized gains on the Corporation's liquid asset trading activities, which benefited considerably from the recent declining interest rate environment.

Net interest income

IFC's primary interest-earning assets are its loan portfolio and its liquid assets portfolios. After charges on borrowings are taken into account, net interest income improved by \$28 million or 5% from \$516 million in FY00 to \$544 million in FY01.

Interest and financial fees for FY01 were \$715 million, compared with \$694 million for FY00, an increase of 3%. The disbursed and outstanding loan portfolio declined marginally by 1%, and the Corporation's interest collection rate was lower in FY01 than in FY00. Loans in nonaccrual status grew from \$922 million at June 30, 2000, to \$1,054 million at June 30, 2001, an increase of 14%.

Interest income from time deposits and securities for FY01 was \$790 million, \$156 million higher than the \$634 million recorded in FY00. The liquid assets portfolio, net of derivatives and securities lending activities, grew from \$12.2 billion at June 30, 2000, to \$13.3 billion, largely funded by the growth in the Corporation's borrowings program and the slower pace of loan and equity disbursements experienced in FY01. The \$1.1 billion growth in the portfolio offset the negative effect of the declining interest rate environment experienced throughout much of FY01 on interest income from time deposits and securities.

The Corporation's charges on borrowings grew by \$149 million during FY01 from \$812 million to \$961 million, largely reflecting the growth of the borrowings portfolio, offset by the effect of the declining interest rate environment. After the effect of associated derivative financial instruments, the borrowings portfolio grew by \$0.8 billion in FY01, from \$15.8 billion at June 30, 2000, to \$16.6 billion at June 30, 2001.

As previously noted, up to and including FY00, unrealized gains and losses on the Corporation's P1 and P2 liquid assets portfolios were excluded from net income until realized. Effective July 1, 2000, the Corporation reclassified these portfolios from available for sale to trading, and now the Corporation reflects unrealized gains and losses on these portfolios in net income.

Due to the declining interest rate environment in FY01, and the favorable impact of this on the carrying value of the Corporation's fixed-income liquid asset investments, the Corporation recorded net unrealized gains on its liquid asset portfolios of \$87 million.

Income from equity investments

Overall income from the equity investment portfolio declined by \$40 million, or 15%, from \$262 million in FY00 to \$222 million in FY01.

The Corporation generated capital gains for FY01 of \$91 million as compared with \$132 million for FY00, a decline of 31%. Dividend income, however, was substantially unchanged at \$131 million for FY01 as compared with \$130 million for FY00. Consistent with FY00, the stable performance in dividend income in FY01 was largely attributable to the continuing high level of oil prices during much of FY01, which significantly improved returns on the Corporation's joint ventures in oil, gas, and mining.

Provisions for losses on loans, equity investments, and guarantees

The income charge for provisions for losses of \$402 million in FY01, which included \$13 million in respect of guarantees, was significantly higher than the charge in FY00 of \$215 million, a growth of \$187 million or 87%. On June 30, 2001, the Corporation's total reserves against losses on loans and equity investments were 20.3% of the disbursed and outstanding portfolio (18.0% at June 30, 2000).

Noninterest income

Noninterest income of \$121 million for FY01 was \$6 million lower than in FY00 (\$127 million), principally due to the sale of assets, including assets associated with the Corporation's information provision business in FY00 that did not recur in FY01. Service fees were also lower at \$41 million for FY01 as compared with \$49 million for FY00.

Offsetting these negative factors was an increase in net periodic pension income from the Staff Retirement Plan and from the change in the Corporation's share of net assets held for postretirement benefits, from \$47 million in FY00 to \$52 million in FY01.

Noninterest expense

Administrative expenses (the principal component of noninterest expense) rose 16% from \$267 million in FY00 to \$309 million in FY01. This increase was in line with budget funding of the anticipated growth in the investment portfolio and the continuing move into smaller investments in frontier countries within IFC's portfolio.

Net income and the impact of new accounting standards

As more fully disclosed in Notes A, L, and M to the Corporation's FY01 financial statements, the Corporation changed its method of accounting for derivative instruments to conform with SFAS No. 133. Pursuant to SFAS No. 133, the Corporation has designated certain hedging relationships in its borrowing activities and its lending activities as fair value hedges. The Corporation generally matches the terms of its derivatives with the terms of the specific underlying financial instruments hedged, in terms of currencies, maturity dates, reset dates, interest rates, and other features. However, differing valuation methodologies are applied to the derivative and the hedged financial instrument, as prescribed by SFAS No. 133. The resulting ineffectiveness calculated for such relationships is recorded in other unrealized gains on financial instruments in net income.

The effects of SFAS No. 133 on net income for the year ended June 30, 2001, can be summarized as follows (US\$ millions):

Operating income	241
SFAS No. 133 adjustments:	
Other unrealized gains on financial instruments	11
Cumulative effect of change in accounting principle	93
Net income	345

The cumulative effect of the change in accounting principle (the transition adjustment) comprises the difference between the previous balance sheet carrying value and the fair value of all freestanding derivatives together with the offsetting gains and losses on assets and liabilities held under hedging relationships in existence prior to the adoption of SFAS No. 133.

Other unrealized gains and losses on financial instruments largely comprise the difference between the change in fair value of derivative instruments and the change in fair value of the hedged item under designated hedging relationships.

FY00 VERSUS FY99

Net income

The Corporation's net income for FY00 was \$380 million, substantially higher than FY99's net income of \$249 million. Several components of net income varied significantly in FY00 as compared with FY99 although the majority of the improved performance was a result of a more stable investment portfolio quality, which resulted in lower provisions for losses in FY00 (\$215 million) compared with FY99 (\$333 million).

Net interest income

IFC's primary interest-earning assets are its loan portfolio and its liquid assets portfolios. After charges on borrowings are taken into account, net interest income improved by \$32 million or 7% from \$484 million in FY99 to \$516 million in FY00.

Interest and financial fees for FY00 were \$694 million, compared with \$607 million for FY99, an increase of 14%. The disbursed and outstanding loan portfolio grew by 7%, the Corporation's interest collection rate was marginally higher in FY00 than in FY99, and the interest rate environment in general was higher during FY00 than in FY99. Offsetting these positive effects on interest and financial fees, loans in nonaccrual status grew from \$857 million at June 30, 1999, to \$922 million at June 30, 2000, an increase of 8%.

Interest income from time deposits and securities for FY00 was \$634 million, \$87 million higher than the \$547 million recorded in FY99. The liquid assets portfolios, net of derivatives and securities lending activities, grew from \$10.1 billion to \$12.2 billion largely funded by the growth in the Corporation's borrowings program.

The \$2.1 billion growth in the liquid assets portfolios, combined with the overall higher interest rate environment, resulted in an \$86 million increase in interest income in the P1 and P2 portfolios (classified as available for sale). As part of its management of the P2 portfolio, IFC periodically buys newer issue US Treasury bonds funded through the sale of older, less liquid securities. Due to the rising interest rate environment in FY00 and FY99, losses were realized on sales of securities in the P1 and P2 portfolios undertaken in both years. In FY00, such realized losses on the P1 and P2 portfolios were \$42 million compared with \$22 million in FY99. Income on the P3 portfolio (classified as trading) declined by \$2 million in FY00. The decline was attributable to the heavy volatility of bond markets, the flattening of the US yield curve, and the consequent widening of swap spreads, which particularly hit IFC's portfolio of asset-backed securities.

The Corporation's charges on borrowings rose by \$142 million during FY00 from \$670 million to \$812 million reflecting the growth of the borrowings portfolio and the rising interest rate environment. After the effect of associated derivative financial instruments, the borrowings portfolio grew by \$2.6 billion in FY00 from \$13.2 billion at June 30, 1999, to \$15.8 billion.

Income from equity investments

Overall income from the equity investment portfolio declined marginally by \$3 million, or 1%, from \$265 million in FY99 to \$262 million in FY00.

