I. INTRODUCTION

This document should be read in conjunction with the International Finance Corporation's (IFC or the Corporation) consolidated financial statements and management’s discussion and analysis issued for the year ended June 30, 2016 (FY16). IFC undertakes no obligation to update any forward-looking statements.

BASIS OF PREPARATION OF IFC’S CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The accounting and reporting policies of IFC conform to accounting principles generally accepted in the United States (GAAP). IFC’s accounting policies are discussed in more detail in Note A to IFC’s Condensed Consolidated Financial Statements as of and for the three and six months ended December 31, 2016 (FY17 YTD Financial Statements).

Management uses income available for designations (Allocable Income) (a non-GAAP measure) as a basis for designations of retained earnings. Allocable Income generally comprises net income excluding net unrealized gains and losses on equity investments and net unrealized gains and losses on non-trading financial instruments accounted for at fair value, income from consolidated entities other than AMC, and expenses reported in net income related to prior year designations.

Financial Ratios 1

Deployable strategic capital (DSC) as a percentage of Total Resources Available (TRA) 5.2% 7.4% 4.4%
External funding liquidity level 462% 559% 504%
Cash and liquid investments as a percentage of next three years’ estimated net cash requirements 83% 80% 85%
Debt to equity ratio 2.8:1 2.7:1 2.8:1
Return on average assets (GAAP-basis) 1.4% 0.8% 0.0%
Return on average capital (GAAP-basis) 5.6% 2.8% (0.1)%

IFC’s DSC as a percentage of TRA was 5.2% at December 31, 2016, as compared with 4.4% at June 30, 2016. The DSC increased in FY17 YTD due to higher Total Resources Available, with the loan, equity and Treasury portfolios all generating income though partially offset by the $101 million designation to IDA, considered in advance for DSC purposes. IFC’s Total Resources Required increased due to growth in the business portfolio, but this was outweighed by the growth in TRA.

1 Returns on average assets are annualized.
IFC’s debt-to-equity ratio was 2.8:1, well within the maximum of 4:1 required by the policy approved by IFC’s Board of Directors. The externally funded liquidity ratio was 462%, above the Board required minimum of 65% and IFC’s overall liquidity as a percentage of the next three years’ estimated net cash needs stood at 83%, above the minimum requirement of the Board of 45%.

III. OVERVIEW OF FINANCIAL RESULTS

International Finance Corporation is the largest global development institution focused on the private sector in developing countries. Established in 1956, IFC is owned by 184 member countries, a group that collectively determines its policies. IFC is a member of the World Bank Group (WBG)2 but is a legal entity separate and distinct from IBRD, IDA, MIGA, and ICSID, with its own Articles of Agreement, share capital, financial structure, management, and staff. Membership in IFC is open only to member countries of IBRD.

The mission of the WBG is defined by two goals:

- To end extreme poverty by reducing the percentage of people living on less than $1.90 a day to no more than 3% globally by 2030; and
- To promote shared prosperity in a sustainable manner by fostering income growth for the bottom 40% of the population of every developing country.

In the year ended June 30, 2016 (FY16), WBG, together with the international community, agreed to support a more ambitious and broader development agenda, including the Sustainable Development Goals (SDGs), the climate change goals at the 21st Conference of Parties (COP21), and the Addis Ababa Action Agenda agreed at the Financing for Development (FfD) conference in Ethiopia.

IFC’s overall strategy remains focused on contributing to the WBG strategy and goals.

IFC helps developing countries achieve sustainable growth by financing private sector investment, mobilizing capital in international financial markets, and providing advisory services to businesses and governments. IFC’s principal investment products are loans and equity investments, with smaller debt securities and guarantee portfolios. IFC also plays an active and direct role in mobilizing additional funding from other investors and lenders through a variety of means. Such means principally comprise: loan participations, parallel loans, sales of loans, the non-IFC portion of structured finance transactions which meet core mobilization criteria, the non-IFC portion of commitments in IFC’s initiatives, and the non-IFC investment portion of commitments in funds managed by IFC’s wholly owned subsidiary, IFC Asset Management Company LLC (AMC), (collectively Core Mobilization). Unlike most other development institutions, IFC does not accept host government guarantees of its exposures. IFC raises virtually all of the funds for its lending activities through the issuance of debt obligations in the international capital markets, while maintaining a small borrowing window with IBRD. Equity investments are funded from capital (or net worth).

IFC’s capital base and its assets and liabilities, other than its equity investments, are primarily denominated in US dollars ($ or US$) or swapped into US dollars but it has a growing portion of debt issuances denominated in currencies other than USD and which are invested in such currencies. Overall, IFC seeks to minimize foreign exchange and interest rate risks arising from its loans and liquid assets by closely matching the currency and rate bases of its assets in various currencies with liabilities having the same characteristics. IFC generally manages non-equity investment related and certain lending related residual currency and interest rate risks by utilizing currency and interest rate swaps and other derivative instruments.

The Management’s Discussion and Analysis contains forward looking statements which may be identified by such terms as “anticipates,” “believes,” “expects,” “intends,” “plans” or words of similar meaning. Such statements involve a number of assumptions and estimates that are based on current expectations, which are subject to risks and uncertainties beyond IFC’s control. Consequently, actual future results could differ materially from those currently anticipated.

FINANCIAL PERFORMANCE SUMMARY

IFC’s net income is affected by a number of factors that can result in volatile financial performance. Global equity markets in emerging economies have been volatile in recent years but have shown improvement in FY17 YTD. In FY16, such markets were generally lower with significant deterioration in FY16 Q1, partially recovering by the end of FY16. In addition, FY17 YTD saw IFC’s major investment currencies remain relatively stable against IFC’s reporting currency, the US$, compared to the significant depreciation experienced in the same period in FY16. FY17 YTD also saw most industrial commodity prices continue to rise from their lows in early 2016, with oil prices increasing significantly in FY17 Q2. The market environment for IFC remains volatile and continues to put pressure on the valuations of IFC’s investments and overall financial results.

Despite the challenging market conditions, IFC was able to record robust realized gains on sales of equity investments, which remained concentrated with seven investments accounting for 45% of the gains. Income from liquid asset trading activities was also significantly higher in FY17 YTD, with the majority of the increase occurring in FY17 Q1 principally due to the narrowing of credit spreads across the portfolio. However, IFC continued to experience high other-than-temporary impairments on equity investments and debt securities, although significantly lower than in FY16 YTD. FY17 YTD impairments were driven largely by geopolitical risks in the Middle East and North Africa, South Asia, and Europe and Central Asia regions as well as some adverse project-specific developments. The provision for losses on loans in FY17 YTD was also lower than the same period in FY16 reflecting a more stable credit quality position in the loan portfolio.

---

2 The other institutions of the World Bank Group are the International Bank for Reconstruction and Development (IBRD), the International Development Association (IDA), the Multilateral Investment Guaranty Agency (MIGA), and the International Centre for Settlement of Investment Disputes (ICSID).
Income Available for Designations (a non-GAAP measure) was $464 million, 59% higher than in FY16 YTD ($292 million).

**SIX MONTHS ENDED DECEMBER 31, 2016**

IFC has reported income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA, and net gains and losses attributable to non-controlling interests of $279 million in the six months ended December 31, 2016 (FY17 YTD), as compared to $124 million in the six months ended December 31, 2015 (FY16 YTD). The $155 million increase in FY17 YTD when compared to FY16 YTD was principally a result of the following:

### Table 2a: Change in Income before Net Unrealized Gains and Losses on Non-Trading Financial Instruments Accounted for at Fair Value, Grants to IDA and Net Gains and Losses Attributable to Non-Controlling Interests FY17 YTD vs FY16 YTD (US$ millions)

</tr>
</tbody>
</table>

Net unrealized gains on non-trading financial instruments accounted for at fair value totaled $368 million in FY17 YTD ($39 million in FY16 YTD) resulting in income before grants to IDA of $647 million in FY17 YTD, as compared to $163 million in FY16 YTD. There were no grants to IDA in FY17 YTD or FY16 YTD. Net gains attributable to non-controlling interests totaled $3 million in FY17 YTD (net losses of $5 million in FY16 YTD).

Accordingly, net income attributable to IFC totaled $644 million in FY17 YTD, as compared with $168 million in FY16 YTD.
THREE MONTHS ENDED DECEMBER 31, 2016

IFC has reported losses before net unrealized gains and losses on non-trading financial instruments accounted for at fair value and grants to IDA, and net gains and losses attributable to non-controlling interests of $160 million in the three months ended December 31, 2016 (FY17 Q2), as compared to losses of $25 million in the three months ended December 31, 2015 (FY16 Q2). The $135 million decrease in income in FY17 Q2 when compared to FY16 Q2 can be analyzed as follows:

Table 2b: Change in Income before Net Unrealized Gains and Losses on Non-Trading Financial Instruments Accounted for at Fair Value, Grants to IDA and Net Gains and Losses Attributable to Non-Controlling Interests FY17 Q2 vs FY16 Q2 (US$ millions)

</tbody>
</table>

Change in income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses attributable to non-controlling interests $ (135)

Net unrealized gains on non-trading financial instruments accounted for at fair value totaled $431 million in FY17 Q2 ($41 million in FY16 Q2) resulting in income before grants to IDA of $271 million in FY17 Q2, as compared to $16 million in FY16 Q2. There were no grants to IDA in FY17 Q2 or FY16 Q2. Net gains attributable to non-controlling interests totaled $1 million in FY17 Q2 (net losses of $3 million in FY16 Q2).

Accordingly, net income attributable to IFC totaled $270 million in FY17 Q2, as compared to net income of $19 million in FY16 Q2.

IFC’s financial performance is detailed more fully in Section VII, Results of Operations.

IV. CLIENT SERVICES

BUSINESS OVERVIEW

IFC fosters sustainable economic growth in developing countries by financing private sector investment, mobilizing capital in the international financial markets, and providing advisory services to businesses and governments.

For all new investments, IFC articulates the expected impact on sustainable development, and, as the projects mature, IFC assesses the quality of the development benefits realized.

IFC’s strategic focus areas are aligned to advance the World Bank Group’s global priorities.

INVESTMENT SERVICES

IFC’s investments are normally made in its developing member countries. The Articles of Agreement mandate that IFC shall invest in productive private enterprise. The requirement for private ownership does not disqualify enterprises that are partly owned by the public sector if such enterprises are organized under local commercial and corporate law, operate free of host government control in a market context and according to profitability criteria, and/or are in the process of being totally or partially privatized.

IFC provides a range of financial products and services to its clients to promote sustainable enterprises, encourage entrepreneurship, and mobilize resources that wouldn’t otherwise be available. IFC’s financing products are tailored to meet the needs of each project. Investment services product lines include: loans, equity investments, trade finance, loan participations, structured finance, client risk management services, and blended finance.

IFC carefully supervises its projects to monitor project performance and compliance with contractual obligations and with IFC’s internal policies and procedures.

ADVISORY SERVICES

It takes more than finance to achieve sustainable private sector development. Advice is a critical part of IFC’s work as a comprehensive solutions provider. IFC’s Advisory Services provides technical and financing knowledge, expertise, and tools to: create markets in fragile and conflict-affected areas and in the poorest countries eligible to borrow from the World Bank’s International Development Association, unlock financing opportunities, and strengthen clients’ performance and development impact.

ASSET MANAGEMENT COMPANY

IFC Asset Management Company, LLC (AMC), a wholly-owned subsidiary of IFC, invests third-party capital and IFC capital, enabling outside investors to benefit from IFC’s expertise in achieving strong equity returns, as well as positive development impact in the countries in which it invests in developing and frontier markets. Investors in funds managed by AMC include sovereign wealth funds, pension funds, multilateral and bilateral development institutions, national development agencies and international financial institutions. AMC helps IFC mobilize additional capital resources for investment in productive private enterprise in developing countries.
At December 31, 2016, AMC managed thirteen funds, with $9.8 billion total funds raised (twelve funds; $8.9 billion at June 30, 2016). The IFC Emerging Asia Fund, LP was added in FY17 Q1.

The Funds Managed by AMC and their activities as of and for the six months ended December 31, 2016 and 2015 can be summarized as follows:

Table 3: Funds Managed by AMC and their Activities FY17 YTD vs FY16 YTD (US$ millions unless otherwise indicated)

INVESTMENT PROGRAM

COMMITMENTS

In FY17 YTD, the Long-Term Finance program was $5,152 million, as compared to $4,896 million in FY16 YTD and Core Mobilization was $3,055 million, as compared to $2,730 million for FY16 YTD, a total increase of 8% reflecting the more favorable investing climate in FY17 YTD.

In addition, the average outstanding balance for Short-Term Finance was $2,944 million at December 31, 2016, as compared to $2,807 million at June 30, 2016.

CORE MOBILIZATION

Core Mobilization is financing from entities other than IFC that becomes available to clients due to IFC’s direct involvement in raising resources. IFC finances only a portion, usually not more than 25%, of the cost of any project. All IFC-financed projects, therefore, require other financial partners. IFC mobilizes such private sector finance from other entities through a number of means, as outlined in the table below.

DISBURSEMENTS

IFC disbursed $5,283 million for its own account in FY17 YTD ($4,990 million in FY16 YTD): $3,267 million of loans ($3,497 million in FY16 YTD), $1,236 million of equity securities ($1,125 million in FY16 YTD), and $780 million of debt securities ($368 million in FY16 YTD).

³ Debt security commitments are included in loans and equity investments based on their predominant characteristics.

⁴ In FY17 YTD, $7 million was mobilized through loan participations by the Women Entrepreneurs Debt Fund, LP (WED Fund) that is managed by AMC.
INVESTMENT PORTFOLIO

The carrying value of IFC’s investment portfolio was $38,473 million at December 31, 2016 ($37,356 million at June 30, 2016), comprising the loan portfolio of $21,993 million ($21,868 million at June 30, 2016), the equity portfolio of $12,975 million ($12,588 million at June 30, 2016), and the debt security portfolio of $3,505 million ($2,900 million at June 30, 2016).

The carrying value of IFC’s investment portfolio comprises: (i) the disbursed investment portfolio; (ii) reserves against losses on loans; (iii) unamortized deferred loan origination fees, net and other; (iv) disbursed amount allocated to a related financial instrument reported separately in other assets or derivative assets; (v) unrealized gains and losses on equity investments held by consolidated variable interest entities; (vi) unrealized gains and losses on investments accounted for at fair value as available-for-sale; and (vii) unrealized gains and losses on investments.

GUARANTEES AND PARTIAL CREDIT GUARANTEES

IFC offers partial credit guarantees to clients covering, on a risk-sharing basis, client obligations on bonds and/or loans. IFC’s guarantee is available for debt instruments and trade obligations of clients and covers commercial as well as noncommercial risks. IFC will provide local currency guarantees, but when a guarantee is called, the client will generally be obligated to reimburse IFC in US dollar terms. Guarantee fees are consistent with IFC’s loan pricing policies.

Guarantees of $3,664 million were outstanding (i.e., not called) at December 31, 2016 ($3,478 million at June 30, 2016).

V. LIQUID ASSETS

All liquid assets are managed according to an investment authority approved by the Board of Directors and liquid asset investment guidelines approved by IFC’s Corporate Risk Committee, a subcommittee of IFC’s Management Team.

IFC funds its liquid assets from two sources, borrowings from the market (funded liquidity) and capital (net worth). Liquid assets are managed in a number of portfolios related to these sources.

