IFC Global Infrastructure Overview

IFC is the largest global development institution focused on the private sector in developing countries.

**About IFC**
- A member of the World Bank Group
- Provides investment, advice, and resource mobilization
- Triple-A credit rating; owned by 185 countries
- Works with more than 2,000 businesses worldwide
- Leader in social, environmental, and corporate governance standards

**Our Impact**
Every year, our portfolio clients:
- Provide electricity for around 100 million people
- Transport millions of TEUs of cargo and tens of millions of airport passengers
- Provide water service to tens of millions of people
- Spend billions on local goods and services

**Our Approach**
- IFC is working to improve access to energy, transportation, and municipal and environmental infrastructure. We support sustainable mining through investments and advisory engagements that create markets and support jobs.
- We have a track record of providing financing and structuring solutions for high-impact projects in developing countries, including in low-income and fragile states.
- We offer a range of financing and risk products tailored to meet project needs, including loans, equity, quasi-equity, currency swaps, and local currency products, alongside World Bank and MIGA guarantees and insurance.
- We mobilize funding through IFC’s syndications programs and work with IFC’s Asset Management Company to engage with institutional investors. Our new Managed Co-Lending Portfolio Program (MCPP) Infrastructure program allows large insurers to co-invest with us on a portfolio basis across core infrastructure sectors.
- Our focus is increasingly upstream: advising governments and supporting sector reforms that can translate into private investment for priority projects and sectors. We also help remove bottlenecks to origination and provide one-stop-shop services, including Scaling Solar (for grid-tied solar) and minigrids and distributed generation (for off-grid solar).
- Our team includes specialists in Public-Private Partnerships (PPPs), transaction structuring, risk management, engineering, procurement, stakeholder engagement, communications, and environmental, social, and governance standards.

**Cities Initiative**
IFC’s Cities Initiative offers investment and advisory solutions for emerging market cities: spanning transportation, water services, waste management, green buildings, and other sectors. IFC is also helping cities improve their creditworthiness to attract more private investment for needed urban infrastructure and services.

www.ifc.org/cities

**IFC Sustainability Exchange**
Gathering industry executives, government officials, sustainability specialists, civil society leaders, and community members around the opportunities and challenges related to private sector development in emerging markets, particularly in the infrastructure space.

IFC Global Infrastructure Overview

Energy

- Expertise in a range of electricity generation technologies: solar, wind, hydro, geothermal, and natural gas; plus storage and other emerging technologies. In the past decade, IFC committed and mobilized $31 billion for energy projects.
- Developing and financing Liquefied natural gas (LNG) to power infrastructure projects.

Municipal & Environmental

- Engagements include private sector loans and equity, PPPs, municipal loans, and other support for projects spanning water, sanitation, waste, public transport, and district heating.
- In the past decade, IFC committed and mobilized $4.0 billion for municipal and environmental infrastructure projects.

Minning

- Investment and advisory services to support sustainable business solutions in mining. In the past decade, IFC committed and mobilized $5.2 billion in the mining sector.
- Pioneering investments in copper, gold, iron ore, bauxite, tin, diamonds, and other industrial ores and metals that are ingredients of a low-carbon economy.

Telecom, Media & Technology

- Leader in the telecommunication, media and technology sector in emerging markets, building digital infrastructure, connecting the unconnected, and bridging the digital divide.
- In the past decade, IFC committed and mobilized $6.3 billion across new and follow-on projects in telecommunication, media and technology.

Transport

- Financing for ports, airports, railways, roads, logistics, urban transport, inland waterways, shipping, and airlines.
- In the last decade, IFC committed and mobilized $11.3 billion for transport projects to improve efficiency, relieve bottlenecks, facilitate trade and create jobs.

Sustainability

- Advice to help clients across multiple sectors manage operational risks and increase benefits to communities.
- Training in revenue management, transparency, youth engagement and other issues; guidance on how to foster buy-in around new ideas and processes.

IFC mobilization volumes for the past decade include MIGA mobilization volumes.