The Corporation generated capital gains for FY00 of \$132 million as compared with \$166 million for FY99, a decline of 20%. During the early part of FY98, IFC was able to liquidate a number of individual equity investment holdings to realize capital gains due to a relatively strong environment in the emerging markets. Subsequent to various crises in late FY98 and early FY99, this trend did not continue and led to the decline in realized capital gains in FY99 and into FY00.

Dividend income, however, rose to \$130 million for FY00 as compared with \$99 million for FY99. The growth in dividend income was largely attributable to the growth in oil prices during FY00, which significantly improved returns on the Corporation's joint ventures in oil, gas, and mining.

Provisions for losses on investments

The income charge for provisions for losses of \$215 million in FY00 was significantly lower than the charge in FY99 of \$333 million, a decline of \$118 million or 35%. On June 30, 2000, the Corporation's total reserves against losses on loans and equity investments were 18.0% of the disbursed and outstanding portfolio (18.2% at June 30, 1999). Provisions were lower in FY00 because impairment was less severe than in FY99, reflecting a more stable portfolio quality.

Noninterest income

Noninterest income of \$127 million for FY00 was \$17 million higher than FY99 (\$110 million), principally due to the sale of assets, including assets associated with the Corporation's information provision business. Service fees were also higher at \$49 million for FY00 as compared with \$33 million for FY99.

Offsetting these factors was a decrease in net periodic pension income from the Staff Retirement Plan and from the change in the Corporation's share of net assets held for postretirement benefits, from \$64 million in FY99 to \$47 million in FY00.

Noninterest expense

Administrative expenses (the principal component of noninterest expense) rose 3% from \$258 million in FY99 to \$267 million in FY00. This increase was in line with budget funding of the anticipated growth in the investment portfolio and the continuing move into smaller investments in frontier countries within IFC's portfolio.

President and Board of Governors
International Finance Corporation

We have audited the accompanying balance sheets of the International Finance Corporation, as of June 30, 2001 and 2000, including the statements of capital stock and voting power, as of June 30, 2001, and the related statements of income, comprehensive income, changes in capital and cash flows for each of the three fiscal years in the period ended June 30, 2001. These financial statements are the responsibility of the International Finance Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the International Finance Corporation as of June 30, 2001 and 2000, and the results of its operations and its cash flows for each of the three fiscal years in the period ended June 30, 2001 in conformity with accounting principles generally accepted in the United States of America and also as of June 30, 2000 and for each of the two fiscal years in the period ended June 30, 2000 in conformity with International Accounting Standards.

As discussed in Notes A, L and M to the financial statements, the International Finance Corporation changed its method of accounting for derivative instruments to conform with Statement of Accounting Standards (SFAS) No. 133 *Accounting for Derivative Instruments and Hedging Activities*, as amended by SFAS No. 137, *Accounting for Derivative Instruments and Hedging Activities – Deferral of the Effective Date of FASB Statement No. 133*, and SFAS No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities*.

Accounting principles generally accepted in the United States vary in certain significant respects from International Accounting Standards. The application of the latter would have affected the determination of net income for the fiscal year ended June 30, 2001 and the determination of the total assets and capital at June 30, 2001 to the extent summarized in Note T.

NOTES TO FINANCIAL STATEMENTS

Purpose

The International Finance Corporation (the Corporation), an international organization, was established in 1956 to further economic development in its member countries by encouraging the growth of private enterprise. The Corporation is a member of the World Bank Group, which also includes the International Bank for Reconstruction and Development (IBRD), the International Development Association, and the Multilateral Investment Guarantee Agency (MIGA). The Corporation's activities are closely coordinated with and complement the overall development objectives of the other World Bank Group institutions. The Corporation, together with private investors, assists in financing the establishment, improvement and expansion of private sector enterprises by making loans and equity investments where sufficient private capital is not otherwise available on reasonable terms. The Corporation's share capital is provided by its member countries. It raises most of the funds for its investment activities through the issuance of notes, bonds and other debt securities in the international capital markets. The Corporation also plays a catalytic role in mobilizing additional project funding from other investors and lenders, either through cofinancing or through loan syndications, underwritings and guarantees. In addition to project finance and resource mobilization, the Corporation offers an array of financial and technical advisory services to private businesses in the developing world to increase their chances of success. It also advises governments on how to create an environment hospitable to the growth of private enterprise and foreign investment.

Note A—Summary of significant accounting and related policies

The accounting and reporting policies of the Corporation conform with generally accepted accounting principles in the United States (US GAAP).

The Corporation has traditionally prepared one set of financial statements and footnotes, complying with both US GAAP and International Accounting Standards (IAS). However, due to the promulgation of US Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by SFAS No. 138, *Accounting for Certain Derivatives and Certain Hedging Relationships* (collectively SFAS No. 133), it is no longer possible for the Corporation to satisfy the requirements of both US GAAP and IAS via one set of financial statements. The Corporation presents in note T a balance sheet and income statement conforming with IAS, together with a reconciliation between US GAAP and IAS.

Financial statements presentation—Certain amounts in the prior year have been reclassified to conform to the current year's presentation.

As a result of the adoption of SFAS No. 133 on July 1, 2000, in respect of loans, borrowings and derivative assets and liabilities, the balance sheet and related footnote disclosures as of June 30, 2001 are not comparable with the balance sheet and related footnote disclosures as of June 30, 2000.

Use of estimates—The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from these estimates. A significant degree of judgment has been used in the determination of: the adequacy of the reserve against losses on loans and equity investments; estimated fair values of all derivative instruments and related financial instruments in qualifying hedging relationships; and net periodic pension income. There are inherent risks and uncertainties related to the Corporation's operations. The possibility exists that changing economic conditions could have an adverse effect on the financial position of the Corporation.

Translation of currencies—Assets and liabilities not denominated in United States dollars (US dollars or \$), other than disbursed equity investments, are expressed in US dollars at the exchange rates prevailing at June 30, 2001 and June 30, 2000. Disbursed equity investments are expressed in US dollars at the prevailing exchange rates at the time of disbursement. Income and expenses are translated at the rates of exchange prevailing at the time of the transaction. Translation gains and losses are credited or charged to income.

Loans and equity investments—Loans and equity investments are recorded as assets when disbursed. Loans are carried at the principal amounts outstanding. In addition, beginning July 1, 2000, where loans are part of a designated hedging relationship employing derivative instruments, the carrying value is adjusted for changes in fair value attributable to the risk being hedged. These adjustments are reported in other unrealized gains and losses on financial instruments in net income. It is the Corporation's practice to obtain collateral security such as, but not limited to, mortgages and third-party guarantees. Equity investments are carried at cost. On occasion the Corporation enters into put and call option agreements in connection with equity investments.

Reserve against losses for loans and equity investments—The Corporation considers a loan as impaired when, based on current information and events, it is probable that the Corporation will be unable to collect all amounts due according to the loan's contractual terms. The reserve against losses for impaired loans represents management's judgment of the present value of expected future cash flows discounted at the loan's effective interest rate. The Corporation establishes a reserve against losses for equity investments when a decrease in value of the investments has occurred which is considered other than temporary. The reserve against losses for loans and equity investments includes an estimate of probable losses on loans and equity investments inherent in the portfolio but not specifically identifiable. The reserve is established through annual charges to income in the form of a provision for losses on loans and equity investments. Investments written off, as well as any subsequent recoveries, are recorded through the reserve.

Revenue recognition on loans and equity investments—Interest income and commitment fees on loans are recorded as income on an accrual basis. All other fees are recorded as income when received in freely convertible currencies. The Corporation does not recognize income on loans where collectibility is in doubt or payments of interest or principal are past due more than 60 days unless management anticipates that collection of interest will occur in the near future. Any interest accrued on a loan placed in nonaccrual status is reversed out of income and is thereafter recognized as income only when the actual payment is received. Interest not previously recognized but capitalized as part of a debt restructuring is recorded as deferred income and credited to income only when the related principal is received.

Dividends and profit participations are recorded as income when received in freely convertible currencies. Capital gains on the sale of equity investments are measured against the average cost of the investments sold and are recorded as income when received in freely convertible currencies.