IFC invests its liquid assets generally in highly rated fixed and floating rate instruments issued by, or unconditionally guaranteed by, governments, government agencies and instrumentalities, multilateral organizations, and high quality corporate issuers; these include asset-backed securities and mortgage-backed securities, time deposits, and other unconditional obligations of banks and financial institutions. Diversification across multiple dimensions ensures a favorable risk return profile. IFC has a flexible approach to managing the liquid assets portfolios by making investments on an aggregate portfolio basis against its benchmarks within specified risk parameters. In implementing these portfolio management strategies, IFC utilizes derivative instruments, principally currency and interest rate swaps and futures and options, and takes positions in various industry sectors and countries.

IFC’s liquid assets are accounted for as trading portfolios. The net asset value of the liquid assets portfolio was $39.5 billion at December 31, 2016 ($41.4 billion at June 30, 2016). The decrease in FY17 YTD was principally due to the use of liquid assets to fund the excess of borrowing retirements over new issuances.

FUNDED LIQUIDITY

The primary funding source for liquid assets for IFC is borrowings from market sources. Proceeds of borrowings from market sources not immediately disbursed for loans and loan-like debt securities (Funded Liquidity) are managed internally against money market benchmarks. A small portion of Funded Liquidity is managed by third parties with the same benchmark as that managed internally.

MANAGED NET WORTH

The second funding source of liquid assets is that portion of IFC’s net worth not invested in equity and equity-like investments (Managed Net Worth) which is managed against a U.S. Treasury benchmark. A portion of these assets are managed by third parties with the same benchmark as that part managed internally.

For FY17 YTD, income from liquid assets trading activities\(^5\) from Funded Liquidity was $443 million while Managed Net Worth returned a loss of $19 million.

VI. FUNDING RESOURCES

BORROWINGS

The major source of IFC’s borrowings is the international capital markets. Under the Articles of Agreement, IFC may borrow in the public markets of a member country only with approvals from that member, together with the member in whose currency the borrowing is denominated.

IFC’s new medium and long-term borrowings (after the effect of borrowing-related derivatives) totaled $8.4 billion during FY17 YTD ($6.8 billion in FY16 YTD).

IFC is increasingly using its borrowings issuances as a tool to promote capital markets development in emerging and frontier markets. Proceeds of these issuances not disbursed into loans have primarily been invested in securities of the related sovereign and sovereign

\(^5\) Reported gross of borrowing costs and excluding foreign exchange gains and losses on local currency Funded Liquidity which are reported separately from income from liquid assets trading activities in foreign currency gains and losses on non-trading activities and the effects of internal trades related to foregone swapping of market borrowings and Funded Liquidity in certain currencies.
instrumentalities in the currency of the issuances. As a result, borrowings from market sources at December 31, 2016 that have not been swapped amounted to 4% of the total borrowings from market sources (5% at June 30, 2016 and 6% at June 30, 2015).

Market borrowings are generally swapped into floating-rate obligations denominated in US dollars. IFC’s mandate to help develop domestic capital markets can result in raising local currency funds. As of December 31, 2016, $1.9 billion ($2.3 billion as of December 31, 2015) of such non-US$ denominated market borrowings were outstanding, denominated in Chinese Renminbi, Dominican Pesos, Indian Rupees, Namibian dollar, New Zambian Kwacha, Nigerian Naira, Russian Ruble and Rwanda Francs. Proceeds of such borrowings were invested in such local currencies, on-lent to clients and/or partially swapped into US dollars.

IFC has short term discount note programs in US$, Chinese renminbi and Turkish lira to provide an additional funding and liquidity management tool for IFC in support of certain of IFC’s trade finance and supply chain initiatives and to expand the availability of short term local currency finance. The discount note programs provide for issuances with maturities ranging from overnight to one year. During FY17 YTD, IFC issued $6.8 billion of discount notes and $2.5 billion were outstanding as of December 31, 2016 under the short-term discount note programs.

**CAPITAL AND RETAINED EARNINGS**

As of December 31, 2016, IFC’s authorized capital was $2.58 billion ($2.58 billion - June 30, 2016), of which $2.57 billion was subscribed and paid in at December 31, 2016 ($2.57 billion at June 30, 2016).

</tbody>
</table>

**DESIGNATIONS OF RETAINED EARNINGS**

Amounts available to be designated are determined based on a Board of Directors-approved income-based formula and, beginning in the year ended June 30, 2008, on a principles-based Board of Directors-approved financial distribution policy, and are approved by the Board of Directors.

In November 2016, IFC’s Board of Directors approved a change to the sliding-scale formula and the methodology used for calculating the incremental rate of designation, beginning in FY17. The revised approach establishes a threshold that no designations of any kind can take place if IFC’s DSC ratio is below 2% and establishes a framework for prioritizing future designations to advisory services and for transfers to IDA based on IFC’s DSC ratio and a cushion for advisory services.

The revised approach also establishes a maximum cumulative amount that can be contributed to IDA, during the IDA 18 Replenishment, of $300 million, with no more than $100 million in any given year (plus any shortfall from earlier years).

The approach also caps transfers to IDA during a fiscal year at IFC’s Net Income, if any, for the nine months ended March 31 of that fiscal year with actual transfer to occur in June of that fiscal year. Any amounts designated the prior year and not transferred pursuant to this requirement would be deferred to the next fiscal year. Transfers to IDA will also be deferred to the next fiscal year if capital as reported on IFC’s consolidated balance sheet has declined between June 30 of the prior fiscal year and March 31 of that fiscal year.

IFC recognizes designations of retained earnings for advisory services when the Board of Directors approves it and recognizes designation of retained earnings for grants to IDA when it is noted with approval by the Board of Governors. Expenditures for the various approved designations are recorded as expenses in IFC’s condensed consolidated income statement in the year in which they occur, and have the effect of reducing retained earnings designated for this specific purpose.
On August 04, 2016, the Board of Directors approved a designation of $101 million of IFC’s retained earnings for grants to IDA and a designation of $60 million of IFC’s retained earnings for Advisory Services. These designations were noted with approval by the Board of Governors on October 07, 2016.

On January 24, 2017, IFC recognized grants to IDA of $101 million on the signing of a grant agreement between IDA and IFC concerning the transfer to IDA and use of funds corresponding to the designation of retained earnings for grants to IDA approved by IFC’s Board of Directors on August 04, 2016 and noted with approval by IFC’s Board of Governors on October 07, 2016. There were no grants to IDA recorded in FY17 YTD and FY16 YTD.

VII. RESULTS OF OPERATIONS

OVERVIEW

The overall market environment has a significant influence on IFC’s financial performance. The main elements of IFC’s net income (loss) and comprehensive income (loss) and influences on the level and variability of net income and comprehensive income (loss) from year to year are:

Change in income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses attributable to non-controlling interests: $155

Income before net unrealized gains and losses on non-trading financial instruments accounted for at fair value, grants to IDA and net gains and losses attributable to non-controlling interests | $279 | $124 |

Net unrealized gains on non-trading financial instruments accounted for at fair value | 368 | 39 |

Net Income | 647 | 163 |

Net (gains)/losses attributable to non-controlling interests | (3) | 5 |

Net Income attributable to IFC | $644 | $168 |

A more detailed analysis of the components of IFC’s net income follows.

**INCOME FROM LOANS AND GUARANTEES, INCLUDING REALIZED GAINS AND LOSSES ON LOANS AND ASSOCIATED DERIVATIVES**

IFC’s primary interest earning asset is its loan portfolio. Income from loans and guarantees, including realized gains and losses on loans and associated derivatives for FY17 YTD totaled $641 million, compared with $545 million in FY16 YTD, an increase of $96 million.

The disbursed loan portfolio increased $39 million from $23,910 million at June 30, 2016 to $23,949 million at December 31, 2016. The increase in the loan portfolio is due to new disbursements exceeding repayments ($421 million in FY17 YTD) was partially offset by the reduction in loans outstanding due to currency exchange rate fluctuations ($188 million in FY17 YTD) as IFC’s reporting currency, the US dollar appreciated against most of IFC’s lending currencies in FY17 YTD. The remainder of the change is primarily due to write-offs and conversions.

The weighted average contractual interest rate on loans at December 31, 2016 was 5.3% (5.1% as of June 30, 2016), up from 5.0% at December 31, 2015.

Table 9: FY17 YTD Change in Income from Loans and Guarantees, including Realized Gains and Losses on Loans and Associated Derivatives (US$ millions)  

| Change in Income from loans and guarantees, including realized gains and losses on loans and associated derivatives in FY17 YTD | $545 |
| Increase due to higher recognition of deferred interest | $68 |
| Increase due to higher recognition of deferred interest | $62 |
| Increase due to lower amount of interest reversed on non-accruing loans, net | $14 |
| Decrease due to higher realized losses on loans | $(35) |
| Decrease due to lower income from participation notes and other income | $(9) |
| Decrease due to lower commitment and financial fees | $(4) |

Change in Income from loans and guarantees, including realized gains and losses on loans and associated derivatives | $96 |

Income from loans and guarantees, including realized gains and losses on loans and associated derivatives in FY17 YTD | $641 |
The increase in the recognition of deferred interest is primarily due to $67 million of previously capitalized and deferred interest that was recognized in FY17 YTD as a result of a $127 million prepayment.

The increase in realized losses is primarily due to a $30 million write-off of a loan accounted for under the fair value option in FY17 Q2.

**INCOME FROM EQUITY INVESTMENTS AND ASSOCIATED DERIVATIVES**

Income from the equity investment portfolio, including associated derivatives, decreased by $77 million from $266 million in FY16 YTD to $189 million in FY17 YTD.

IFC sells equity investments where IFC’s developmental role is complete, where pre-determined sales trigger levels have been met and, where applicable, lock ups have expired. Gains on equity investments and associated derivatives comprise realized and unrealized gains.

IFC recognized realized gains on equity investments and associated derivatives in the form of cash and non-monetary considerations for FY17 YTD of $574 million, as compared with $757 million for FY16 YTD, a decrease of $183 million. Realized gains on equity investments and associated derivatives are concentrated in a small number of investments. In FY17 YTD, there were seven investments that generated individual capital gains in excess of $20 million for a total of $257 million, or 45%, of the FY17 YTD realized gains, compared to six investments that generated individual capital gains in excess of $20 million for a total of $568 million, or 75%, of the FY16 YTD realized gains.

Dividend income in FY17 YTD totaled $85 million, as compared with $90 million in FY16 YTD. Dividend income in FY17 YTD included returns from two unincorporated joint venture (UJVs) in the oil, gas and mining sectors accounted for under the cost recovery method, which totaled $6 million, as compared with $7 million from two such UJVs in FY16 YTD.

Other-than-temporary impairments on equity investments totaled $312 million in FY17 YTD, as compared with $441 million in FY16 YTD, a decrease of $129 million. The largest amount of write-downs in FY17 YTD were from the Europe and Central Asia region (19%), South Asia region (17%), and Middle East and North Africa region (17%). There were also 10 individual equity write-downs in FY17 YTD greater than $10 million primarily in the manufacturing, agribusiness, and services and financial markets sectors.

Net unrealized losses on equity investments and associated derivatives totaled $160 million (Net unrealized losses of $143 million in FY16 YTD) reflecting the realization of capital gains and the challenging macro environment for emerging market equities which has negatively impacted the value of many of IFC’s equity investments accounted for at fair value in net income.

**INCOME FROM DEBT SECURITIES AND REALIZED GAINS AND LOSSES ON DEBT SECURITIES AND ASSOCIATED DERIVATIVES**

Income from debt securities and realized gains and losses on debt securities and associated derivatives increased to $97 million in FY17 YTD from $69 million in FY16 YTD. The largest change was higher interest income ($21 million) in FY17 YTD when compared with FY16 YTD due to higher average balances.

**PROVISION FOR LOSSES ON LOANS, GUARANTEES AND OTHER RECEIVABLES**

The quality of the loan portfolio, as measured by the weighted average country risk ratings and the weighted average credit risk ratings, deteriorated in FY17 Q1 but stabilized by the end of FY17 Q2. Non-performing loans (NPLs) decreased by $126 million, from $1,712 million of the disbursed loan portfolio at June 30, 2016 to $1,586 million at December 31, 2016. The decrease of $126 million comprised $205 million of loans and loan-like debt securities being placed in NPL status, $295 million being removed from NPL status and $36 million reduction due to repayments and currency translation adjustments. In FY17 YTD, 6 loans greater than $10 million, totaling $163 million, were placed in NPL status.

IFC recorded a net provision for losses on loans, guarantees and other receivables of $63 million in FY17 YTD ($74 million of specific provisions on loans, $0 of portfolio provisions on loans, and $11 million release of provision on guarantees and other receivables) as compared to a provision of $195 million in FY16 YTD ($179 million of specific provisions for losses on loans; $15 million of portfolio provisions for losses on loans; and net $1 million of provision for losses on guarantees and other receivables). Project-specific developments on 6 loans comprised 88% of the specific provision for losses on loans in FY17 YTD (excluding recoveries).

At December 31, 2016, IFC’s total reserves against losses on loans were $1,717 million or 7.2% of the disbursed loan portfolio ($1,775 million or 7.4% at June 30, 2016), a decrease of $58 million from June 30, 2016. The decrease in reserves against losses on loans is due to write-offs of $123 million and foreign exchange gains related to reserves held against non-U.S. dollar denominated loans of $15 million exceeding provisions of $74 million and recoveries ($1 million) and other adjustments ($5 million).

Specific reserves against losses on loans at December 31, 2016 of $913 million ($965 million at June 30, 2016) are held against impaired loans of $1,753 million ($1,752 million at June 30, 2016), a coverage ratio of 52% (55% at June 30, 2016).

**INCOME FROM LIQUID ASSET TRADING ACTIVITIES**

The liquid assets portfolio, net of derivatives and securities lending activities, decreased by $1.9 billion from $41.4 billion at June 30, 2016, to $39.5 billion at December 31, 2016. Gross income from liquid asset trading activities totaled $424 million in FY17 YTD compared to $113 million in FY16 YTD, an increase of $311 million.

---

6 Includes $73 million reported as debt securities on the Balance Sheet as of December 31, 2016 ($66 million - June 30, 2016).
Interest income in FY17 YTD totaled $275 million, unchanged from FY16 YTD. In addition, the portfolio of ABS and MBS experienced fair value gains totaling $22 million in FY17 YTD. Holdings in other products, including US Treasuries, global government bonds, high quality corporate bonds and derivatives generated $127 million of gains in FY17 YTD, a total gain of $149 million (realized and unrealized). This compares to a total loss (realized and unrealized) of $162 million in FY16 YTD.

In FY17 YTD, the liquid assets portfolios outperformed their benchmarks by $240 million with the majority of this amount occurring in FY17 Q1. In FY17 Q2, capital markets volatility spiked due to the U.S. election results. The 10-year U.S. Treasury yield rose 85 bps over the quarter and traversed a 100 bps range during the quarter. The S&P 500 index rose 3.3% and traversed an 8.9% range. Economic data continued to surprise to the upside across several jurisdictions, supporting the outlook for economic growth to improve and inflation to rise. The Federal Reserve increased the target Fed Funds rate by 25 bps in December as was widely anticipated; however, the outlook for further increases rose, and the yield on the 2-year U.S. Treasury rose with them by 43 bps. Credit spreads generally tightened led by lower quality credits.

The net impact of these market movements on liquid assets was a significantly smaller contribution to net income than in FY17 Q1. The increase in Treasury yields resulted in a loss of $23.9 million in the portion of the treasury managed portion of IFC’s net worth that tracks the U.S. Treasury 1 to 3-year index. Somewhat higher LIBOR fixings contributed to an increase in gross income earned on liquid assets. The amount of the increase in LIBOR was substantially less than that realized in FY17 Q1, however. Higher market volatility weighed on the portion of funded liquidity invested in Agency MBS, while tighter credit spreads for high-quality securitized products enabled those portions of the portfolio to outperform the benchmark by a substantial margin, albeit less so than in FY17 Q1. Performance was further supported by money market investments in foreign currencies (hedged) that benefitted from strong USD funding demand.

At December 31, 2016, trading securities with a fair value of $19 million are classified as Level 3 securities ($68 million - June 30, 2016).

**CHARGES ON BORROWINGS**

IFC’s charges on borrowings increased by $155 million, from $166 million in FY16 YTD (net of $2 million gain on extinguishment of borrowings) to $321 million in FY17 YTD (net of $1 million gain on extinguishment of borrowings), largely attributable to rising LIBOR rates, and the continuation of the phenomenon of USD swap curve tightening which began in FY16 and which has led to widening borrowing costs in LIBOR terms for the SSA (Sovereigns, Supranational and Agency) market. Although this widening in borrowing spreads was less pronounced that in the latter part of FY16, issuance levels vs. LIBOR for medium to long term funding in USD remained positive throughout FY17 YTD.

**OTHER INCOME**

Other income of $228 million for FY17 YTD was $17 million higher than in FY16 YTD ($211 million). There were higher returns on the Post Employment Benefit Plan (PEBP) assets which are partly invested in global equities and reflected the more favorable market for equity investments in FY17 YTD as compared to the same period in FY16 YTD.

Other income also includes management and other fees from IFC’s consolidated subsidiary, AMC, of $42 million ($33 million in FY16 YTD) and income from Advisory Services, predominantly contributions from donors, of $119 million ($109 million in FY16 YTD).

**OTHER EXPENSES**

Administrative expenses (the principal component of other expenses) increased by $23 million from $491 million in FY16 YTD to $514 million in FY17 YTD. The increase in FY17 YTD is due to higher salary costs and higher variable expenses, primarily consultants and contractual services. Administrative expenses include the grossing-up effect of certain revenues and expenses attributable to IFC’s reimbursable program and expenses incurred in relation to workout situations of $10 million in FY17 YTD ($12 million in FY16 YTD).

IFC recorded expenses from pension and other postretirement benefit plans in FY17 YTD of $146 million, compared with $92 million in FY16 YTD. This increase was driven by higher service cost and higher amortization of unrecognized net actuarial losses resulting largely from the decrease in the discount rates used to determine the projected benefit obligation.

Advisory services expenses totaled $139 million in FY17 YTD ($128 million in FY16 YTD).

**FOREIGN CURRENCY TRANSACTION GAINS AND LOSSES ON NON-TRADING ACTIVITIES**

Foreign currency transaction losses in FY17 YTD totaled $99 million (gains of $12 million in FY16 YTD). Foreign currency transaction losses on debt securities accounted for as available-for-sale in the amount of $8 million in FY17 YTD (losses of $71 million in FY16 YTD) are reported in Other Comprehensive Income, while gains and losses on the derivatives economically hedging such debt securities are reported in net income.

Largely due to IFC having a small population of unhedged non-U.S. dollar-denominated loans and debt securities and the U.S. dollar strengthening against such currencies, IFC has recorded overall foreign exchange related losses in a combination of Net Income and Other Comprehensive Income of $107 million in FY17 YTD (losses of $59 million in FY16 YTD).

**NET UNREALIZED GAINS AND LOSSES ON NON-TRADING FINANCIAL INSTRUMENTS**

IFC accounts for certain financial instruments at fair value with unrealized gains and losses on such financial instruments being reported in net income, namely: (i) all market borrowings that are economically hedged with financial instruments that are accounted for at fair value with changes therein reported in net income; (ii) unrealized gains and losses on certain loans, debt securities and associated derivatives; and (iii) borrowings from IDA.
the overall positive market conditions (equity, commodities and foreign exchange) in FY17 YTD. Unrealized gains of $66 million were available for sale early in FY17 Q1.

Environment that existed in FY17 Q2 when compared to FY17 Q1 and larger realizations of gains on equity investments accounted for as

Table 11: Change in Other Comprehensive Income (Loss) - Unrealized Gains and Losses on Equity Investments and Debt Securities FY17 YTD vs FY16 YTD (US$ millions)

</table>

Changes in the fair value of IFC’s borrowings from market, IDA and associated derivatives, net, includes the impact of changes in IFC’s own credit spread when measured against US$ LIBOR. As credit spreads widen, unrealized gains are recorded and when credit spreads narrow, unrealized losses are recorded (notwithstanding the impact of other factors, such as changes in risk-free interest and foreign currency exchange rates). The magnitude and direction (gain or loss) can be volatile from period to period but do not alter the cash flows. IFC’s policy is to generally match currency, amount and timing of cash flows on market borrowings with cash flows on associated derivatives entered into contemporaneously.

In FY17 YTD, there was a sell-off in the U.S. fixed income market, resulting in the benchmark 5 year U.S. Treasury bond rate rising from approximately 1 percent at the beginning of the fiscal year to approximately 2 percent at the end of December 2016. Consequently, IFC recorded unrealized gains of $1.3 billion on market borrowings in FY17 YTD, more than offsetting $1.2 billion of losses recorded on derivatives associated with market borrowings. At the end of FY17 YTD, the cost of economically hedging borrowings in US dollars, Australian dollars, and New Zealand dollars was marginally more favorable to IFC as compared to the end of FY16 YTD. Additionally, credit spreads for IFC borrowing issuances were narrower than at the end of FY16 YTD. As a result, IFC has reported net $89 million of unrealized gains on borrowings and associated derivatives in FY17 YTD (net $107 million of unrealized gains in FY16 YTD).

IFC reported net unrealized gains on loans, debt securities and associated derivatives of $279 million in FY17 YTD (net unrealized losses of $68 million in FY16 YTD). In FY17 YTD this comprised unrealized gains of $18 million on the loan and debt securities portfolio carried at fair value, unrealized gains of $182 million on asset liability management swaps, and unrealized gains of $79 million on other derivatives, mainly conversion features, warrants in investment contracts and interest rate and currency swaps hedging client obligations. The unrealized gains of $182 million on asset liability management swaps is driven by the increase in value of the pay fixed and receive floating swaps as LIBOR rates have increased.

**OTHER COMPREHENSIVE INCOME (OCI)**

**UNREALIZED GAINS AND LOSSES ON EQUITY INVESTMENTS AND DEBT SECURITIES**

IFC’s investments in debt securities and equity investments that are listed in markets that provide readily determinable fair values are classified as available-for-sale, with unrealized gains and losses on these investments being reported in OCI until realized. When realized, the gain or loss is transferred to net income. Changes in unrealized gains and losses on equity investments and debt securities reported in OCI are significantly impacted by (i) the global environment for emerging markets; and (ii) the realization of gains on sales of such equity investments and debt securities.

</tbody>
</table>

Net unrealized gains on equity investments arising in FY17 YTD totaled $19 million, mainly due to increases in equity fair values reflecting the overall positive market conditions (equity, commodities and foreign exchange) in FY17 YTD. Unrealized gains of $66 million were reported in FY17 Q1 and unrealized losses of $12 million were reported in FY17 Q2, reflecting the significantly weaker emerging markets environment that existed in FY17 Q2 when compared to FY17 Q1 and larger realizations of gains on equity investments accounted for as available for sale early in FY17 Q1.
VIII. GOVERNANCE AND CONTROL

SENIOR MANAGEMENT CHANGES

The following is a list of the principal officers of IFC as of December 31, 2016 and June 30, 2016.

President ................................................................. Dr. Jim Yong Kim
Executive Vice President and CEO ........................................ Philippe Le Houérou
Vice President, Global Client Services ........................................ Dimitris Tsitsiragos (*)
Vice President, Global Client Services ........................................ Nena Stoiljkovic (*)
Vice President, Corporate Risk & Sustainability and General Counsel ........................................ Ethiopis Tafara (*)
Vice President, Corporate Risk & Sustainability ........................................ Saran Kebet-Koulbaly (*)
Vice President, Treasury and Syndications ........................................ Jingdong Hua
Vice President, CEO, IFC Asset Management Company LLC (a wholly-owned subsidiary of IFC) ........... Gavin E.R. Wilson

(*) In October 2016, IFC announced the following changes to the leadership structure to better align IFC’s business objectives and vision. These changes became effective on January 1, 2017.

- Dimitris Tsitsiragos became Vice President, New Business
- Nena Stoiljkovic became Vice President, Blended Finance and Partnerships
- Saran Kebet-Koulbaly became Vice President, Portfolio
- Stephanie von Friedeburg became Vice President, Corporate Strategy & Resources
- Ethiopis Tafara remains General Counsel and Vice President, Legal, Compliance Risk, and ESG Sustainability

In November 2016, IFC announced the appointment of Mohamed Gouled as Vice President, Risk and Financial Sustainability. His appointment became effective on January 2, 2017.

In addition to the above, IFC has announced that Hans Peter Lankes was appointed Vice President, Economics and Private Sector Development effective January 23, 2017.

AUDITOR INDEPENDENCE

The appointment of the external auditor for IFC is governed by a set of Board-approved principles that previously included prohibiting the external auditor from providing any non audit-related services. On December 7, 2016, the Board approved amendments to the policy on the appointment of an external auditor which will come into effect for the FY19 audit period. The primary amendments now permit the external auditor to provide non-prohibited non-audit related services subject to monetary limits. Broadly, the list of prohibited non-audit services include those that would put the external auditor in the roles typically performed by management or in a position of auditing their own work, such as accounting services, internal audit services, and provision of investment advice. The total non-audit services fees over the term of the relevant external audit contract shall not exceed 70 percent of the audit fees over the same period.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

PURPOSE

The International Finance Corporation (IFC), an international organization, was established in 1956 to further economic development in its member countries by encouraging the growth of private enterprise. IFC is a member of the World Bank Group (WBG), which also comprises the International Bank for Reconstruction and Development (IBRD), the International Development Association (IDA), the Multilateral Investment Guarantee Agency (MIGA), and the International Centre for Settlement of Investment Disputes (ICSID). Each member is legally and financially independent. Transactions with other World Bank Group members are disclosed in the notes that follow. IFC’s activities are closely coordinated with and complement the overall development objectives of the other World Bank Group institutions. IFC, together with private investors, assists in financing the establishment, improvement and expansion of private sector enterprises by making loans, equity investments and investments in debt securities where sufficient private capital is not otherwise available on reasonable terms. IFC’s share capital is provided by its member countries. It raises most of the funds for its investment activities through the issuance of notes, bonds and other debt securities in the international capital markets. IFC also plays a catalytic role in mobilizing additional funding from other investors and lenders through parallel loans, loan participations, partial credit guarantees, securitizations, loan sales, risk sharing facilities, and fund investments through the IFC Asset Management Company, LLC and other IFC crisis initiatives. In addition to project finance and mobilization, IFC offers an array of financial and technical advisory services to private businesses in the developing world to increase their chances of success. It also advises governments on how to create an environment hospitable to the growth of private enterprise and foreign investment.

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING AND RELATED POLICIES

The Condensed Consolidated Financial Statements include the financial statements of IFC and consolidated subsidiaries as detailed in Note B. The accounting and reporting policies of IFC conform with accounting principles generally accepted in the United States of America (US GAAP). In the opinion of management, the Condensed Consolidated Financial Statements reflect all adjustments necessary for the fair presentation of IFC’s financial position and results of operation.

Advisory services – Funding received for IFC advisory services from governments and other donors are recognized as contribution revenue when the conditions on which they depend are substantially met. Advisory services expenses are recognized in the period incurred. Advisory client fees and administration fees are recognized as income when earned. See Notes L and N.

Functional currency – IFC’s functional currency is the United States dollar (US dollars or $).

Use of estimates – The preparation of the Condensed Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Condensed Consolidated Financial Statements and the reported amounts of income and expense during the reporting periods. Actual results could differ from these estimates. A significant degree of judgment has been used in the determination of: the reserve against losses on loans and impairment of debt securities and equity investments; estimated fair values of financial instruments accounted for at fair value (including equity investments, debt securities, loans, trading securities and derivative instruments); projected benefit obligations, fair value of pension and other postretirement benefit plan assets, and net periodic pension income or expense. There are inherent risks and uncertainties related to IFC’s operations. The possibility exists that changing economic conditions could have an adverse effect on the financial position of IFC.

IFC uses internal models to determine the fair values of derivative and other financial instruments and the aggregate level of the reserve against losses on loans and impairment of equity investments. IFC undertakes continuous review and analysis of these models with the objective of refining its estimates, consistent with evolving best practices appropriate to its operations. Changes in estimates resulting from refinements in the assumptions and methodologies incorporated in the models are reflected in net income in the period in which the enhanced models are first applied.

Consolidation, non-controlling interests and variable interest entities – IFC consolidates:

i) all majority-owned subsidiaries;

ii) limited partnerships in which it is the general partner, unless the presumption of control is overcome by certain management participation or other rights held by minority shareholders/limited partners; and

iii) variable interest entities (VIEs) for which IFC is deemed to be the VIE’s primary beneficiary (together, consolidated subsidiaries).

Significant intercompany accounts and transactions are eliminated in consolidation.

Equity interests in consolidated subsidiaries held by third parties are referred to as non-controlling interests. Such interests and the amount of consolidated net income/loss attributable to those interests are identified within IFC’s condensed consolidated balance sheet and condensed consolidated income statement as “non-controlling interests” and “net gains/losses attributable to non-controlling interests”, respectively.

An entity is a VIE if:

i) its equity is not sufficient to permit the entity to finance its activities without additional subordinated financial support from other parties;

ii) its equity investors do not have decision-making rights about the entity’s operations; or

iii) its equity investors do not absorb the expected losses or receive the expected returns of the entity proportionally to their voting rights.

A variable interest is a contractual, ownership or other interest whose value changes as the fair value of the VIE’s net assets change. IFC’s variable interests in VIEs arise from financial instruments, service contracts, guarantees, leases or other monetary interests in those entities.

IFC is considered to be the primary beneficiary of a VIE if it has the power to direct the VIE’s activities that most significantly impact its economic performance and the obligation to absorb losses of or the right to receive benefits from the VIE that could potentially be significant to the VIE.
Prior to the adoption, effective July 1, 2015, of the Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2015-02, *Amendments to the Consolidation Analysis*, IFC was considered to be the primary beneficiary of a VIE if it had the power to direct the VIE's activities that most significantly impact its economic performance and the obligation to absorb losses of or the right to receive benefits from the VIE that could potentially have been significant to the VIE unless:

i) the entity had the attributes of an investment company or for which it is industry practice to account for their assets at fair value through earnings;

ii) IFC had an explicit or implicit obligation to fund losses of the entity that could potentially have been significant to that entity; and

iii) the entity was a securitization vehicle, an asset-backed financing entity, or an entity that was formerly considered a qualifying special purpose entity, as well as entities that were required to comply with or operate in accordance with requirements that are similar to those included in Rule 2a-7 of the Investment Company Act of 1940.