Guarantees—The Corporation extends guarantee facilities to its clients to provide credit enhancement for their debt securities and trade obligations. Under the terms of the guarantees, the Corporation agrees to assume responsibility for the client's financial obligations in the event of default by the client. Guarantees are regarded as outstanding when the underlying financial obligation of the client is incurred, and called when the Corporation's obligation under the guarantee has been invoked. Guarantees remain off-balance sheet while outstanding; when called, the amount disbursed is recorded as a new loan. A contingent liability is established for probable losses on outstanding guarantees and is included in payables and other liabilities on the balance sheet. Specific reserves are established on called guarantees and are included in the reserve against losses on loans and equity investments on the balance sheet.

NOTES TO FINANCIAL STATEMENTS (continued)

Liquid asset portfolio—The Corporation's liquid funds are invested in government and agency obligations, time deposits and asset-backed securities. Government and agency obligations include highly rated fixed rate bonds, notes, bills and other obligations issued or unconditionally guaranteed by governments of countries or other official entities including government agencies and instrumentalities or by multilateral organizations. The liquid asset portfolio, as defined by the Corporation and as detailed in note B, comprises: these time deposits and securities; related derivative instruments; securities purchased under resale agreements, securities sold under repurchase agreements and payable for cash collateral received; receivables from sales of securities and payables for purchases of securities; and related accrued income and charges.

On July 1, 2000, the Corporation reclassified all of its available for sale securities as trading securities. This resulted in a transfer of accumulated net unrealized holding losses on available for sale securities of \$5 million from other comprehensive income to net income in the year ended June 30, 2001. Beginning with the year ended June 30, 2001, realized and unrealized gains and losses on trading securities are reported separately in the income statement.

Trading securities are carried at fair value with any changes in fair value reported in net gains and losses on trading activities. Interest on securities and amortization of premiums and accretion of discounts are reported in interest from time deposits and securities.

The Corporation classifies due from banks, time deposits and securities (collectively, cash and cash equivalents) as an element of liquidity in the statement of cash flows because of their nature and the Corporation's policies governing the level and use of such investments.

Repurchase and resale agreements—Repurchase agreements are contracts under which a party sells securities and simultaneously agrees to repurchase the same securities at a specified future date at a fixed price. Resale agreements are contracts under which a party purchases securities and simultaneously agrees to resell the same securities at a specified future date at a fixed price.

It is the Corporation's policy to take possession of securities purchased under resale agreements, which are primarily liquid government securities. The market value of these securities is monitored and, within parameters defined in the agreements, additional collateral is obtained when their value declines. The Corporation also monitors its exposure with respect to securities sold under repurchase agreements and, in accordance with the terms of the agreements, requests the return of excess securities held by the counterparty when their value increases.

Repurchase and resale agreements are accounted for as collateralized financing transactions and recorded at the amount at which the securities were acquired or sold plus accrued interest. Securities purchased under resale agreements, securities sold under agreements to repurchase and securities payable for cash collateral received are recorded at fair value.

Borrowings—To diversify its access to funding and reduce its borrowing costs, the Corporation borrows in a variety of currencies and uses a number of borrowing structures, including foreign exchange rate-linked, inverse floating rate and zero coupon notes. Generally, the Corporation simultaneously converts such borrowings into variable rate US dollar borrowings through the use of currency and interest rate swap transactions. Under certain outstanding borrowing agreements, the Corporation is not permitted to mortgage or allow a lien to be placed on its assets (other than purchase money security interests) without extending equivalent security to the holders of such borrowings.

Borrowings are recorded at the amount repayable at maturity, adjusted for unamortized premium and unaccreted discount. In addition, beginning July 1, 2000, where borrowings are part of a designated hedging relationship employing derivative instruments, the carrying amount is adjusted for changes in fair value attributable to the risk being hedged. Adjustments for changes in fair value attributable to hedged risks are reported in other unrealized gains and losses on financial instruments. Interest on borrowings and amortization of premiums and accretion of discounts are reported in charges on borrowings.

Risk management, derivative instruments and hedge accounting—The Corporation enters into transactions in various derivative instruments for risk management purposes in connection with its principal business activities, including lending, client risk management, borrowing, liquid asset portfolio management and asset and liability management. The Corporation does not use derivatives for speculative, marketing or merchandising purposes.

Beginning July 1, 2000, all derivative instruments are recorded on the balance sheet at fair value as derivative assets or derivative liabilities. Derivative instruments embedded in market borrowing transactions entered into on or after January 1, 1999 are bifurcated from the host contract and recorded at fair value as derivative assets and liabilities. The value at inception of these embedded derivatives is excluded from the carrying value of market borrowings on the balance sheet. Changes in fair values of derivative instruments used in liquid asset portfolio management activities are recorded in net gains and losses on trading activities. Changes in fair values of derivative instruments other than those used in liquid asset portfolio management activities are recorded in other unrealized gains and losses on financial instruments. Prior to July 1, 2000, changes in fair values of derivative instruments associated with the liquid asset portfolio classified as available for sale were included in other comprehensive income until realized, and those associated with the liquid asset portfolio classified as trading were included in net income; other derivative instruments were recorded on the balance sheet at amortized cost.

Subject to certain specific qualifying conditions in SFAS No. 133, a derivative instrument may be designated either as a hedge of the fair value of an asset or liability (fair value hedge), or as a hedge of the variability of cash flows of an asset or liability or forecasted transaction (cash flow hedge). For a derivative instrument qualifying as a fair value hedge, fair value gains or losses on the derivative instrument are reported in net income, together with offsetting fair value gains or losses on the hedged item that are attributable to the risk being hedged. For a derivative instrument qualifying as a cash flow hedge, fair value gains or losses associated with the risk being hedged are reported in other comprehensive income and released to net income in the period(s) in which the effect on net income of the hedged item is recorded. Fair value gains and losses on a derivative instrument not qualifying as a hedge are reported in net income.

The Corporation has designated certain hedging relationships in its borrowing and lending activities as fair value hedges. The Corporation generally matches the terms of its derivatives with the terms of the specific underlying financial instruments hedged, in terms of currencies, maturity dates, reset dates, interest rates and other features. However, the valuation methodologies applied to the derivative and the hedged financial instrument, as prescribed by SFAS No. 133, may differ. The resulting ineffectiveness calculated for such relationships is recorded in other unrealized gains and losses on financial instruments in the income statement.

The Corporation has not designated any hedging relationships as cash flow hedges. Consequently, the change in fair value of the derivatives in cash flow-like hedges recorded in net income is not offset by changes in fair value of the related asset or liability.

The risk management policy for each of the Corporation's principal business activities, and the accounting policies particular to them, are described below.

Lending activities: To minimize the level of interest rate and currency exchange risk associated with fixed rate US dollar or non-US dollar lending, derivative instruments with generally matching terms are used to convert the cash flows from those loans into variable rate US dollars, consistent with the Corporation's matched funding policy. The impact on net income of changes in fair value of interest rate swaps qualifying for the short cut method under SFAS No. 133 is exactly offset by a corresponding adjustment to the fair value of the related loans. The Corporation has elected not to designate hedging relationships for all other lending-related derivatives that do not qualify for the short cut method.

NOTES TO FINANCIAL STATEMENTS (continued)

Client risk management activities: The Corporation enters into derivatives transactions with its clients to help them hedge their own currency, interest rate or commodity risk, which, in turn, improves the overall quality of the Corporation's loan portfolio. To hedge the market risks that arise from these transactions with clients, the Corporation enters into offsetting derivative transactions with matching terms with authorized market counterparties. Changes in fair value of all derivatives associated with these activities are reflected currently in net income. Though hedge accounting is not applicable to these activities, the matching of terms between the offsetting transactions minimizes the impact on net income.