In those cases, IFC was considered to be the primary beneficiary if it would absorb the majority of the VIE’s expected losses or expected residual returns. See “Recently adopted accounting standards” in this Note A and Note M for more information regarding the adoption of ASU 2015-02. IFC has a number of investments in VIEs that it manages and supervises in a manner consistent with other portfolio investments.

**Fair Value Option and Fair Value Measurements** – IFC has adopted FASB Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurements and Disclosures* (ASC 820) and the *Fair Value Option* subsections of ASC Topic 825, *Financial Instruments* (ASC 825 or the *Fair Value Option*). ASC 820 defines fair value, establishes a framework for measuring fair value and a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels and applies to all items measured at fair value, including items for which impairment measures are based on fair value. ASC 825 permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value on an instrument-by-instrument basis, that are not otherwise permitted to be accounted for at fair value under other accounting standards. The election to use the Fair Value Option is available when an entity first recognizes a financial asset or liability or upon entering into a firm commitment.

**The Fair Value Option**

IFC has elected the Fair Value Option for the following financial assets and financial liabilities:

i) investees in which IFC has significant influence:
   a) direct investments in securities issued by the investee and, if IFC would have otherwise been required to apply equity method accounting, all other financial interests in the investee (e.g., loans);
   b) investments in Limited Liability Partnerships (LLPs), Limited Liability Companies (LLCs) and other investment fund structures that maintain specific ownership accounts and loans or guarantees to such;

ii) direct equity investments representing 20 percent or more ownership but in which IFC does not have significant influence;

iii) all equity interests in private equity funds;

iv) certain hybrid instruments in the investment portfolio;

v) all market borrowings and investments in certain debt securities that are economically hedged with financial instruments that are accounted for at fair value with changes therein reported in earnings; and

vi) borrowings from IDA.

All borrowings and investments in debt securities for which the Fair Value Option has been elected are economically hedged with derivative or other financial instruments that are accounted for at fair value with changes in fair value reported in earnings as such changes occur. Measuring at fair value those borrowings and investments for which the Fair Value Option has been elected mitigates the earnings volatility that would otherwise occur, due to measuring the borrowings and investments and related economic hedges differently, without having to apply ASC Topic 815’s, *Derivatives and Hedging* (ASC 815) complex hedge accounting requirements.

Measuring at fair value those equity investments that would otherwise require equity method accounting simplifies the accounting and renders a carrying amount on the consolidated balance sheet based on a measure (fair value) that IFC considers preferable to equity method accounting. For the investments that otherwise would require equity method accounting for which the Fair Value Option is elected, ASC 825 requires the Fair Value Option to also be applied to all eligible financial interests in the same entity. IFC has disbursed loans to certain of such investees; therefore, the Fair Value Option is also applied to those loans. IFC elected the Fair Value Option for equity investments with 20% or more ownership where it does not have significant influence so that the same measurement method (fair value) will be applied to all equity investments with more than 20% ownership.

The FVO has been elected for certain hybrid instruments in the investment portfolio that would otherwise require bifurcation of the host and embedded derivative. Election of the FVO for these instruments eliminates the bifurcation requirement.

**Equity securities held by consolidated subsidiaries that are investment companies**

Pursuant to ASC Topic 946, *Financial Services - Investment Companies* (ASC 946) and ASC Topic 810, Consolidation, equity securities held by consolidated subsidiaries that are investment companies are accounted for at fair value, with unrealized gains and losses reported in earnings.

**Fair Value Measurements**

ASC 820 defines fair value as the price that would be received to sell an asset or transfer a liability (i.e., an exit price) in an orderly transaction between independent, knowledgeable and willing market participants at the measurement date assuming the transaction occurs in the entity’s principal (or most advantageous) market. Fair value must be based on assumptions market participants would use (inputs) in determining the price and measured assuming that market participants act in their economic best interest, therefore, their fair values are determined based on a transaction to sell or transfer the asset or liability on a standalone basis. Under ASC 820, fair value measurements are not adjusted for transaction costs.

Notwithstanding the following paragraph, pursuant to ASC Topic 320, *Investments - Debt and Equity Securities* (ASC 320), IFC reports equity investments that are listed in markets that provide readily determinable fair values at fair value, with unrealized gains and losses being reported in other comprehensive income.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

ASC 820 established a fair value hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical unrestricted assets and liabilities (Level 1), the next highest priority to observable market based inputs or unobservable inputs that are corroborated by market data from independent sources (Level 2) and the lowest priority to unobservable inputs that are not corroborated by market data (Level 3). Fair value measurements are required to maximize the use of available observable inputs.

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date. It includes IFC’s debt securities and equity investments, which are listed in markets that provide readily determinable fair values, government issues and money market funds in the liquid assets portfolio, and market borrowings that are listed on exchanges.

Level 2: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly for substantially the full term of the asset or liability. It includes financial instruments that are valued using models and other valuation methodologies. These models consider various assumptions and inputs, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity and current market and contractual pricing for the underlying asset, as well as other relevant economic measures. Substantially all of these inputs are observable in the market place, can be derived from observable data or are supported by observable levels at which market transactions are executed. Financial instruments categorized as Level 2 include non-exchange-traded derivatives such as interest rate swaps, cross-currency swaps, certain asset-backed securities, as well as the majority of trading securities in the liquid asset portfolio, and the portion of IFC’s borrowings accounted for at fair value not included in Level 1.

Level 3: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. It consists of financial instruments whose fair value is estimated based on internally developed models or methodologies utilizing significant inputs that are non-observable. It also includes financial instruments whose fair value is estimated based on price information from independent sources that cannot be corroborated by observable market data. Level 3 includes equity and debt securities in the investment portfolios that are not listed in markets that provide readily determinable fair values, all loans for which IFC has elected the Fair Value Option, and certain hard-to-price securities in the liquid assets portfolio.

IFC estimates the fair value of its investments in private equity funds that do not have readily determinable fair value based on the funds’ net asset values (NAVs) per share as a practical expedient to the extent that a fund reports its investment assets at fair value and has all the attributes of an investment company, pursuant to ASC 946. If the NAV is not as of IFC’s measurement date, IFC adjusts the most recent NAV, as necessary, to estimate a NAV for the investment that is calculated in a manner consistent with the fair value measurement principles established by ASC 820.

Remeasurement of foreign currency transactions – Assets and liabilities not denominated in US dollars, other than disbursed equity investments, are expressed in US dollars at the exchange rates prevailing at December 31, 2016 and June 30, 2016. Disbursed equity investments, other than those accounted for at fair value, are expressed in US dollars at the prevailing exchange rates at the time of disbursement. Income and expenses are recorded based on the rates of exchange prevailing at the time of the transaction. Transaction gains and losses are credited or charged to income.

Loans – IFC originates loans to facilitate project finance, restructuring, refinancing, corporate finance, and/or other developmental objectives. Loans are recorded as assets when disbursed. Loans are generally carried at the principal amounts outstanding adjusted for net unamortized loan origination costs and fees. It is IFC’s practice to obtain collateral security such as, but not limited to, mortgages and third-party guarantees.

Certain loans are carried at fair value in accordance with the Fair Value Option as discussed above. Unrealized gains and losses on loans accounted for at fair value under the Fair Value Option are reported in Net unrealized gains and losses on non-trading financial instruments accounted for at fair value on the condensed consolidated income statement.

Certain loans originated by IFC contain income participation, prepayment and conversion features. These features are bifurcated and separately accounted for in accordance with ASC 815 if IFC has not elected the Fair Value Option for the loan host contracts and the features meet the definition of a derivative and are not considered to be clearly and closely related to their host loan contracts. Otherwise, these features are accounted for as part of their host loan contracts in accordance with IFC’s accounting policies for loans as indicated herein.

Loans held for sale are carried at the lower of cost or fair value. The excess, if any, of amortized cost over fair value is accounted for as a valuation allowance. Changes in the valuation allowance are recognized in net income as they occur.

Revenue recognition on loans – Interest income and commitment fees on loans are recorded as income on an accrual basis. Loan origination fees and direct loan origination costs are deferred and amortized over the estimated life of the originated loan; such amortization is determined using the interest method unless the loan is a revolving credit facility in which case amortization is determined using the straight-line method. Prepayment fees are recorded as income when received.

IFC does not recognize income on loans where collectability is in doubt or payments of interest or principal are past due more than 60 days unless management anticipates that collection of interest will occur in the near future. Any interest accrued on a loan placed in nonaccrual status is reversed out of income and is thereafter recognized as income only when the actual payment is received. Interest not previously recognized but capitalized as part of a debt restructuring is recorded as deferred income, included in the condensed consolidated balance sheet in payables and other liabilities, and credited to income only when the related principal is received. Such capitalized interest is considered in the computation of the reserve against losses on loans in the condensed consolidated balance sheet.

Reserve against losses on loans – IFC recognizes impairment on loans not carried at fair value in the condensed consolidated balance sheet through the reserve against losses on loans, recording a provision or release of provision for losses on loans in net income, which increases or decreases the reserve against losses on loans. Individually impaired loans are measured based on the present value of expected future cash flows to be received, observable market prices, or for loans that are dependent on collateral for repayment, the estimated fair value of the collateral.

The reserve against losses on loans reflects management’s estimates of both identified probable losses on individual loans (specific reserves) and probable losses inherent in the portfolio but not specifically identifiable (portfolio reserves). The determination of identified probable losses represents management’s judgment of the creditworthiness of the borrower. Reserves against losses are established through a review of individual loans undertaken on a quarterly basis. IFC considers a loan as impaired when, based on current information and events, it is probable that IFC will be
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

unable to collect all amounts due according to the loan's contractual terms. Information and events, with respect to the borrower and/or the economic and political environment in which it operates, considered in determining that a loan is impaired include, but are not limited to, the borrower's financial difficulties, breach of contract, bankruptcy/reorganization, credit rating downgrade as well as geopolitical conflict, financial/economic crisis, commodity price decline, adverse local government action and natural disaster. Unidentified probable losses are the losses incurred at the reporting date that have not yet been specifically identified. The risks inherent in the portfolio that are considered in determining unidentified probable losses are those proven to exist by past experience and include: country systemic risk; the risk of correlation or contagion of losses between markets; uninsured and uninsurable risks; nonperformance under guarantees and support agreements; and opacity of, or misrepresentation in, financial statements. There were no changes, during the periods presented herein, to IFC’s accounting policies and methodologies used to estimate its reserve against loan losses.

For purposes of providing certain disclosures about IFC’s entire reserve against losses on loans, IFC considers its entire loan portfolio to comprise one portfolio segment. A portfolio segment is the level at which the method for estimating the reserve against losses on loans is developed and documented.

Loans are written-off when IFC has exhausted all possible means of recovery, by reducing the reserve against losses on loans. Such reductions in the reserve are partially offset by recoveries, if any, associated with previously written-off loans.

Equity investments – IFC invests primarily for developmental impact; IFC does not seek to take operational, controlling, or strategic equity positions within its investees. Equity investments are acquired through direct ownership of equity instruments of investees, as a limited partner in LLPs and LLCs, and/or as an investor in private equity funds.

Revenue recognition on equity investments – Equity investments, which are listed in markets that provide readily determinable fair values, are accounted for as available-for-sale securities at fair value with unrealized gains and losses reported in other comprehensive income in accordance with ASC 320. As noted above under “Fair Value Option and Fair Value Measurements”, direct equity investments and investments in LLPs and LLCs that maintain separate ownership accounts in which IFC has significant influence, direct equity investments representing 20 percent or more ownership but in which IFC does not have significant influence and all new equity interests in funds are accounted for at fair value under the Fair Value Option. Direct equity investments in which IFC does not have significant influence and which are not listed in markets that provide readily determinable fair values are carried at cost, less impairment. Notwithstanding the foregoing, equity securities held by consolidated subsidiaries that are investment companies are accounted for at fair value, with unrealized gains and losses reported in earnings.

IFC’s investments in certain private equity funds in which IFC is deemed to have a controlling financial interest, are fully consolidated by IFC, as the presumption of control by the fund manager or the general partner has been overcome. Certain equity investments, for which recovery of invested capital is uncertain, are accounted for under the cost recovery method, such that receipts are first applied to recovery of invested capital and then to income from equity investments. The cost recovery method is applied to IFC’s investments in its oil and gas unincorporated joint ventures (UJVs). IFC’s share of conditional asset retirement obligations related to investments in UJVs are recorded when the fair value of the obligations can be reasonably estimated. The obligations are capitalized and systematically amortized over the estimated economic useful lives.

Unrealized gains and losses on equity investments accounted for at fair value under the Fair Value Option are reported in income from equity investments and associated derivatives on the condensed consolidated income statement. Unrealized gains and losses on equity investments listed in markets that provide readily determinable fair values which are accounted for as available-for-sale are reported in other comprehensive income. Realized gains and losses on the sale or redemption of equity investments are measured against the average cost of the investments sold.

Dividends on listed equity investments are recorded on the ex-dividend date, and dividends on unlisted equity investments are recorded upon receipt of notice of declaration. Realized gains on listed equity investments are recorded upon trade date, and realized gains on unlisted equity investments are recorded upon incurring the obligation to deliver the applicable shares. Realized losses are recognized when incurred.

IFC enters into put and call option and warrant agreements in connection with certain equity investments; these are accounted for in accordance with ASC 815 to the extent they meet the definition of a derivative.

Gains and losses on debt conversions and exchanges of equity interests – Loan and debt security conversions to equity interests are based on the fair value of the equity interests received. Transfers of equity interests in exchange for equity interests in other entities and other non-cash transactions are generally accounted for based on the fair value of the asset relinquished unless the fair value of the asset received is more clearly evident in which case the accounting is based on the fair value of the asset received. The difference between the fair value of the asset received and the recorded amount of the asset relinquished is recorded as a gain or loss in the income statement.

Impairment of equity investments – Equity investments accounted for at cost, less impairment and available-for-sale are assessed for impairment each quarter. When impairment is identified, it is generally deemed to be other-than-temporary, and the equity investment is written down to the impaired value, which becomes the new cost basis in the equity investment. Such other-than-temporary impairments are recognized in net income. Subsequent increases in the fair value of available-for-sale equity investments are included in other comprehensive income, while subsequent decreases in fair value, if not other-than-temporary impairment, also are included in other comprehensive income.

Debt securities – Debt securities in the investment portfolio are classified as available-for-sale and carried at fair value on the condensed consolidated balance sheet with unrealized gains and losses included in accumulated other comprehensive income until realized. Realized gains on sales of debt securities and interest on debt securities is included in income from debt securities and realized gains and losses on debt securities and associated derivatives on the condensed consolidated income statement.

 Certain debt securities are carried at fair value in accordance with the Fair Value Option as discussed above. Unrealized gains and losses on debt securities accounted for at fair value under the Fair Value Option are reported in net unrealized gains and losses on non-trading financial instruments accounted for at fair value on the condensed consolidated income statement.

IFC invests in certain debt securities with conversion features; these features are accounted for in accordance with ASC 815 to the extent they meet the definition of a derivative.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Impairment of debt securities – In determining whether an unrealized loss on debt securities is other-than-temporary, IFC considers all relevant information including the length of time and the extent to which fair value has been less than amortized cost, whether IFC intends to sell the debt security or whether it is more likely than not that IFC will be required to sell the debt security, the payment structure of the obligation and the ability of the issuer to make scheduled interest or principal payments, any changes to the ratings of a security, and relevant adverse conditions specifically related to the security, an industry or geographic sector.

Debt securities in the investment portfolio are assessed for impairment each quarter. When impairment is identified, the entire impairment is recognized in net income if (1) IFC intends to sell the security, or (2) it is more likely than not that IFC will be required to sell the security before recovery. However, if IFC does not intend to sell the security and it is not more likely than not that IFC will be required to sell the security but the security has a credit loss, the impairment charge will be separated into the credit loss component, which is recognized in net income, and the remainder which is recorded in other comprehensive income. The impaired value becomes the new amortized cost basis of the debt security. Subsequent fair value increases and decreases in the fair value of debt securities, if not an additional other-than-temporary impairment, are included in other comprehensive income.

The difference between the new amortized cost basis of debt securities for which an other-than-temporary impairment has been recognized in net income and the cash flows expected to be collected is accreted to interest income using the effective yield method. Significant subsequent increases in the expected or actual cash flows previously expected are recognized as a prospective adjustment of the yield.

Guarantees – IFC extends financial guarantee facilities to its clients to provide credit enhancement for their debt securities and trade obligations. As part of these financial guarantee facilities, IFC offers partial credit guarantees to clients covering, on a risk-sharing basis, client obligations on bonds or loans. Under the terms of IFC’s guarantees, IFC agrees to assume responsibility for the client’s financial obligations in the event of default by the client (i.e., failure to pay when payment is due). Guarantees are regarded as issued when IFC commits to the guarantee. Guarantees are regarded as outstanding when the underlying financial obligation of the client is incurred, and this date is considered to be the “inception” of the guarantee. Guarantees are regarded as called when IFC’s obligation under the guarantee has been invoked. There are two liabilities associated with the guarantees: (i) the stand-ready obligation to perform and (ii) the contingent liability. The fair value of the stand-ready obligation to perform is recognized at the inception of the guarantee unless a contingent liability exists at that time or is expected to exist in the near term. The contingent liability associated with the financial guarantee is recognized when it is probable the guarantee will be called and when the amount of guarantee called can be reasonably estimated. When the guarantees are called, the amount disbursed is recorded as a new loan, and specific reserves against losses are established, based on the estimated probable loss. Guarantee fees are recorded in income as the stand-ready obligation to perform is fulfilled. Commitment fees on guarantees are recorded as income on an accrual basis. All liabilities associated with guarantees are included in payables and other liabilities, and the receivables are included in other assets on the condensed consolidated balance sheet.

Designations of retained earnings – IFC establishes funding mechanisms for specific Board approved purposes through designations of retained earnings. Designations of retained earnings for grants to IDA are recorded as a transfer from undesignated retained earnings to designated retained earnings when the designation is approved by the Board of Governors. All other designations are recorded as a transfer from undesignated retained earnings to designated retained earnings when the designation is noted with approval by the Board of Directors. Total designations of retained earnings are determined based on IFC’s annual income before expenditures against designated retained earnings and net unrealized gains and losses on non-trading financial instruments accounted for at fair value in excess of $150 million, and contemplating the financial capacity and strategic priorities of IFC.

Expenditures resulting from such designations are recorded as expenses in IFC’s condensed consolidated income statement in the year in which they are incurred and reduces the respective designated retained earnings for such purposes. Expenditures are deemed to have been incurred when IFC has ceded control of the funds to the recipient. If the recipient is deemed to be controlled by IFC, the expenditure is deemed to have been incurred only when the recipient disburses the funds to a non-related party. On occasion, recipients who are deemed to be controlled by IFC make investments. In such cases, IFC includes those assets on its condensed consolidated balance sheet until the recipient disposes of or transfers the asset or IFC is deemed to no longer be in control of the recipient. These investments have had no material impact on IFC’s financial position, results of operations, or cash flows. Investments resulting from such designations are recorded on IFC’s condensed consolidated balance sheet in the year in which they occur, also having the effect of reducing the respective designated retained earnings for such purposes.

Liquid asset portfolio – The liquid asset portfolio, as defined by IFC, consists of: time deposits and securities; related derivative instruments; securities purchased under resale agreements and receivable for cash collateral pledged; securities sold under repurchase agreements and payable for cash collateral received; receivables from sales of securities and payables for purchases of securities; and related accrued income and charges. IFC’s liquid funds are invested in government, agency and government-sponsored agency obligations, time deposits and asset-backed, including mortgage-backed, securities. Government and agency obligations include positions in high quality fixed rate bonds, notes, bills, and other obligations issued or unconditionally guaranteed by governments of countries or other official entities including government agencies and instrumentalities or by multilateral organizations. Asset-backed and mortgage-backed securities include agency and non-agency residential mortgage-backed securities, commercial mortgage-backed securities, consumer, auto and student loan-backed securities, commercial real estate collateralized debt obligations and collateralized loan obligations.

Securities and related derivative instruments within IFC’s liquid asset portfolio are classified as trading and are carried at fair value with any changes in fair value reported in income from liquid asset trading activities. Interest on securities and amortization of premiums and accretion of discounts are also reported in income from liquid asset trading activities. Gains and losses realized on the sale of trading securities are computed on a specific security basis.

IFC classifies cash and due from banks and time deposits (collectively, cash and cash equivalents) as cash and as cash equivalents in the condensed consolidated statement of cash flows because they are generally readily convertible to known amounts of cash within 90 days of acquisition generally when the original maturities for such instruments are under 90 days or in some cases are under 180 days.
Repurchase, resale and securities lending agreements — Repurchase agreements are contracts under which a party sells securities and simultaneously agrees to repurchase the same securities at a specified future date at a fixed price. Resale agreements are contracts under which a party purchases securities and simultaneously agrees to resell the same securities at a specified future date at a fixed price. Securities lending agreements are similar to repurchase agreements except that the securities loaned are securities that IFC has received as collateral under unrelated agreements and allowed by contract to rehypothecate. Amounts due under securities lending agreements are included in securities sold under repurchase agreements and payable for cash collateral received on the condensed consolidated balance sheet.

It is IFC’s policy to take possession of securities purchased under resale agreements, which are primarily liquid government securities. The market value of these securities is monitored and, within parameters defined in the agreements, additional collateral is obtained when their value declines. IFC also monitors its exposure with respect to securities sold under repurchase agreements and, in accordance with the terms of the agreements, requests the return of excess securities held by the counterparty when their value increases.

Repurchase, resale and securities lending agreements are accounted for as collateralized financing transactions and recorded at the amount at which the securities were acquired or sold plus accrued interest.

Borrowings — To diversify its access to funding, and reduce its borrowing costs, IFC borrows in a variety of currencies and uses a number of borrowing structures, including foreign exchange rate-linked, inverse floating rate and zero coupon notes. In managing the currency exposure inherent in borrowing in a variety of currencies, generally, IFC either simultaneously converts such borrowings into variable rate US dollar borrowings through the use of currency and interest rate swap transactions or utilizes liquid asset portfolio or debt investments denominated in the same currency to economically hedge changes in the fair value of certain borrowings. Under certain outstanding borrowing agreements, IFC is not permitted to mortgage or allow a lien to be placed on its assets (other than purchase money security interests) without extending equivalent security to the holders of such borrowings.

Substantially all borrowings are carried at fair value under the Fair Value Option with changes in fair value reported in net unrealized gains and losses on non-trading financial instruments accounted for at fair value in the condensed consolidated income statement.

Interest on borrowings and amortization of premiums and accretion of discounts are reported in charges on borrowings.

Risk management and use of derivative instruments — IFC enters into transactions in various derivative instruments primarily for financial risk management purposes in connection with its principal business activities, including lending, investing in debt securities and equity investments, client risk management, borrowing, liquid asset portfolio management and asset and liability management. There are no derivatives designated as accounting hedges.

All derivative instruments are recorded on the condensed consolidated balance sheet at fair value as derivative assets or derivative liabilities. Where they are not clearly and closely related to the host contract, certain derivative instruments embedded in loans, debt securities and equity investments are bifurcated from the host contract and recorded at fair value as derivative assets or liabilities unless the hybrid instrument is accounted for at fair value with any changes in fair value reported in income. The fair value at inception of such embedded derivatives is excluded from the carrying amount of the host contracts on the condensed consolidated balance sheet. Changes in fair values of derivative instruments used in the liquid asset portfolio are recorded in income from liquid asset trading activities. Changes in fair values of derivative instruments other than those in the liquid asset portfolio and those associated with equity investments are recorded in net unrealized gains and losses on non-trading financial instruments accounted for at fair value. The risk management policy for each of IFC’s principal business activities and the accounting policies particular to them are described below.

Lending activities — IFC’s policy is to closely match the currency, interest rate basis, and maturity of its loans and borrowings. Derivative instruments are used to convert the cash flows from fixed rate US dollar or non-US dollar loans into variable rate US dollars.

Client risk management activities — IFC enters into derivatives transactions with its clients to help them hedge their own currency, interest rate, or commodity risk, which, in turn, improves the overall quality of IFC’s loan portfolio. To hedge the market risks that arise from these transactions with clients, IFC enters into offsetting derivative transactions with matching terms with authorized market counterparties. Changes in fair value of all derivatives associated with these activities are reported in net income in net unrealized gains and losses on non-trading financial instruments accounted for at fair value.

Borrowing activities — IFC issues debt securities in various capital markets with the objectives of minimizing its borrowing costs, diversifying funding sources, and developing member countries’ capital markets, sometimes using complex structures. These structures include borrowings payable in multiple currencies, or borrowings with principal and/or interest determined by reference to a specified index such as a stock market index, a reference interest rate, a commodity index, or one or more foreign exchange rates. IFC generally uses derivative instruments with matching terms, primarily currency and interest rate swaps, to convert certain of such borrowings into variable rate US dollar obligations, consistent with IFC’s matched funding policy. IFC elects to carry at fair value, under the Fair Value Option, all market borrowings for which a derivative instrument, liquid asset portfolio investment or debt investment is used to create an economic hedge. Changes in the fair value of such borrowings and the associated derivatives are reported in net unrealized gains and losses on non-trading financial instruments accounted for at fair value in the condensed consolidated income statement.

Liquid asset portfolio management activities — IFC manages the interest rate, currency and other market risks associated with certain of the time deposits and securities in its liquid asset portfolio by entering into derivative transactions to convert the cash flows from those instruments into variable rate US dollars or by utilizing market borrowings denominated in the same currency to economically hedge changes in the fair value of certain liquid asset portfolio investments. The derivative instruments used include short-term, over-the-counter foreign exchange forwards (covered forwards), interest rate and currency swaps, and exchange-traded interest rate futures and options. As the entire liquid asset portfolio is classified as trading portfolio, all securities (including derivatives) are carried at fair value with changes in fair value reported in income from liquid asset trading activities.
Asset and liability management  In addition to the risk managed in the context of its business activities detailed above, IFC faces residual market risk in its overall asset and liability management. Residual currency risk is managed by monitoring the aggregate position in each lending currency and reducing the net excess asset or liability position through sales or purchases of currency. Interest rate risk arising from mismatches due to write-downs, prepayments and re-schedulings, and residual reset date mismatches is monitored by measuring the sensitivity of the present value of assets and liabilities in each currency to each basis point change in interest rates.

IFC monitors the credit risk associated with these activities by careful assessment and monitoring of prospective and actual clients and counterparties. In respect of liquid assets and derivatives transactions, credit risk is managed by establishing exposure limits based on the credit rating and size of the individual counterparty. In addition, IFC has entered into master agreements with its derivative market counterparties governing derivative transactions that contain close-out and netting provisions and collateral arrangements. Under these agreements, if the credit exposure to one of the parties to the agreement, on a mark-to-market basis, exceeds a specified level, that party must post collateral to cover the excess, generally in the form of liquid government securities or cash. IFC does not offset the fair value amounts of derivatives and obligations to return, or rights to receive, cash collateral associated with these master-netting agreements.

Loan participations  – IFC mobilizes funds from commercial banks and other financial institutions (Participants) by facilitating loan participations, without recourse. These loan participations are administered and serviced by IFC on behalf of the Participants. The disbursed and outstanding balances of loan participations that meet the applicable accounting criteria are accounted for as sales and are not included in IFC’s condensed consolidated balance sheet. All other loan participations are accounted for as secured borrowings and are included in loans on IFC’s condensed consolidated balance sheet, with the related secured borrowings included in payables and other liabilities on IFC’s condensed consolidated balance sheet.

Pension and other postretirement benefits  – IBRD has a defined benefit Staff Retirement Plan (SRP), a Retired Staff Benefits Plan (RSBP) and a Post-Employment Benefits Plan (PEBP) that cover substantially all of its staff members as well as the staff of IFC and of MIGA.

The SRP provides regular pension benefits and includes a cash balance plan. The RSBP provides certain health and life insurance benefits to eligible retirees. The PEBP provides pension benefits administered outside the SRP. All costs associated with these plans are allocated between IBRD, IFC, and MIGA based upon their employees’ respective participation in the plans. In addition, IFC and MIGA reimburse IBRD for their share of any contributions made to these plans by IBRD.

The net periodic pension and other postretirement benefit income or expense allocated to IFC is included in income or expense from pension and other postretirement benefit plans in the condensed consolidated income statement. IFC includes a receivable from IBRD in receivables and other assets, representing prepaid pension and other postretirement benefit costs.

Recently adopted accounting standards  – In June 2013, the FASB issued ASU 2013-08, Investment Companies (Topic 946): Amendments to the Scope, Measurement and Disclosure Requirements (ASU 2013-08). Among other things, ASU 2013-08 amends the criteria for an entity to qualify as an investment company under ASC Topic 946, introduces new disclosure requirements applicable to investment companies, and amends the measurement criteria for certain investments by an investment company in another investment company. ASU 2013-08 is applicable for annual reporting periods and interim periods within those annual periods, beginning after December 15, 2013 (which was the year ended June 30, 2015 for IFC). IFC adopted ASU 2013-08 on July 1, 2014 with no material impact on IFC’s financial position, results of operations or cash flows.

In June 2014, the FASB issued ASU 2014-11, Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures (ASU 2014-11). ASU 2014-11 requires secured borrowing accounting for repurchase-to-maturity transactions, eliminates current accounting guidance on linking repurchase financing transactions and expands disclosure requirements related to certain transfers of financial assets that are accounted for as sales and repurchase agreements, securities lending transactions and repurchase to maturity transactions accounted for as secured borrowings. The accounting changes and expanded disclosure requirements for certain transfers accounted as sales are applicable for the first interim or annual reporting period beginning after December 15, 2014 (which was the interim period ended March 31, 2015 for IFC). The disclosure requirements for certain transactions accounted for as secured borrowings are applicable for interim periods beginning after March 15, 2015 (which was the three months ended June 30, 2015 for IFC) and are reflected in Note P. IFC adopted ASU 2014-11’s accounting changes on January 1, 2015 with no material impact on IFC’s financial position, results of operations or cash flows.

In May 2015, the FASB issued ASU No. 2015-07, Disclosure for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) (ASU 2015-07). ASU 2015-07 removes the requirement to categorize within the fair value hierarchy investments whose fair values are measured at NAV (or its equivalent) under the practical expedient in the ASC, requires disclosure by reporting entities of the amount of investments measured at NAV (or its equivalent) under the practical expedient, and limits the disclosure requirements all investments eligible to be measured at NAV under the practical expedient to only those to which the practical expedient is applied. ASU 2015-07 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. As permitted, IFC early adopted ASU 2015-07 effective June 30, 2015 as reflected in Note R.