Borrowing activities: The Corporation issues debt securities in various capital markets with the objectives of minimizing its borrowing costs, diversifying funding sources, and developing member countries' capital markets, sometimes using complex structures. These structures include borrowings payable in multiple currencies, or borrowings with principal and/or interest determined by reference to a specified index such as a stock market index, a reference interest rate, a commodity index, or one or more foreign exchange rates. The Corporation uses derivative instruments with matching terms, primarily currency and interest rate swaps, to convert such borrowings into variable rate US dollar obligations, consistent with the Corporation's matched funding policy. The Corporation has designated the majority of derivatives associated with borrowing activities as fair value hedges of the underlying borrowings. There are a small number of cash flow-like hedging transactions for which no hedge relationship has been designated.

Liquid asset portfolio management activities: The Corporation manages the interest rate, currency and other market risks associated with certain of the time deposits and securities in its liquid asset portfolio by entering into derivative transactions to convert the cash flows from those instruments into variable rate US dollars, consistent with the Corporation's matched funding policy. The derivative instruments used include short-term, over-the-counter foreign exchange forwards (covered forwards), interest rate and currency swaps, and exchange-traded interest rate futures and options. As the entire liquid asset portfolio is classified as a trading portfolio, all securities (including derivatives) are carried at fair value, and no hedging relationships have been designated.

Asset and liability management: In addition to the risk managed in the context of its business activities detailed above, the Corporation faces residual market risk in its overall asset and liability management. Residual currency risk is managed by monitoring the aggregate position in each lending currency and eliminating the net excess asset or liability position through spot sales or purchases. Interest rate risk due to reset date mismatches is reduced by synchronizing the reset dates on assets and liabilities and managing overall interest rate risk on an aggregate basis. Interest rate risk arising from mismatches due to writedowns, prepayments and reschedulings, and residual reset date mismatches, is monitored by measuring the sensitivity of the present value of assets and liabilities in each currency to each basis point change in interest rates.

The Corporation monitors the credit risk associated with these activities by careful assessment and monitoring of prospective and actual clients and counterparties. In respect of liquid assets and derivatives transactions, credit risk is managed by establishing exposure limits based on the credit rating and size of the individual counterparty. In addition, the Corporation has entered into master agreements governing derivative transactions that contain close-out and netting provisions and collateral arrangements. Under these agreements, if the Corporation's credit exposure to a counterparty, on a mark-to-market basis, exceeds a specified level, the counterparty must post collateral to cover the excess, generally in the form of liquid government securities.

Resource mobilization—The Corporation mobilizes funds from commercial banks and other financial institutions (Participants) through loan participations which are sold by the Corporation, without recourse, to Participants. These loan participations are administered and serviced by the Corporation on behalf of the Participants. The disbursed and outstanding balances of the loan participations are not included in the Corporation's balance sheet.

Staff Retirement Plan—The World Bank Group has a defined benefit retirement plan (the Plan) covering substantially all of the Corporation's staff. The Plan also covers substantially all the staff of IBRD and MIGA. Under the Plan, benefits are based on the years of contributory service and the highest three-year average of pensionable remuneration as defined in the Plan, with the staff contributing a fixed percentage of pensionable remuneration and the World Bank Group contributing the remainder of the actuarially determined cost of future Plan benefits. The actuarial present values of Plan obligations throughout the fiscal year are determined at the beginning of the fiscal year by the Plan's actuary. The Corporation's total contribution to the Plan is based upon the aggregate funding method. All contributions to the Plan and all other assets and income held for purposes of the Plan are held separately from the other assets and income of the World Bank Group and can be used only for the benefit of the participants in the Plan and their beneficiaries, until all liabilities to them have been paid or provided for. Plan assets consist primarily of equity and fixed income securities, with small holdings of cash, real estate and other investments.

The net periodic pension income or expense allocated to the Corporation is included in income from (contributions to) Staff Retirement Plan in the income statement.

Other postretirement benefits—Other postretirement benefits are provided for eligible active and retired World Bank Group staff, including those of the Corporation, through a Retired Staff Benefits Plan and a Post Employment Benefits Plan.

Some of the assets designated for other postretirement benefits meet the requirements for plan assets prescribed under SFAS No. 106, *Employer's Accounting for Postretirement Benefits Other Than Pensions*. Other plan assets and liabilities that do not qualify for off-balance sheet accounting are recorded on IBRD's balance sheet. The Corporation includes a receivable from IBRD in receivables and other assets relating to its share of these postretirement benefits net assets, representing prepaid postretirement benefits costs. Any increase or decrease in the Corporation's share of these net assets is recognized in increase (decrease) in share of net assets held for postretirement benefits in the income statement.

Introduction of the Euro—Effective January 1, 1999 certain member states of the European Union adopted the Euro as their common currency and the European Currency Unit was automatically redenominated into the Euro. Amounts stated in Euros appearing herein for both the current and prior periods have been recast from the legacy currencies regardless of the timing of the redenomination of the instruments concerned. Recasting has had no impact on the US dollar equivalents reported in these financial statements except insofar as, in the footnotes that disclose currency analyses of balance sheet amounts, legacy currency items have been aggregated and single Euro amounts are disclosed in their place.

Accounting and financial reporting developments—The Corporation adopted SFAS No. 133 on July 1, 2000. The effect of adoption is detailed in note L.

In March 1999, the International Accounting Standards Committee issued IAS No. 39, *Financial Instruments Recognition and Measurement*. Further details are given in note T.

In September 2000, the Financial Accounting Standards Board issued SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS No. 140, which replaces SFAS No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, provides accounting and reporting standards for securitizations and other transfers of financial assets. The accounting requirements of the Standard are effective for transfers and servicing of financial assets and extinguishments of liabilities after March 31, 2001, and must be applied prospectively. The Corporation applied the provisions of SFAS No. 140 beginning April 1, 2001. SFAS No. 140 also requires certain disclosures related to securitization transactions, collateral arrangements and repurchase agreements for fiscal years ending after December 15, 2000. These disclosures are given in note B, "Liquid asset portfolio." The adoption of SFAS No. 140 did not have a material impact on the Corporation's financial position or results of operations for the period.

NOTES TO FINANCIAL STATEMENTS (continued)

Note B—Liquid asset portfolio

The composition of the Corporation's liquid asset portfolio is as follows (US\$ millions):

	June 30, 2001		June 30, 2000	
	Trading portfolio	Trading portfolio	Available for sale portfolio	Total
Assets				
Due from banks	\$ 19	\$ -	\$ 31	\$ 31
Time deposits	4,145	183	4,162	4,345
Securities	10,300	536	8,585	9,121
Securities purchased under resale agreements	-	4	218	222
Receivables and other assets:				
Receivables from sales of securities	312	301	63	364
Accrued interest income on time deposits and securities	154	5	138	143
Accrued income on derivative instruments	70	-	94	94
Derivative assets	501	92	3,392	3,484
Total assets	\$ 15,501	\$ 1,121	\$ 16,683	\$ 17,804
Liabilities				
Payables and other liabilities:				
Payables for purchases of securities	\$ 299	\$ 220	\$ 114	\$ 334
Accrued charges on derivative instruments	91	-	83	83
Securities sold under repurchase agreements and payable for cash collateral received	1,641	-	1,739	1,739
Derivative liabilities	212	91	3,353	3,444
Total liabilities	\$ 2,243	\$ 311	\$ 5,289	\$ 5,600
Total net liquid asset portfolio	\$ 13,258	\$ 810	\$ 11,394	\$ 12,204

The liquid asset portfolio is denominated primarily in US dollars; investments in other currencies, net of the effect of associated derivative instruments that convert non-US dollar securities into US dollar securities, represent less than 1% of the portfolio at June 30, 2001 (less than 1%—June 30, 2000). The annualized rate of return on the trading portfolio during the year ended June 30, 2001, was 7.1% (5.1%—year ended June 30, 2000; 5.6%—year ended June 30, 1999). After the effect of associated derivative instruments, the liquid asset portfolio generally reprices within one year.