In February 2015, the FASB issued ASU 2015-02, Amendments to the Consolidation Analysis (ASU 2015-02). ASU 2015-02 amends ASC Topic 810, Consolidation, by modifying the evaluation of whether limited partnerships and similar entities are VIEs; eliminating the presumption that a general partner should consolidate a limited partnership; modifying the consolidation assessment of reporting entities that are involved with VIEs, particularly those that have fee arrangements (with the VIE) and related party relationships; providing a scope exception from Topic 810 for reporting entities with interests in certain money market funds. ASU 2015-02 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 (which is the year ending June 30, 2017 for IFC). As permitted, IFC early adopted ASU 2015-02 on July 1, 2015, as reflected in Note M, with no material impact on IFC’s financial position, results of operations or cash flows.
In November 2014, the FASB issued ASU 2014-16, Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity (ASU 2014-16). ASU 2014-16 requires, for purposes of evaluating embedded features for bifurcation under ASU 815, the determination of the nature of a host contract issued in share form to be based on the economic characteristics and risks of the entire hybrid instrument, including the embedded feature being evaluated. Further, the ASU stipulates that the existence or omission of any single term or feature does not necessarily determine the economic characteristics and risks of the host. ASU 2014-16 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 (which is the year ending June 30, 2017 for IFC). As permitted, IFC early adopted ASU 2014-16 on January 1, 2016 with no material impact on IFC’s financial position, results of operations or cash flows.

Accounting and financial reporting developments – In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) became law. The Act seeks to reform the U.S. financial regulatory system by introducing new regulators and extending regulation over new markets, entities, and activities. The implementation of the Act is dependent on the development of various rules to clarify and interpret its requirements. Pending the development of these rules, no impact on IFC has been determined as of December 31, 2016. IFC continues to evaluate the potential future implications of the Act.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (ASU 2014-09). ASU 2014-09 replaces most existing revenue recognition guidance by establishing a single recognition model for revenue arising from contracts with customers to deliver goods and services and requires additional disclosure regarding those revenues - it does not change current accounting guidance for derivative contracts, investments in and transfers of financial instruments or guarantees. ASU 2014-09 is currently applicable for annual reporting periods and interim periods within those annual periods, beginning after December 15, 2017 (which is the year ending June 30, 2019 for IFC). IFC is currently evaluating the impact of ASU 2014-09.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Instruments - Going Concern (ASU 2014-15). ASU 2014-15 requires reporting entities to perform interim and annual assessments of their ability to continue as a going concern within one year of the date of issuance of the entity’s financial statements (or within one year of the date on which the financial statements are available to be issued). A reporting entity will be required to make certain disclosures if there is substantial doubt about the entity’s ability to continue to as a going concern. ASU 2014-15 is effective for annual periods ending after December 15, 2016 (which is the year ending June 30, 2017 for IFC) and for interim periods thereafter.

In January 2016, the FASB issued ASU 2016-01, Recognition and Measurement of Financial Assets and Liabilities (ASU 2016-01). ASU 2016-01 requires all investments in equity securities to be accounted for at fair value through net income. However, entities may elect to account for equity investments that do not have readily determinable fair values at cost less impairment, as adjusted for observable price changes in orderly transactions for the identical and similar instrument of the issuer. ASU 2016-01 will require separate presentation in other comprehensive income (OCI) the portion of the total change in fair value resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value under the FVO. For public business entities, ASU 2016-01 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017, (which is the year ending June 30, 2019 for IFC). ASC 2016-01’s requirements are to be adopted by means of a cumulative-effect adjustment of the balance sheet as of the beginning of the fiscal year of adoption. Entities may adopt ASU 2016-01’s guidance relative to OCI recognition of changes in fair value due to changes in the instrument-specific credit risk of liabilities measured under the FVO for financial statements of fiscal years or interim periods that have not yet been issued, as of the beginning of the fiscal year of adoption – otherwise early adoption is not permitted. IFC is currently evaluating the impact of the ASU 2016-01.

In February 2016, the FASB issued ASU 2016-02, Leases. ASU 2016-02 introduces a new accounting model that will result in lessees recording most leases on the balance sheet, aligns many of the underlying profit recognition principles with those in ASU 2014-09 and eliminates the use of “bright line” tests currently required for determining lease classification. ASU 2016-02 is effective for fiscal years, and interim periods within the fiscal years, beginning after December 15, 2018, (which is the year ending June 30, 2020 for IFC). Earlier adoption is permitted. IFC is currently evaluating the impact of ASU 2016-02.

In March 2016, the FASB issued ASU 2016-06, Contingent Put and Call Options in Debt Instruments; ASU 2016-07, Simplifying the Transition to the Equity Method of Accounting; and ASU 2016-08, Principal versus Agent Considerations (Reporting Revenue Gross Versus Net). ASU 2016-06 clarifies certain matters regarding the assessment required under ASC 815 of whether contingent puts and calls embedded in debt instruments require bifurcation. ASU 2016-06 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016, (which is the year ended June 30, 2018 for IFC). Early adoption is permitted. ASU 2016-06 will have no material impact on IFC’s financial position, results of operations or cash flows.

ASU 2016-07 simplifies the equity method of accounting by eliminating the requirement to retroactively apply the equity method to an investment that subsequently qualifies for such accounting as a result of an increase in ownership and/or degree of influence. Consequently, when an investment qualifies for equity method accounting, the cost of acquiring the additional ownership would be added to the investor’s previous cost basis and the equity method subsequently applied upon the date the investor obtains the ability to exercise significant influence over the investee. ASU 2016-07 is effective for fiscal years, including interim periods within those fiscal years, beginning after December 15, 2016, (which is the year ended June 30, 2018 for IFC). Given IFC’s current election of the FVO for all investments that otherwise qualify for equity method accounting, ASU 2016-07 is not expected to materially impact IFC’s financial position, results of operations or cash flows.

ASU 2016-08 amends ASU 2014-09’s principal-versus-agent guidance. It requires a reporting entity to evaluate whether it is a principal or agent for each specified good or service in a contract with a customer and clarifies the application of the related indicators in accordance with ASC 204-09’s control principle. ASU 2016-08 has the same effective date as 2014-09, (which is the year ending June 30, 2019 for IFC). IFC is currently evaluating the impact of ASU 2016-08.

In June 2016, the FASB issued ASU 2016-13, Measurement of Credit Losses on Financial Instruments (ASU 2016-13). ASU 2016-13 requires the measurement of estimated credit losses on financial instruments held at the balance sheet date based on historical loss experience, current conditions, and reasonable and supportable forecasts of future economic conditions. Contrary to the incurred impairment loss accounting model currently in place, this forward-looking approach is intended to result in the immediate recognition of all estimated credit losses expected to occur over the remaining life of the instruments. The resulting allowance for current expected credit losses (CECL) reduces the amortized cost basis of a financial asset to an amount expected to be collected. For future periods which cannot be forecasted in a reasonable and supportable manner, the reporting
entity will revert to historical loss experience. Although ASU 2016-13 does not prescribe a specific methodology, it requires a collective assessment for financial assets with similar risk characteristics. Credit losses for financial assets that do not share similar risk characteristics with other financial assets will be measured individually. Impairment of investments in available-for-sale debt securities will be recognized via the allowance method, which allows for immediate reversals of credit losses. ASU 2016-13 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019 (which is the year ended June 30, 2021 for IFC). IFC is currently evaluating the impact of ASU 2016-13.

In October, 2016, the FASB issued ASU 2016-17, Consolidation (Topic 810): Interests Held through Related Parties That are under Common Control (ASC 2016-17). ASC 2016-17 amends Topic 810 so that a single decision maker with respect to a VIE is not required to consider interests held through related parties that are under common control with the single decision maker to be the equivalent of direct interests in their entirety. Instead, the entity is required to include those interests on a proportional basis consistent with interests held through other related parties. ASC 2016-17 is effective for fiscal years, and interim periods within those annual periods, beginning after December 5, 2016 (which is the year ended June 30, 2018 for IFC.) ASU 2016-17 will have no material impact on IFC’s financial position, results of operations or cash flows.

In addition, during the six months ended December 31, 2016, the FASB issued and/or approved various other ASUs. IFC analyzed and implemented the new guidance, as appropriate, with no material impact on the financial position, results of operations or cash flows of IFC.
NOTE B – SCOPE OF CONSOLIDATION

IFC Asset Management Company, LLC (AMC) and AMC Funds

IFC, through its wholly owned subsidiary, AMC, mobilizes capital from outside IFC’s traditional investor pool and manages third-party capital. AMC is consolidated into IFC’s financial statements. At December 31, 2016, IFC has provided $2 million of capital to AMC ($2 million - June 30, 2016).

As a result of the consolidation of AMC, amounts included in IFC’s condensed consolidated balance sheet at December 31, 2016 and June 30, 2016 comprise (US$ millions):

<table>
<thead>
<tr>
<th>Cash, receivables and other assets</th>
<th>December 31, 2016</th>
<th>June 30, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity investments</td>
<td>$50</td>
<td>$55</td>
</tr>
<tr>
<td>Payables and other liabilities</td>
<td>*</td>
<td>*</td>
</tr>
</tbody>
</table>

* Less than $0.5 million.

As a result of the consolidation of AMC, amounts included in IFC’s condensed consolidated statement of operations for the three and six months ended December 31, 2016 and 2015 comprise (US$ millions):

<table>
<thead>
<tr>
<th>Other income</th>
<th>Three months ended December 31, 2016</th>
<th>2015</th>
<th>Six months ended December 31, 2016</th>
<th>2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other expenses</td>
<td>$24</td>
<td>$16</td>
<td>$42</td>
<td>$33</td>
</tr>
</tbody>
</table>

At December 31, 2016, AMC managed thirteen funds (collectively referred to as the AMC Funds). All AMC Funds are investment companies and are required to report their investment assets at fair value through net income. IFC’s ownership interests in these AMC Funds are shown in the following table:

<table>
<thead>
<tr>
<th>AMC Funds</th>
<th>IFC’s ownership interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>IFC Capitalization (Equity) Fund, L.P.</td>
<td>61%*</td>
</tr>
<tr>
<td>IFC Capitalization (Subordinated Debt) Fund, L.P.</td>
<td>13%</td>

<tr>
<td>Africa Capitalization Fund, Ltd.</td>
<td>-</td>
</tr>
<tr>
<td>IFC Russian Bank Capitalization Fund, LP</td>
<td>45%</td>
</tr>
<tr>
<td>IFC Catalyst Funds</td>
<td>18%**</td>
</tr>
<tr>
<td>IFC Global Infrastructure Fund, LP</td>
<td>17%</td>
</tr>
<tr>
<td>China-Mexico Fund, LP</td>
<td>-</td>
</tr>
<tr>
<td>IFC Financial Institutions Growth Fund, LP</td>
<td>30%</td>
</tr>
<tr>
<td>IFC Global Emerging Markets Fund of Funds</td>
<td>19%***</td>
</tr>
<tr>
<td>IFC Middle East and North Africa Fund, LP</td>
<td>37%</td>
</tr>
<tr>
<td>Women Entrepreneurs Debt Fund, LP</td>
<td>27%</td>
</tr>
<tr>
<td>IFC Emerging Asia Fund, LP</td>
<td>35%</td>
</tr>
</tbody>
</table>

* By virtue of certain rights granted to non-IFC limited partner interests, IFC does not control or consolidate this fund.

** The ownership interest of 18% reflects IFC’s ownership interest taking into consideration the overall commitments for the IFC Catalyst Funds, which is comprised of IFC Catalyst Fund, LP, IFC Catalyst Fund (UK), LP and IFC Catalyst Fund (Japan), LP (collectively, IFC Catalyst Funds). IFC does not have an ownership interest in either the IFC Catalyst Fund (UK), LP or the IFC Catalyst Fund (Japan), LP.

*** The ownership interest of 19% reflects IFC’s ownership interest taking into consideration the current committed amounts for the IFC Global Emerging Markets Fund of Funds, which are comprised of IFC Global Emerging Markets Fund of Funds, LP and IFC Global Emerging Markets Fund of Funds, (Japan Parallel) LP. IFC does not have an ownership interest in the IFC Global Emerging Markets Fund of Funds, (Japan Parallel) LP.

**** The ownership interest of 19% reflects IFC’s ownership interest taking into consideration the current committed amounts for the IFC Global Emerging Markets Fund of Funds, which are comprised of IFC Global Emerging Markets Fund of Funds, LP and IFC Global Emerging Markets Fund of Funds, (Japan Parallel) LP. IFC does not have an ownership interest in the IFC Global Emerging Markets Fund of Funds, (Japan Parallel) LP.

IFC’s investments in AMC Funds, except for the IFC Russian Bank Capitalization Fund, LP (RBCF) created in June 2012, are accounted for at fair value under the Fair Value Option. RBCF is a VIE and is consolidated by IFC because IFC is deemed its primary beneficiary.

As a result of consolidating RBCF, IFC’s condensed consolidated balance sheet at December 31, 2016 includes $45 million of equity investments ($41 million - June 30, 2016), and non-controlling interests of $25 million ($23 million - June 30, 2016). These non-controlling interests meet the FASB’s definition of mandatorily redeemable financial instruments because the terms of the underlying partnership agreement provide for a termination date at which time its remaining assets are to be sold, its liabilities settled and the remaining net proceeds distributed to the non-controlling interest holders and IFC. RBCF’s termination date is 2021 with a possible extension to 2023. As RBCF is considered an investment company, its investment securities (equity investments) are measured at fair value in IFC’s condensed consolidated balance sheet; therefore, the settlement value or estimate of cash that would be due and payable to settle these non-controlling interests, assuming an orderly liquidation of RBCF on December 31, 2016, approximates the $25 million of non-controlling interests reflected on IFC’s condensed consolidated balance sheet at December 31, 2016.
NOTE B – SCOPE OF CONSOLIDATION (continued)

As of December 31, 2016, IFC Global Emerging Markets Fund of Funds is no longer consolidated because IFC is no longer the sole limited partner with a controlling financial interest due to the admission of a new limited partner. The impact of the de-consolidation on IFC’s financial statements is insignificant.

Other Consolidated entities

In August 2015, IFC created a special purpose vehicle, IFC Sukuk Company, to facilitate a $100 million Sukuk under IFC’s borrowings program. The Sukuk is scheduled to mature in September 2020. IFC Sukuk Company is a VIE and has been consolidated into these Condensed Consolidated Financial Statements because IFC is the VIE’s primary beneficiary. The collective impact of this and other entities consolidated into these Condensed Consolidated Financial Statements under the VIE or voting interest model is insignificant.

NOTE C – LIQUID ASSET PORTFOLIO

Income from liquid asset trading activities

Income from liquid asset trading activities for the three and six months ended December 31, 2016 and 2015 comprises (US$ millions):

<table>
<thead>
<tr>
<th></th>
<th>Three months ended</th>
<th>Six months ended</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interest income, net</td>
<td>$139</td>
<td>$135</td>
</tr>
<tr>
<td>Net gains and losses on trading activities (realized and unrealized)</td>
<td>$(14)</td>
<td>$(30)</td>
</tr>
<tr>
<td><strong>Total income from liquid asset trading activities</strong></td>
<td><strong>$125</strong></td>
<td><strong>$105</strong></td>
</tr>
</tbody>
</table>

Net gains and losses on trading activities comprise net losses on asset-backed and mortgage-backed securities of $40 million and $22 million gain for the three and six months ended December 31, 2016 ($28 million and $88 million net losses - three and six months ended December 31, 2015) and net gains on other trading securities of $26 million and $127 million for the three and six months ended December 31, 2016 ($2 million and $74 million net losses - three and six months ended December 31, 2015).

NOTE D – INVESTMENTS

The carrying amount of investments at December 31, 2016 and June 30, 2016 comprises (US$ millions):

### Loan Credit Quality Indicators

IFC utilizes a rating system to classify loans according to credit worthiness and risk. Each loan is categorized as very good, good, average, watch, substandard, doubtful or loss.

A description of each category (credit quality indicator), in terms of the attributes of the borrower, the business environment in which the borrower operates or the loan itself, follows:

<table>
<thead>
<tr>
<th>Credit quality indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Very good</strong></td>
<td>Excellent debt service capacity; superior management; market leader; very favorable operating environment; may also have strong collateral and/or guarantee arrangements.</td>
</tr>
<tr>
<td><strong>Good</strong></td>
<td>Strong debt service capacity; good liquidity; stable performance, very strong management, high market share; minimal probability of financial deterioration.</td>
</tr>
<tr>
<td><strong>Average</strong></td>
<td>Satisfactory balance sheet ratios, average liquidity; good debt service capacity; good management; average size and market share.</td>
</tr>
<tr>
<td><strong>Watch</strong></td>
<td>Tight liquidity; financial performance below expectations; higher than average leverage ratio; weak management in certain aspects; uncompetitive products and operations; unfavorable or unstable macroeconomic factors.</td>
</tr>
<tr>
<td><strong>Substandard</strong></td>

<td>$ 22,681</td>
</tr>
</tbody>
</table>

Loan modifications, including past due amounts capitalized and written off, during the three and six months ended December 31, 2016 considered troubled debt restructurings totaled $114 million and $187 million ($144 million and $149 million – three and six months ended December 31, 2015). There were two loans that defaulted during the six months ended December 31, 2016 that had been modified in a troubled debt restructuring within 12 months prior to the date of default with an outstanding balance of $18 million. One of the loans with an outstanding balance of $4 million was brought current prior to December 31, 2016. The remaining loan was evaluated and included as part of the specific reserve.
Guarantees

IFC extends financial guarantee facilities to its clients to provide full or partial credit enhancement for their debt securities and trade obligations. Under the terms of IFC’s guarantees, IFC agrees to assume responsibility for the client’s financial obligations in the event of default by the client, where default is defined as failure to pay when payment is due. Guarantees entered into by IFC generally have maturities consistent with those of the loan portfolio. Guarantees signed at December 31, 2016 totaled $4,317 million ($4,250 million – June 30, 2016). Guarantees of $3,664 million that were outstanding (i.e., not called) at December 31, 2016 ($3,478 million – June 30, 2016), were not included in loans on IFC’s condensed consolidated balance sheet. The outstanding amount represents the maximum amount of undiscounted future payments that IFC could be required to make under these guarantees.

NOTE F – DEBT SECURITIES

Income from debt securities, including realized gains and losses on debt securities and associated derivatives for the three and six months ended December 31, 2016 and 2015 comprise the following (US$ millions):

</tbody>
</table>

Total $607 (17) $104 (25) $711 (42)
NOTE F – DEBT SECURITIES (continued)

Corporate debt securities comprise investments in bonds and notes. Unrealized losses associated with corporate debt securities are primarily attributable to movements in the credit default swap spread curve applicable to the issuer. Based upon IFC’s assessment of expected credit losses, IFC has determined that the issuer is expected to make all contractual principal and interest payments. Accordingly, IFC expects to recover the cost basis of these securities.

Preferred shares comprise investments in preferred equity investments that are redeemable at the option of IFC or mandatorily redeemable by the issuer. Unrealized losses associated with preferred shares are primarily driven by changes in discount rates associated with changes in credit spreads or interest rates, minor changes in exchange rates and comparable market valuations in the applicable sector. Based upon IFC’s assessment of the expected credit losses, IFC expects to recover the cost basis of these securities.

NOTE G – EQUITY INVESTMENTS AND ASSOCIATED DERIVATIVES

Income from equity investments and associated derivatives for the three and six months ended December 31, 2016 and 2015 comprises the following (US$ millions):

<table>
<thead>
<tr>
<th></th>
<th>Three months ended December 31, 2016</th>
<th>Six months ended December 31, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gains on equity investments and associated derivatives, net</td>

<td>2</td>
<td>2</td>
</tr>
<tr>
<td>Total income (loss) from equity investments and associated derivatives</td>
<td>$(68)</td>
<td>$27</td>
</tr>
</tbody>
</table>

Gains on equity investments and associated derivatives includes net realized gains on equity investments and associated derivatives of $101 million for the three months ended December 31, 2016 ($210 million – three months ended December 31, 2015) and $574 million for the six months ended December 31, 2016 ($757 million - six months ended December 31, 2015).

Dividends include $3 million for the three months ended December 31, 2016 ($4 million – three months ended December 31, 2015) and $6 million for the six months ended December 31, 2016 ($7 million – six months ended December 31, 2015) of receipts, net of cash disbursements, related to investments accounted for under the cost recovery method, for which cost has been fully recovered.

Equity investments include several private equity funds that invest primarily in emerging markets across a range of sectors and that are accounted for at fair value under the Fair Value Option. These investments cannot be redeemed. Instead distributions are received through the liquidation of the underlying assets of the funds. IFC estimates that the underlying assets of the funds will be liquidated over five to eight years. The fair values of these funds have been determined using the net asset value of IFC’s ownership interest in partners’ capital and totaled $3,320 million as of December 31, 2016 ($3,179 million – June 30, 2016).
NOTE H – RETAINED EARNINGS DESIGNATIONS AND RELATED EXPENDITURES AND ACCUMULATED OTHER COMPREHENSIVE INCOME

Designated retained earnings

On August 04, 2016, the Board of Directors approved a designation of $101 million of IFC’s retained earnings for grants to IDA and a designation of $60 million of IFC’s retained earnings for Advisory Services. On October 07, 2016, the Board of Governors noted with approval the designations approved by the Board of Directors. IFC recognizes designation of retained earnings for advisory services when the Board of Directors approves it and recognizes designation of retained earnings for grants to IDA when it is noted with approval by the Board of Governors.

Subsequent event – On January 24, 2017, IFC recognized grants to IDA of $101 million on the signing of a grant agreement between IDA and IFC concerning the transfer to IDA and use of funds corresponding to the designation of retained earnings for grants to IDA approved by IFC’s Board of Directors on August 04, 2016 and noted with approval by IFC’s Board of Governors on October 07, 2016.

</tr>
</tbody>
</table>

As discussed in Note A, “Summary of significant accounting and related policies”, market borrowings economically hedged with financial instruments, including derivatives, accounted for at fair value with changes therein reported in earnings are accounted for at fair value under the Fair Value Option. Differences arise between the movement in the fair value of market borrowings and the fair value of the associated derivatives primarily due to the different credit characteristics. The change in fair value reported in “Unrealized gains and losses on borrowings from market, IDA and associated derivatives” includes the impact of changes in IFC’s own credit spread. As credit spreads widen, unrealized gains are recorded and when such credit spreads narrow, unrealized losses are recorded (notwithstanding the impact of other factors, such as changes in risk-free interest and foreign currency exchange rates). The magnitude and direction (gain or loss) can be volatile from period to period but they do not alter the timing of the cash flows on the market borrowings.

NOTE J – DERIVATIVE AND OTHER FINANCIAL INSTRUMENTS

As discussed in Note A, “Summary of significant accounting and related policies”, IFC enters into transactions in various derivative instruments for financial risk management purposes in connection with its principal business activities, including lending, investing in debt securities, equity investments, client risk management, borrowing, liquid asset management and asset and liability management. None of these derivative instruments are designated as hedging instruments under ASC Topic 815. Note A describes IFC’s risk management and use of derivative instruments. The fair value of derivative instrument assets and liabilities by risk type at December 31, 2016 and June 30, 2016 is summarized as follows (US$ millions):

Condensed Consolidated balance sheet location | December 31, 2016 | June 30, 2016
--- | --- | ---
**Derivative assets** | | |
Interest rate | $313 | $646 |
Foreign exchange | 219 | 307 |
Interest rate and currency | 2,524 | 2,361 |
Equity and other | 340 | 381 |
**Total derivative assets** | $3,396 | $3,695 |
**Derivative liabilities** | | |
Interest rate | $786 | $454 |
Foreign exchange | 75 | 96 |
Interest rate and currency | 2,902 | 3,396 |
Equity and other | 7 | 6 |
**Total derivative liabilities** | $3,770 | $3,952 |
NOTE J – DERIVATIVE AND OTHER FINANCIAL INSTRUMENTS (continued)

</table>

The income related to each derivative risk category includes realized and unrealized gains and losses.

At December 31, 2016, the outstanding volume, measured by US$ equivalent notional, of interest rate contracts was $63,595 million ($64,504 million at June 30, 2016), foreign exchange contracts was $15,029 million ($14,106 million at June 30, 2016) and interest rate and currency contracts was $36,595 million ($35,032 million at June 30, 2016). At December 31, 2016, there were 277 equity contracts related to IFC’s loan and equity investment portfolio and 1 other derivative contract recognized as derivatives assets or liabilities under ASC Topic 815 (280 equity risk and other contracts at June 30, 2016).

NOTE K – FAIR VALUE MEASUREMENTS

Many of IFC’s financial instruments are not actively traded in any market. Accordingly, estimates and present value calculations of future cash flows are used to estimate the fair values. Determining future cash flows for fair value estimation is subjective and imprecise, and minor changes in assumptions or methodologies may materially affect the estimated values. The excess or deficit resulting from the difference between the carrying amounts and the fair values presented does not necessarily reflect the values which will ultimately be realized, since IFC generally holds loans, borrowings and other financial instruments with contractual maturities with the aim of realizing their contractual cash flows.

The estimated fair values as of December 31, 2016 and June 30, 2016 reflect multiple factors such as interest rates, credit risk, foreign currency exchange rates and commodity prices. Reasonable comparability of fair values among financial institutions is not likely because of the wide range of permitted valuation techniques and numerous estimates that must be made in the absence of secondary market prices. This lack of objective pricing standard in the market introduces a greater degree of subjectivity and volatility to these derived or estimated fair values. Therefore, while disclosure of estimated fair values of financial instruments is required, readers are cautioned in using these data for purposes of evaluating the financial condition of IFC. The fair values of the individual financial instruments do not represent the fair value of IFC taken as a whole.
NOTE K – FAIR VALUE MEASUREMENTS (continued)

All of IFC’s financial instruments in its liquid assets portfolio are managed according to an investment authority approved by the Board of Directors and investment guidelines approved by IFC’s Corporate Risk Committee (CRC), a subcommittee of IFC’s Management Team. Third party independent vendor prices are used to price the vast majority of the liquid assets. The vendor prices are evaluated by IFC’s Treasury department and IFC’s Corporate and Portfolio Risk Management department maintains oversight for the pricing of liquid assets.

IFC’s regional and industry departments are primarily responsible for fair valuing IFC’s investment portfolio (equity investments, debt securities, loan investments and related derivatives). IFC’s Portfolio Valuation Unit, in Corporate Risk & Sustainability, and Portfolio Review Unit, in Finance and Accounting, provide oversight over the fair valuation process by monitoring and reviewing the fair values of IFC’s investment portfolio. Prior to October 1, 2014, IFC’s Valuation Oversight Subcommittee (VOS), which was a subcommittee of CRC, reviewed significant valuation principles and the reasonableness of high exposure valuations quarterly. Pursuant to a simplification of IFC’s organizational structure effective October 1, 2014, the committees of IFC’s Management Team, including the VOS, are continuing to be reassessed.

IFC’s borrowings are fair valued by the Quantitative Analysis and Modeling Group in IFC’s Treasury department under the oversight of the Corporate Portfolio and Risk Management department.

The methodologies used and key assumptions made to estimate fair values as of December 31, 2016, and June 30, 2016, are summarized below.

**Liquid assets** – The primary pricing source for the liquid assets is valuations obtained from external pricing services (vendor prices). The most liquid securities in the liquid asset portfolio are exchange traded futures, options, and US Treasuries. For exchange traded futures and options, exchange quoted prices are obtained and these are classified as Level 1 in accordance with ASC 820. Liquid assets valued using quoted market prices are also classified as Level 1. Securities valued using vendor prices for which there is evidence of high market trade activity may also be classified as Level 1. US Treasuries are valued using index prices and also classified as Level 1. The remaining liquid assets valued using vendor prices are classified as Level 2 or Level 3 based on the results of IFC’s evaluation of the vendor’s pricing methodologies and individual security facts and circumstances. Most vendor prices use some form of matrix pricing methodology to derive the inputs for projecting cash flows or to derive prices. When vendor prices are not available, liquid assets are valued internally by IFC using yield-pricing approach or comparables model approach and these are classified as Level 2 or Level 3 depending on the degree that the inputs are observable in the market.

The critical factors in valuing liquid assets in both Level 2 and Level 3 are the estimation of cash flows and yield. Other significant inputs for valuing corporate securities, quasi-government securities and sovereign or sovereign-guaranteed securities include reported trades, broker/dealer quotes, benchmark securities, option adjusted spread curve, volatilities, and other reference data. In addition to these inputs, valuation models for securitized corporate securities, quasi-government securities and sovereign or sovereign-guaranteed securities include reported trades, broker/dealer quotes, benchmark securities, option adjusted spread curve, volatilities, and other reference data. In addition to these inputs, valuation models for securitized or collateralized securities use collateral performance inputs, such as weighted average coupon rate, weighted average maturity, conditional prepayment rate, constant default rate, vintage, and credit enhancements.

**Loans and debt securities** – Loans and debt securities in IFC’s investment portfolio that do not have available market prices are primarily valued using discounted cash flow approaches. All loans measured at fair value are classified as Level 3. Certain loans contain embedded conversion and/or income participation features. If not bifurcated as standalone derivatives, these features are considered in determining the loans’ fair value based on the quoted market prices or other calculated values of the equity investments into which the loans are convertible and the discounted cash flows of the income participation features. The valuation techniques and significant unobservable inputs for loans and debt securities classified as Level 3 as of December 31, 2016 and June 30, 2016 are presented below:

Borrowings – Fair values derived by using quoted prices in active markets are classified as Level 1. Fair values derived by determining the present value of estimated future cash flows using appropriate discount rates and option specific models where appropriate are classified as Level 2. The significant inputs used in valuing borrowings classified as Level 2 are presented below:

<table>
<thead>
<tr>
<th>Classes</th>
<th>Significant Inputs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Structured bonds</td>
<td>Foreign exchange rate and inter-bank yield curves, IFC’s credit curve and swaption volatility matrix, foreign exchange rate volatility, equity spot price, volatility and dividend yield.</td>
</tr>
<tr>
<td>Unstructured bonds</td>
<td>Inter-bank yield curve and IFC’s credit curve.</td>
</tr>
</tbody>
</table>

As of December 31, 2016, IFC had bond issuances with a total fair value of $183 million classified as level 3 in Costa Rican colones, Rwandan francs, and United States Dollars where the significant unobservable inputs were yield curve data.