TRADING SECURITIES

The composition of trading securities is as follows:

	Year ended June 30, 2001	At June 30, 2001		
	Fair value average daily balance (US\$ millions)	Fair value (US\$ millions)	Average maturity (years)	Average yield (%)
Government and agency obligations	\$ 4,518	\$ 4,931	4.6	5.3
Asset-backed securities	2,341	2,448	8.9	4.7
Corporate securities	2,815	2,921	3.2	5.4
Total trading securities	\$ 9,674	\$ 10,300		

	Year ended June 30, 2000	At June 30, 2000		
	Fair value average daily balance (US\$ millions)	Fair value (US\$ millions)	Average maturity (years)	Average yield (%)
Government and agency obligations	\$ 106	\$ 113	2.7	3.6
Asset-backed securities	207	242	23.3	7.4
Corporate securities	291	181	1.3	6.5
Total trading securities	\$ 604	\$ 536		

The expected maturity of the asset-backed securities will differ from the contractual maturity, as reported above, due to prepayment features.

NOTES TO FINANCIAL STATEMENTS (continued)

AVAILABLE FOR SALE SECURITIES

On July 1, 2000 the Corporation reclassified all of its available for sale securities as trading securities. As of June 30, 2000 the amortized cost, gross unrealized gains and losses, fair value and average yield of securities classified as available for sale were as follows:

	June 30, 2000				
	(US\$ millions)			Fair value	Average yield (%)
	Amortized cost	Gross unrealized gains	Gross unrealized losses		
Government and agency obligations	\$ 4,164	\$ 125	\$ (34)	\$ 4,255	5.7
Asset-backed securities	2,116	6	(2)	2,120	6.8
Corporate securities	2,164	67	(21)	2,210	5.8
Associated derivative instruments, net	191	45	(191)	45	
Total available for sale securities	\$ 8,635	\$ 243	\$ (248)	\$ 8,630	

INCOME FROM LIQUID ASSET PORTFOLIO

Income from liquid asset portfolio for the years ended June 30, 2001, 2000 and 1999 comprises (US\$ millions):

	2001	2000	1999
Interest income:			
Trading portfolio	\$ 790	\$ 32	\$ 30
Available for sale portfolio	-	602	517
Total interest from time deposits and securities	790	634	547
Net gains and losses on trading activities:			
Realized-			
Trading portfolio	61	9	(6)
Available for sale portfolio	-	(42)	(23)
Unrealized-			
Trading portfolio	26	(5)	14
Total net gains and losses on trading activities	87	(38)	(15)
Total income from liquid asset investments	\$ 877	\$ 596	\$ 532

Collateral

The estimated fair value of securities held by the Corporation at June 30, 2001 as collateral, in connection with derivatives transactions and purchase and resale agreements, that may be sold or repledged was \$113 million.

Note C—Loans and equity investments and reserve against losses

The distribution of the disbursed portfolio by sector is as follows (US\$ millions):

	June 30, 2001			June 30, 2000		
	Loans	Equity investments	Total	Loans	Equity investments	Total
Finance and insurance	\$ 1,570	\$ 601	\$ 2,171	\$ 1,656	\$ 479	\$ 2,135

NOTES TO FINANCIAL STATEMENTS (continued)

	June 30, 2001			June 30, 2000		
	Loans	Equity investments	Total	Loans	Equity investments	Total
Latin America and Caribbean	\$ 3,495	\$ 861	\$ 4,356	\$ 3,463	\$ 855	\$ 4,318
Asia	2,132	894	3,026	2,405	847	3,252
Europe and Central Asia	1,570	500	2,070	1,578	458	2,036
Sub-Saharan Africa	576	276	852	527	269	796
Middle East and North Africa	378	158	536	331	162	493
Other	-	50	50	-	45	45
Total disbursed portfolio	8,151	2,739	10,890	8,304	2,636	10,940
Fair value adjustments	19	-	19	-	-	-
Carrying value of loans and equity investments	\$ 8,170	\$ 2,739	\$ 10,909	\$ 8,304	\$ 2,636	\$ 10,940

At June 30, 2001, 23% (24%–June 30, 2000) of the disbursed loan portfolio consisted of fixed rate loans, while the remainder was at variable rates.

The currency composition and average yield of loans disbursed and outstanding are summarized below (US\$ millions):

	June 30, 2001		June 30, 2000	
	Amount	Average yield (%)	Amount	Average yield (%)
US dollar	\$ 7,390	7.7	\$ 7,565	9.3
Euro	552	7.6	583	7.4
Other currencies	209	8.0	156	7.1
Total loans disbursed and outstanding	8,151	7.7	8,304	9.1
Fair value adjustments	19	-	-	-
Carrying value of loans	\$ 8,170		\$ 8,304	

After the effect of interest rate and currency swaps, the Corporation's loans are principally denominated in US dollars.

Loans disbursed and outstanding in all currencies are repayable during the years ending June 30, 2002 through June 30, 2006, and thereafter, as follows (US\$ millions):

	2002	2003	2004	2005	2006	Thereafter	Total
Fixed rate loans	\$ 483	\$ 283	\$ 233	\$ 239	\$ 177	\$ 422	\$ 1,837
Variable rate loans	1,209	934	902	857	776	1,636	6,314
Total loans disbursed and outstanding	\$ 1,692	\$ 1,217	\$ 1,135	\$ 1,096	\$ 953	\$ 2,058	8,151
Fair value adjustments							19
Carrying value of loans							\$ 8,170

The Corporation's variable rate loans disbursed and outstanding generally reprice within one year.

Loans on which the accrual of interest has been discontinued amounted to \$1,054 million at June 30, 2001 (\$922 million–June 30, 2000). Interest income not recognized on nonaccruing loans during the year ended June 30, 2001 totaled \$100 million (\$84 million–year ended June 30, 2000; \$73 million–year ended June 30, 1999). Interest collected on loans in nonaccrual status, related to current and prior years, during the year ended June 30, 2001 was \$27 million (\$28 million–year ended June 30, 2000; \$17 million–year ended June 30, 1999). The average recorded investment in impaired loans during the year ended June 30, 2001, was \$1,534 million (\$1,331 million–year ended June 30, 2000). The recorded investment in impaired loans at June 30, 2001 was \$1,918 million (\$1,150 million–June 30, 2000).

NOTES TO FINANCIAL STATEMENTS (continued)

Changes in the reserve against losses for the years ended June 30, 2001, 2000 and 1999 are summarized below (US\$ millions):

	2001			2000			1999		
	Loans	Equity investments	Total	Loans	Equity investments	Total	Loans	Equity investments	Total
Beginning balance	\$ 1,228	\$ 745	\$ 1,973	\$ 1,118	\$ 707	\$ 1,825	\$ 977	\$ 545	\$ 1,522
Investments written off	(45)	(91)	(136)	(20)	(37)	(57)	(12)	(14)	(26)
Investments recovered	-	-	-	1	-	1	-	-	-
Translation adjustments	(13)	-	(13)	(11)	-	(11)	(4)	-	(4)
Provision for losses	193	196	389	140	75	215	157	176	333
Ending balance	\$ 1,363	\$ 850	\$ 2,213	\$ 1,228	\$ 745	\$ 1,973	\$ 1,118	\$ 707	\$ 1,825

The translation gain of \$13 million (\$11 million gain-year ended June 30, 2000; \$4 million gain-year ended June 30, 1999) has been offset by an equivalent translation loss (loss-years ended June 30, 2000 and 1999) on currency hedges. Both amounts have been recorded in translation adjustments in the income statement.

Provision for losses on loans, equity investments and guarantees in the income statement for the year ended June 30, 2001 includes \$13 million in respect of guarantees (\$nil-years ended June 30, 2000 and 1999). At June 30, 2001 the accumulated reserve for losses on guarantees, included in the balance sheet in payables and other liabilities, was \$13 million (\$nil-June 30, 2000 and 1999).