Derivative instruments – The various classes of derivative instruments include interest rate contracts, foreign exchange contracts, interest rate and currency contracts, equity contracts and other derivative contracts. Certain over the counter derivatives in the liquid asset portfolio priced in-house are classified as Level 2, while certain over the counter derivatives priced using external manager prices are classified as Level 3. Fair values for derivative instruments are determined by deriving the present value of estimated future cash flows using appropriate discount rates and option specific models where appropriate.

The significant inputs used in valuing the various classes of derivative instruments classified as Level 2 and significant unobservable inputs for derivative instruments classified as Level 3 as of December 31, 2016 and June 30, 2016 are presented below:

</table>

Other investment-related financial assets comprise standalone options and warrants that do not meet the definition of a derivative.

The fair value of loan commitments amounted to $31 million at December 31, 2016 ($33 million - June 30, 2016). Fair values of loan commitments are based on present value of loan commitment fees.
NOTE K – FAIR VALUE MEASUREMENTS (continued)

**Fair value hierarchy**

The following tables provide information as of December 31, 2016 and June 30, 2016, about IFC’s financial assets and financial liabilities measured at fair value on a recurring basis. As required by ASC 820, financial assets and financial liabilities are classified in their entirety based on the lowest level input that is significant to the fair value measurement (US$ millions):

</table>

* includes securities priced at par plus accrued interest, which approximates fair value.
** includes discount notes (not under the short-term Discount Note Program), with original maturities greater than one year, with principal due at maturity of $2,449 million, with a fair value of $1,389 million as of December 31, 2016.
***In accordance with ASC 820, investments that are measured at fair value using net asset value per share have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in condensed consolidated balance sheet.

Note: For the six months ended December 31, 2016: Trading securities with fair value of $599 million transferred from level 1 to level 2 and $218 million from level 2 to level 1 due to decrease/increase in market activities. Equity investments with fair value of $90 million transferred from level 1 to level 2 and $127 million from level 2 to level 1 due to decrease/increase in market activities. Bonds issued by IFC with a fair value of $1,389 million transferred from level 1 to level 2, while bonds with a fair value of $107 million were transferred from level 2 to level 1 due to change in quality of market price information.

Gains and losses (realized and unrealized) from trading securities, loans, equity investments and debt securities included in net income for the period are reported on the condensed consolidated statements of operations in income from liquid asset trading activities, Income from Loans and guarantees, including realized gains and losses on loans and associated derivatives, income from equity investments and associated derivatives, income from debt securities and realized gains and losses on debt securities and associated derivatives and net unrealized gains and losses on non-trading financial instruments accounted for at fair value.

As of December 31, 2016, equity investments, accounted for at cost less impairment, with a carrying amount of $1,238 million were written down to their fair value of $1,035 million ($1,532 million and $1,288 million – December 31, 2015), resulting in a loss of $203 million, which was included in income from equity investments and associated derivatives in the condensed consolidated statements of operations during the six months ended December 31, 2016 (loss of $244 million – six months ended December 31, 2015). The amount of the write-down was based on a Level 3 measure of fair value.
NOTE L – SEGMENT REPORTING

For management purposes, IFC’s business comprises three segments: investment services, treasury services and advisory services. The investment services segment consists primarily of lending and investing in debt and equity securities. The investment services segment also includes AMC, which is not separately disclosed due to its immaterial impact. Further information about the impact of AMC on IFC’s condensed consolidated balance sheets and statements of operations can be found in Note B. Operationally, the treasury services segment consists of the borrowing, liquid asset management, asset and liability management and client risk management activities. Advisory services provide consultation services to governments and the private sector. Consistent with internal reporting, net income or expense from asset and liability management and client risk management activities in support of investment services is allocated from the treasury segment to the investment services segment.

The performance of investment services, treasury services and advisory services is assessed by senior management on the basis of net income for each segment, return on assets, and return on capital employed. Advisory services are primarily assessed based on the level and adequacy of its funding sources (See Note N). IFC’s management reporting system and policies are used to determine revenues and expenses attributable to each segment. Consistent with internal reporting, administrative expenses are allocated to each segment based largely upon personnel costs and segment headcounts. Transactions between segments are immaterial and, thus, are not a factor in reconciling to the consolidated data.

The methodology for allocating foreign currency transaction gains and losses on non-trading activities between the investment services segment and the treasury services segment was revised during FY16 Q1 to more closely align with management reporting. This change has been reflected in the segment results for the three and six months ended December 31, 2016 and 2015.

An analysis of IFC’s major components of income and expense by business segment for the three and six months ended December 31, 2016 and 2015, is provided below (US$ millions):

### NOTE M – VARIABLE INTEREST ENTITIES

**Significant variable interests**

IFC has identified investments in 234 VIEs (43 of which were identified as such due to the adoption of ASU 2015-02 on July 1, 2015) which are not consolidated by IFC but in which it is deemed to hold significant variable interests at December 31, 2016 (219 investments - June 30, 2016).

The majority of these VIEs do not involve securitizations or other types of structured financing. IFC is usually the minority investor in these VIEs. These VIEs are mainly: (a) investment funds, where the general partner or fund manager does not have substantive equity at risk, which IFC does not consolidate because it does not absorb the majority of funds’ expected losses or expected residual returns and (b) entities whose total equity investment is considered insufficient to permit such entity to finance its activities without additional subordinated financial support or whose activities are so narrowly defined by contracts that equity investors are considered to lack decision making ability, which IFC does not consolidate because it does not have the power to control the activities that most significantly impact their economic performance. IFC’s involvement with these VIEs includes investments in equity interests and senior or subordinated interests, guarantees and risk management arrangements. IFC’s interests in these VIEs are recorded on IFC’s condensed consolidated balance sheet primarily in equity investments, loans, debt securities, and other liabilities, as appropriate.

Based on the most recent available data of these VIEs, the balance sheet size, including committed funding, in which IFC is deemed to hold significant variable interests, totaled $35,991 million at December 31, 2016 ($32,122 million - June 30, 2016). IFC’s maximum exposure to loss as a result of its investments in these VIEs, comprising both carrying value of investments and amounts committed but not yet disbursed, was $6,119 million at December 31, 2016 ($6,058 million - June 30, 2016).
NOTE M – VARIABLE INTEREST ENTITIES (continued)

The industry sector and geographical regional analysis of IFC’s maximum exposures as a result of its investment in these VIEs at December 31, 2016 and June 30, 2016 is as follows (US$ millions):

### NOTE N – ADVISORY SERVICES

IFC provides advisory services to government and private sector clients. Since July 1, 2014, IFC advisory services to governments on investment climate and financial sector development have been delivered in partnership with IBRD through WBG Global Practices. IFC funds this business line by a combination of cash received from government and other donors and IFC’s operations via retained earnings and operating budget allocations as well as fees received from the recipients of the services.

IFC administers donor funds through trust funds. Donor funds are restricted for purposes specified in agreements with the donors.

Donor funds under administration and IFC’s funding can be commingled in accordance with administration agreements with donors. The commingled funds are held in a separate liquid asset investment portfolio managed by IBRD, which is not commingled with IFC’s other liquid assets and is reported at fair value in other assets. Donor funds are refundable until expended for their designated purpose.

As of December 31, 2016, other assets include undisbursed donor funds of $527 million ($512 million - June 30, 2016) and IFC’s advisory services funding of $209 million ($191 million - June 30, 2016). Included in other liabilities as of December 31, 2016 is $527 million ($512 million - June 30, 2016) of refundable undisbursed donor funds.
NOTE O – PENSION AND OTHER POSTRETIREMENT BENEFITS

IBRD, IFC and MIGA participate in a defined benefit Staff Retirement Plan (SRP), a Retired Staff Benefits Plan and Trust (RSBP) and a Post-Employment Benefits Plan (PEBP) that cover substantially all of their staff members.

All costs, assets and liabilities associated with these plans are allocated between IBRD, IFC and MIGA based upon their employees’ respective participation in the plans. Costs allocated to IBRD are then shared between IBRD and IDA based on an agreed cost-sharing ratio. The expenses for the SRP, RSBP, and PEBP are included in expense from pension and other postretirement benefit plans.

The following table summarizes the benefit costs associated with the SRP, RSBP, and PEBP allocated to IFC for the three and six months ended December 31, 2016 and 2015 (US$ millions):

NOTE P – OFFSETTING OF DERIVATIVES, RESALE, REPURCHASE AND SECURITIES LENDING AGREEMENTS AND COLLATERAL

IFC does not present derivative assets and liabilities or amounts due or owed under resale, repurchase and securities lending transactions related to contracts entered into with the same counterparty under a legally enforceable netting agreement on a net basis on its consolidated balance sheet. The following table provides the gross and net positions of IFC’s derivative contracts, resale, repurchase and securities lending agreements considering amounts and collateral held or pledged that are subject to enforceable counterparty credit support and netting agreements described below (US$ millions). Collateral amounts are included only to the extent of the related net derivative fair values or net resale, repurchase and securities lending agreements amounts.

* Includes accrued income of $474 million and $399 million as of December 31, 2016 and June 30, 2016 respectively.
** Includes accrued charges of $304 million and $254 million as of December 31, 2016 and June 30, 2016 respectively.
*** Includes cash collateral of $307 million and $286 million as of December 31, 2016 and June 30, 2016 respectively. The remaining amounts of collateral received consist of off-balance-sheet US Treasury securities reported in the above table at fair value.

IFC’s derivative contracts with market counterparties are entered into under standardized master agreements published by the International Swaps and Derivatives Association (“ISDA” Agreements). ISDA Agreements provide for a single lump sum settlement amount upon the early termination of transactions following a default or termination event whereby amounts payable by the non-defaulting party to the defaulting party may be applied to reduce any amounts that the other party owes the non-defaulting party. This setoff effectively reduces any amount payable by the non-defaulting party to the defaulting party.
IFC’s ISDA Agreements are appended by a Credit Support Annex ("CSA") that provides for the receipt, and in some cases, posting, of collateral in the form of cash, U.S. Treasury securities or U.K. gilts to reduce mark-to-market exposure among derivative market counterparties. IFC recognizes cash collateral received and a corresponding liability on its balance sheet for the obligation to return it. Securities received as collateral are not recognized on IFC’s balance sheet. As of December 31, 2016, $1,017 million of cash collateral was posted under CSAs ($495 million June 30, 2016). IFC recognizes a receivable on its balance sheet for its rights to cash collateral posted. In accordance with the CSAs, IFC may rehypothecate securities received as collateral, subject to the obligation to return such collateral and any related distributions received. In the event of a counterparty default, IFC may exercise certain rights and remedies, including the right to set off any amounts payable by the counterparty against any collateral held by IFC and the right to liquidate any collateral held. As of December 31, 2016, IFC had $336 million ($303 million at June 30, 2016) of outstanding obligations to return cash collateral under CSAs. The estimated fair value of all securities received and held as collateral under CSAs of December 31, 2016, all of which may be rehypothecated was $500 million ($415 million - June 30, 2016). As of December 31, 2016, $485 million of such collateral was rehypothecated under securities lending agreements ($279 million - June 30, 2016).

Collateral posted by IFC in connection with repurchase agreements approximates the amounts classified as Securities sold under repurchase agreements. At December 31, 2016, trading securities with a carrying amount (fair value) of $196 million ($197 million - June 30, 2016) were pledged in connection with borrowings under a short-term discount note program, the carrying amount of which was $2,489 million ($1,838 million - June 30, 2016).

Under certain CSA’s IFC is not required to pledge collateral unless its credit rating is downgraded from its current AAA/Aaa. The aggregate fair value of derivatives containing such a credit risk-linked contingent feature in a net liability position was $368 million at December 31, 2016 ($900 million at June 30, 2016). At December 31, 2016, IFC had no collateral posted under these agreements. If IFC’s credit rating were to be downgraded from its current AAA/Aaa to AA+/Aa1 or below, then collateral in the amount of $31 million would be required to be posted against net liability positions with counterparties at December 31, 2016 ($456 million at June 30, 2016).

IFC’s resale, repurchase and securities lending transactions are entered into with counterparties under industry standard master netting agreements which generally provide the right to offset amounts owed one another with respect to multiple transactions under such master netting agreement and liquidate the purchased or borrowed securities in the event of counterparty default. The estimated fair value of all securities received and held as collateral under these master netting agreements as of December 31, 2016 and June 30, 2016 was $0.

The following table presents an analysis of IFC’s repurchase and securities lending transactions by (1) class of collateral pledged and (2) their remaining contractual maturity as of December 31, 2016 and June 30, 2016 (US$ millions):

As of June 30, 2016, IFC has no repurchase-to-maturity transactions outstanding.

NOTE Q – RELATED PARTY TRANSACTIONS

During the quarter ended December 31, 2015, IFC sold a portion of its building in Accra, Ghana to IBRD for $13 million that generated a gain of $3 million that is included in Other income.

During the quarter ended September 30, 2014, IFC issued an amortizing, non-interest bearing promissory note, maturing September 15, 2039, to IDA (the Note) in exchange for $1,179 million. The Note requires payments totaling $1,318 million, resulting in an effective interest rate of 1.84%. With IFC’s consent, IDA may redeem the Note after September 2, 2019, upon an adverse change in its financial condition or outlook. The amount due to IDA upon such redemption is equal to the present value of the all unpaid amounts discounted at the effective interest rate. IDA may transfer the Note; however, its redemption right is not transferrable. IFC has elected the Fair Value Option for the Note.

NOTE R – CONTINGENCIES

In the normal course of its business, IFC is from time to time named as a defendant or co-defendant in various legal actions on different grounds in various jurisdictions. Although there can be no assurances, based on the information currently available, IFC’s Management does not believe the outcome of any of the various existing legal actions will have a material adverse effect on IFC’s financial position, results of operations or cash flows.
Independent Auditors’ Review Report

President and Board of Directors
International Finance Corporation:

Report on the Financial Statements

We have reviewed the condensed consolidated financial statements of the International Finance Corporation (IFC), which comprise the condensed consolidated balance sheets as of December 31, 2016, the related condensed consolidated statements of operations and comprehensive income (loss) for the three- and six-month periods ended December 31, 2016 and 2015, and the related condensed consolidated statements of changes in capital and cash flows for the six-month periods ended December 31, 2016 and 2015.

Management’s Responsibility

IFC’s management is responsible for the preparation and fair presentation of the condensed consolidated financial information in accordance with accounting principles generally accepted in the United States of America; this responsibility includes the design, implementation, and maintenance of internal control sufficient to provide a reasonable basis for the preparation and fair presentation of interim financial information in accordance with accounting principles generally accepted in the United States of America.

Auditors’ Responsibility

Our responsibility is to conduct our reviews in accordance with auditing standards generally accepted in the United States of America applicable to reviews of interim financial information. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial information. Accordingly, we do not express such an opinion.

Conclusion

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial information referred to above for it to be in accordance with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of June 30, 2016, and the related consolidated statements of operations, comprehensive income (loss), changes in capital, and cash flows for the year then ended (not presented herein); and we expressed an unmodified audit opinion on those audited financial statements in our report dated August 4, 2016. In our opinion, the accompanying condensed consolidated balance sheet of IFC as of June 30, 2016, is consistent, in all material respects, with the audited financial statements from which it has been derived.