Interest and financial fees from loans and equity investments for the years ended June 30, 2001, 2000 and 1999 comprise the following (US\$ millions):

	2001	2000	1999
Interest income	\$ 687	\$ 656	\$ 570
Commitment fees	7	8	9
Other financial fees	21	30	28
Total interest and financial fees	\$ 715	\$ 694	\$ 607

Note D-Projects approved and committed but not disbursed or utilized

Projects approved by the Board of Directors but not committed, loan and equity commitments signed but not yet disbursed, and guarantee and client risk management facilities signed but not yet utilized are summarized below (US\$ millions):

	June 30, 2001	June 30, 2000
Projects approved but not committed:		
Loans	\$ 2,621	\$ 3,283
Equity investments	609	556
Guarantees	474	429
Client risk management facilities	179	70
Total projects approved but not committed	<u>3,883</u>	<u>4,338</u>
Projects committed but not disbursed:		
Loans	1,731	1,748
Equity investments	896	839
Projects committed but not utilized:		
Guarantees	511	164
Client risk management facilities	174	131
Total projects committed but not disbursed or utilized	<u>3,312</u>	<u>2,882</u>
Total projects approved but not disbursed or utilized	\$ 7,195	\$ 7,220

Note E-Resource mobilization

Loan participations arranged to be placed with Participants in respect of loans approved by the Board of Directors, loan participations signed as commitments for which disbursement has not yet been made, and loan participations disbursed and outstanding and serviced by the Corporation for the Participants are as follows (US\$ millions):

	June 30, 2001	June 30, 2000
Loan participations arranged to be placed with Participants approved but not committed	\$ 2,021	\$ 3,308
Loan participations signed as commitments but not disbursed	979	876
Loan participations arranged to be placed with Participants approved but not disbursed	\$ 3,000	\$ 4,184
Loan participations disbursed and outstanding which are serviced by the Corporation	\$ 6,551	\$ 7,330

During the year ended June 30, 2001 the Corporation called and disbursed \$835 million (\$1,097 million-year ended June 30, 2000) of Participants' funds.

NOTES TO FINANCIAL STATEMENTS (continued)

The Corporation has securitized and sold variable rate US dollar loan participations to a trust (the Trust). Concurrently, the Corporation provided a \$20 million liquidity facility to the Trust and acquired \$20 million of the Trust's Class C certificates. The outstanding balance of the Trust's Class C certificates held by the Corporation was \$10 million at June 30, 2001 (\$10 million–June 30, 2000) and is included in equity investments. The liquidity facility is included in receivables and other assets and totaled \$nil at June 30, 2001 (\$5 million–June 30, 2000). The Corporation has provided reserves for losses against these instruments of \$3 million at June 30, 2001 (\$4 million–June 30, 2000). Certain of the securitized loan participations are secured by security interests in personal and real property. The principal balance outstanding of total loans securitized at June 30, 2001 was \$46 million (\$65 million–June 30, 2000).

Note F–Receivables and other assets

Receivables and other assets are summarized below (US\$ millions):

	June 30, 2001	June 30, 2000
Receivables from sales of securities	\$ 312	\$ 364
Accrued interest income on time deposits and securities	154	143
Accrued income on derivative instruments	469	520
Accrued interest income on loans	136	158
Prepaid pension costs	232	181
Receivable from IBRD representing prepaid postretirement benefits costs	18	17
Headquarters building:		
Land	89	89
Building	184	185
Less: Building depreciation	(20)	(15)
Headquarters building, net	253	259
Deferred charges and other assets	176	146
Total receivables and other assets	\$ 1,750	\$ 1,788

Note G–Borrowings

The Corporation's borrowings outstanding from market sources and currency and interest rate swaps, net of unamortized issue premiums and discounts, are summarized below:

	June 30, 2001							
	Market borrowings		Currency swaps payable (receivable)		Interest rate swaps notional principal payable (receivable)		Net currency obligation

Less: Unamortized discounts, net	(357)							
Total market borrowings	14,646							

The weighted average cost of the Corporation's borrowings outstanding from market sources after currency and interest rate swap transactions was 4.3% at June 30, 2001 (6.3%–June 30, 2000). The weighted average remaining maturity of the Corporation's borrowings from market sources was 7.2 years at June 30, 2001 (6.7 years–June 30, 2000).

Fair value adjustments to the carrying value of market borrowings comprises \$286 million representing adjustments to the carrying value of transactions in designated fair value hedging relationships, less \$19 million in respect of the value at inception of derivative instruments embedded in transactions entered into on or after January 1, 1999.

The net nominal amount payable from currency swaps of \$1,058 million and the net notional amount receivable from interest rate swaps of \$9 million at June 30, 2001, shown in the above table, are represented by currency and interest rate swap assets at fair value of \$362 million and currency and interest rate swap liabilities at fair value of \$1,448 million, included in derivative assets and derivative liabilities, respectively, on the balance sheet. The net nominal amount payable from currency swaps at June 30, 2000 of \$508 million, shown in the above table, consisted of currency swap receivables of \$10,520 million and currency swap payables of \$11,028 million, which were included in receivables from currency and interest rate swaps and payables for currency and interest rate swaps, respectively, on the balance sheet. The notional amounts of interest rate swaps are recorded off-balance sheet.

Borrowings outstanding from IBRD are summarized below:

	June 30, 2001		June 30, 2000	
	Principal amount (US\$ millions)	Weighted average cost (%)	Principal amount (US\$ millions)	Weighted average cost (%)
US dollar	\$ 145	6.5	\$ 167	6.5
Euro	31	7.5	57	7.2
Japanese yen	15	5.9	29	5.7
Swiss franc	14	5.8	19	5.7
Pound sterling	1	7.5	1	7.6
Total borrowings outstanding from IBRD	\$ 206		\$ 273	

The weighted average remaining maturity of borrowings from IBRD was 5.2 years at June 30, 2001 (5.6 years–June 30, 2000).

There were no undrawn balances on committed borrowings from IBRD at June 30, 2001 (\$nil–June 30, 2000). Charges on borrowings for the year ended June 30, 2001 includes \$16 million (\$21 million–year ended June 30, 2000; \$28 million–year ended June 30, 1999) in respect of IBRD borrowings.

NOTES TO FINANCIAL STATEMENTS (continued)

The principal amounts repayable on borrowings outstanding in all currencies, gross of any premiums or discounts, during the years ending June 30, 2002 through June 30, 2006 and thereafter are summarized below (US\$ millions):

	2002	2003	2004	2005	2006	Thereafter	Total
Borrowings from market sources	\$ 2,136	\$ 2,937	\$ 2,232	\$ 1,601	\$ 1,251	\$ 5,107	\$ 15,264
Borrowings from IBRD	42	37	35	38	24	30	206
Total borrowings, gross	\$ 2,178	\$ 2,974	\$ 2,267	\$ 1,639	\$ 1,275	\$ 5,137	15,470
Less: Unamortized discounts, net							(280)
Fair value adjustments							267
Carrying value of borrowings							\$ 15,457

After the effect of interest rate and currency swaps, the Corporation's borrowings generally reprice within one year.

Note H—Payables and other liabilities

Payables and other liabilities are summarized below (US\$ millions):

	June 30, 2001	June 30, 2000
Accrued charges on borrowings	\$ 357	\$ 360
Accrued charges on derivatives instruments	343	419
Payables for purchases of securities	299	334
Accounts payable, accrued expenses and other liabilities	143	173
Deferred income	67	52
Total payables and other liabilities	\$ 1,209	\$ 1,338

Note I—Capital stock

The Corporation's authorized share capital was increased to \$2,450 million through two capital increases in 1992. The subscription and payment period for shares then allocated ended on August 1, 1999. The Corporation agreed, however, to defer the payment date for certain member countries until August 1, 2001. Pursuant to these arrangements, \$14 million of subscribed shares remained unpaid at June 30, 2001 (\$14 million—June 30, 2000).

During the year ended June 30, 2001, 624 shares were subscribed by member countries at a par value of \$1,000 each (7,773—year ended June 30, 2000). A total of less than \$1 million was paid in on account of subscriptions (\$8 million—year ended June 30, 2000).

Note J—Other income

Other income predominantly comprises fees collected from clients for expenses incurred by the Corporation on their behalf, included in administrative expenses. In the year ended June 30, 2000, other income also included revenues from the sale of assets, including assets associated with the Corporation's information provision business.

Note K—Contributions to special programs

From time to time, the Board of Directors approves recommendations under which the Corporation contributes to special programs, which presently are the Africa Project Development Facility, the South Pacific Project Facility, the Foreign Investment Advisory Service, the Enterprise Support Service for Africa, and the Mekong Project Development Facility. During the year ended June 30, 2001, the Corporation contributed \$16 million to these facilities (\$7 million—year ended June 30, 2000; \$3 million—year ended June 30, 1999).

NOTES TO FINANCIAL STATEMENTS (continued)

Note L—Implementation of Statement of Financial Accounting Standards No. 133

The Corporation adopted SFAS No. 133 on July 1, 2000. The Standard requires all freestanding derivative instruments, and certain derivatives embedded in other financial instruments, to be recognized as either assets or liabilities on the balance sheet, at fair value. The Standard is effective for all contracts outstanding at June 30, 2000. However, the Standard contains a grandfathering election, under which derivatives embedded in other instruments executed prior to January 1, 1999 need not be bifurcated. In prior periods, the Corporation separately reported the gross receivable and gross payable amounts of certain freestanding derivatives as assets and liabilities, respectively.

At the date of initial application of SFAS No. 133, certain items were recorded as a transition adjustment, denoted as the cumulative effect of a change in accounting principle in the income statement. The transition adjustment included, first, the difference between the previous carrying value and the fair value of all freestanding derivative instruments. Secondly, it included the offsetting gains and losses on assets and liabilities held under fair value-like hedging relationships in existence prior to the adoption of SFAS No. 133 that are also recognized by adjusting their carrying value to fair value. Finally, the adjustment included the fair value of derivatives embedded in hybrid financial instruments entered into on or after January 1, 1999, where they are required to be separated from their respective host contracts, and also recorded on the balance sheet at fair value. The total amount of the transition adjustment, recorded on July 1, 2000, was \$93 million.

Upon adoption of SFAS No. 133, the Corporation also recorded a gain of \$15 million to accumulated other comprehensive income to adjust the book value to fair value of cross currency interest rate swaps in cash flow-like hedges. The Corporation elected not to seek hedge accounting for these transactions under the Standard and, accordingly, records the cross currency interest rate swaps at fair value, with the change in fair value included in quarterly earnings. The gain recorded in accumulated other comprehensive income upon adoption of the Standard is released into earnings over the remaining original hedge term. The amount released for the year ended June 30, 2001 was \$3 million; the expected release for the year ending June 30, 2002 is \$3 million.

Note M—Other unrealized gains and losses on financial instruments

Other unrealized gains on financial instruments for the year ended June 30, 2001 comprises (US\$ millions):

	<u>2001</u>
Difference between change in fair value of derivative instruments designated as a fair value hedge and change in fair value of hedged items attributable to risks being hedged	\$ 16
Change in fair value of derivative instruments, other than those associated with liquid asset investments, not designated as a hedge	(5)
Amortization of difference between fair value and carrying value of hedged items at July 1, 2000 not designated for hedge accounting under SFAS No. 133	(3)
Release from accumulated other comprehensive income of transition gain on cash flow-like hedges	<u>3</u>
Total other unrealized gains and losses on financial instruments	\$ 11

Of the total other unrealized gains and losses on financial instruments, unrealized gains of \$22 million are attributable to borrowings and related derivatives transactions, unrealized losses of \$7 million are attributable to loans and related derivatives transactions and unrealized losses of \$4 million are attributable to client risk management activities.

Note N—Derivative and other financial instruments

Many of the Corporation's financial instruments lack a trading market, characterized as exchanges between willing buyers and sellers. Accordingly, estimates and present value calculations of future cash flows were used to estimate the fair values. Determining future cash flows for fair value estimation is subjective and imprecise, and minor changes in assumptions or methodologies may materially affect the estimated values. The excess or deficit resulting from the difference between the carrying amounts and the fair values presented does not necessarily reflect the realizable values since the Corporation generally holds loans, borrowings and other financial instruments to maturity with the aim of realizing their recorded values.

The estimated fair values reflect the interest rate environments as of June 30, 2001 and June 30, 2000. In different interest rate environments, fair value results can differ significantly, especially for certain fixed rate financial instruments. Reasonable comparability of fair values among financial institutions is not likely, because of the wide range of permitted valuation techniques and numerous estimates that must be made in the absence of secondary market prices. This lack of objective pricing standards introduces a greater degree of subjectivity and volatility to these derived or estimated fair values. Therefore, while disclosure of estimated fair values of financial instruments is required, readers are cautioned in using these data for purposes of evaluating the financial condition of the Corporation. The fair values of the individual financial instruments do not represent the fair value of the Corporation taken as a whole.

The methodologies used and key assumptions made to estimate fair values as of June 30, 2001 and June 30, 2000 are summarized below.

Liquid assets—The estimated fair value of time deposits and the trading securities portfolio are based on quoted market prices and the present value of estimated future cash flows using appropriate discount rates.

Derivative instruments—Fair values for interest rate and currency swaps were derived by determining the present value of estimated future cash flows using appropriate discount rates. Fair values for covered forwards were derived by using quoted market forward exchange rates. Fair values for commodity-indexed contracts and call options were based on pricing models. Fair value for put warrants was based on quoted market prices.

NOTES TO FINANCIAL STATEMENTS (continued)

Loans and loan commitments—The Corporation, which extends loans to entities operating in the private sector in its developing member countries, generally has not sold its loans from the portfolio and there is no comparable secondary market. Fair values for fixed rate loans and loan commitments were determined using a discounted cash flow model based on a discount rate comprising the fixed rate loan spread plus the year-end estimated cost of funds. Since rates on variable rate loans and loan commitments are generally reset on a quarterly or semiannual basis, the carrying value adjusted for credit risk was determined to be the best estimate of fair value. The Corporation also holds options to convert loans into equity of certain of its investee companies. Fair values of these conversion options are based on quoted market prices or other calculated values of the underlying equity investment.

Equity investments—Fair values were determined using market prices where available, put option prices, book values or cost, certain of which were discounted based upon management's estimate of net realizable value. Where market prices were not available or alternate valuation techniques were not practical, cost was determined to be the best estimate of fair value. Management's estimate of fair value takes into consideration the relative illiquidity and volatility, as well as the overall business constraints, in the emerging markets in which the Corporation invests.

Borrowings—Fair values were derived by determining the present value of estimated future cash flows using appropriate discount rates.

Estimated fair values of the Corporation's financial assets and liabilities and off-balance sheet financial instruments are summarized below (US\$ millions). The Corporation's credit exposure is represented by the estimated fair values of its financial assets.

	June 30, 2001		June 30, 2000	
	Carrying amount	Fair value adjustments	Fair value	Fair value
Financial assets

NOTES TO FINANCIAL STATEMENTS (continued)

Note O—Currency position

The Corporation conducts its operations for its loans, time deposits and securities and borrowings in multiple currencies. The Corporation's policy is to minimize the level of currency risk by closely matching the currency of its assets (other than equity investments and quasi-equity investments) and liabilities by using hedging instruments. The Corporation's equity investments in enterprises located in its developing member countries are typically made in the local currency of the country. As a matter of policy, the Corporation carries the currency risk of equity investments and quasi-equity investments and funds these investments from its capital and retained earnings.

The following table summarizes the Corporation's exposure in major currencies at June 30, 2001 and June 30, 2000 (US\$ millions):

	June 30, 2001					Total
	US dollar	Euro	Japanese yen	Other currencies	Fair value adjustments

NOTES TO FINANCIAL STATEMENTS (continued)

Note P—Segment reporting

For management purposes, the Corporation's business comprises two segments: client services and treasury services. The client services segment primarily consists of lending and equity investment activities. The treasury services segment consists of the borrowing, liquid asset management, asset and liability management and client risk management activities.

The assessment of segment performance by senior management includes net income for each segment, return on assets, and return on capital employed. The Corporation's management reporting system and policies are used to determine revenues and expenses attributable to each segment. Consistent with internal reporting, administrative expenses are allocated to each segment based largely upon personnel costs and segment head counts. Transactions between segments are immaterial and, thus, are not a factor in reconciling to the consolidated data.

The accounting policies of the Corporation's segments are, in all material respects, consistent with those described in note A, "Summary of significant accounting and related policies."

An analysis of the Corporation's major components of income and expense by business segment for the years ended June 30, 2001, 2000 and 1999 is given below (US\$ millions):

	2001			2000			1999		
	Client services	Treasury services	Total	Client services	Treasury services	Total	Client services	Treasury services	Total

During the year ended June 30, 2001, the Corporation changed its method of allocating certain costs amongst business units within the Corporation. Segment disclosures for the years ended June 30, 2000 and 1999 have been restated to be consistent with the new allocation method. Geographical segment data in respect of client services are disclosed in note C, and are not relevant in respect of treasury services.

Note Q—Staff Retirement Plan

The following table summarizes the benefit costs associated with the Staff Retirement Plan (SRP) allocated to the Corporation, included in income from Staff Retirement Plan, for the years ended June 30, 2001, 2000 and 1999 (US\$ millions):

	2001	2000	1999
Benefit cost			
Service cost	\$ (42)	\$ (39)	\$ (29)
Interest cost	(83)	(67)	(50)
Expected return on plan assets	154	132	115
Amortization of prior service costs	(1)	(1)	(1)
Amortization of unrecognized net gain/loss	21	21	27
Amortization of transition asset	2	2	2
Net periodic pension income	\$ 51	\$ 48	\$ 64

NOTES TO FINANCIAL STATEMENTS (continued)

The following table summarizes the benefit obligations, plan assets, and funded status associated with the SRP for the World Bank Group at June 30, 2001 and 2000 (US\$ millions):

	June 30, 2001	June 30, 2000
Benefit obligation		
Beginning of year	\$ 6,951	\$ 6,483
Service cost	271	271
Interest cost	536	461
Employee contributions	64	64
Benefits paid	(312)	(244)
Actuarial (gain)/loss	(233)	(84)
End of year	<u>7,277</u>	<u>6,951</u>
Fair value of plan assets		
Beginning of year	11,562	10,226
Employee contributions	64	64
Actual return on assets	(950)	1,516
Benefits paid	(312)	(244)
End of year	<u>10,364</u>	<u>11,562</u>
Funded status		
Plan assets in excess of benefit obligation	3,087	4,611
Unrecognized net gain from past experience different from that assumed and from changes in assumptions	(1,415)	(3,258)
Unrecognized prior service cost	33	41
Remaining unrecognized net transition asset	(26)	(39)
Prepaid (accrued) pension cost	<u>\$ 1,679</u>	<u>\$ 1,355</u>

The underlying actuarial assumptions used are based on financial market interest rates, past experience and management's best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations. The weighted average assumptions used in determining expense and benefit obligations are as follows (%):

	June 30, 2001	June 30, 2000
Discount rate	7.00	7.75
Expected return on plan assets	9.00	9.00
Rate of compensation increase	5.00–11.50	5.75–12.25

The effect of projected compensation levels was calculated based on a scale that provides for a decreasing rate of salary increase depending on age, beginning with 11.50% (12.25%–June 30, 2000) at age 20 and decreasing to 5.00% (5.75%–June 30, 2000) at age 64.

Note R–Service and support payments

The Corporation obtains certain administrative and overhead services from IBRD in those areas where common services can be efficiently provided by IBRD. This includes shared costs of the Boards of Governors and Directors, and other services such as communications, internal auditing, administrative support, supplies and insurance. Payments for these services are made by the Corporation to IBRD based on negotiated fees, chargebacks and allocated charges, where chargeback is not feasible. Expenses allocated to the Corporation for the year ended June 30, 2001, were \$19 million (\$16 million–year ended June 30, 2000; \$17 million–year ended June 30, 1999).

Note S–Trust funds

The Corporation uses the services of IBRD to administer funds on behalf of donors which are restricted for specific uses, including technical assistance, feasibility studies and project preparation, global and regional programs and research and training programs. These funds are placed in trust and are not included in the Corporation's assets. The responsibilities of the Corporation are to arrange for services generally not otherwise provided by it including full project implementation and procurement of goods and services. The distribution of Trust Fund assets by executing agent is as follows (US\$ millions):

	June 30, 2001		June 30, 200	
	Total fiduciary assets	Number of active funds	Total fiduciary assets	Number of active funds
Executed by the Corporation	\$ 99	474	\$ 89	464
Executed by the recipient	5	4	-	3
Total	<u>\$ 104</u>	<u>478</u>	<u>\$ 89</u>	<u>467</u>

NOTES TO FINANCIAL STATEMENTS (continued)

Note T—Financial statements conforming with International Accounting Standards

The balance sheet as of June 30, 2001 and income statement for the year ended June 30, 2001, prepared in accordance with IAS, are presented below (US\$ millions).

Total noninterest expense	331	272	262
Net income	\$ 241	\$ 380	\$ 249

Accounting and financial reporting developments—In March 1999, the International Accounting Standards Committee issued IAS No. 39, *Financial Instruments Recognition and Measurement*. The Standard prescribes balance sheet recognition of all financial assets and financial liabilities, including derivatives. It requires financial assets and financial liabilities to be initially measured at cost, and to be carried at fair value on the balance sheet thereafter. The Standard is effective for the Corporation for the year ending June 30, 2002.

Reconciliation from US GAAP to IAS—A reconciliation between net income for the year ended June 30, 2001, and total assets and total capital as of June 30, 2001, as measured in accordance with US GAAP, and the equivalent amounts measured in accordance with IAS, is presented below (US\$ millions).

	Net income	Total assets	Total capital
As measured in accordance with US GAAP	\$ 345	\$ 26,170	\$ 6,095
Derivatives and hedging transactions	(104)	12,853	(116)
As measured in accordance with IAS	\$ 241	\$ 39,023	\$ 5,979

Net income—Net other unrealized gains on financial instruments and the cumulative effect of change in accounting principle have been eliminated from net income measured in accordance with US GAAP.

Total assets—Under IAS, both the gross receivable leg and the gross payable leg of currency swaps are recorded on the balance sheet. Under US GAAP, after the implementation of SFAS No. 133, only the fair value of these instruments is recorded on the balance sheet. In addition, in accordance with SFAS No. 133, the carrying value of certain hedged items has been adjusted and amortized through net income. This adjustment is eliminated to arrive at net income under IAS.

Total capital—The adjustment to total capital reflects the overall impact of the reconciling items described above.

1

Cumulative commitments are composed of disbursed and undisbursed balances. The undisbursed portion is revalued at current exchange rates, while the disbursed portion represents the cost of the commitment at the time of disbursement. Excludes risk management and guarantee facilities.

2

Reflects B-loan amounts at the date of the signing of investment agreement.

3

Of this amount, \$9.8 million represents investments made at a time when the authorities on Taiwan represented China in International Finance Corporation. The balance represents investments in West Bank and Gaza.

a. Commitments include funds to be provided by IFC for its own account, funds to be provided by participants through the purchase of an interest in IFC's investment, and funds to be provided by other financial institutions in association with IFC, where IFC has rendered material assistance in mobilizing those funds. Original commitments are composed of disbursed and undisbursed balances. The undisbursed portion is revalued at the current exchange rate, while the disbursed portion represents the cost of the commitment at the time of disbursement. Loans held for the Corporation are revalued at the current exchange rates. Amounts shown are for commitments outstanding at June 30, 2001, net of cancellations.

b. Commitments and investments held for IFC do not include guarantees and risk management products. At June 30, 2001, IFC's committed portfolio of these products was \$803,930,394.

c. Of the total \$136,213,269 in write-offs for FY01, write-off adjustments are \$54,237,300 in loans and \$18,683,714 in equity (at cost) for a total of \$72,921,014.

NOTE: The operational investments are represented by loans and equity, as stated. In addition, in certain investments, the Corporation has the right to acquire shares and/or participate in the profits of the enterprise.

In some tables, totals may differ from the sum of individual figures because of rounding.

Our Mission:

We promote sustainable private sector investment in developing countries, helping to reduce poverty and improve people's lives.
